

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 16, Numbers 1–2

January/February 2011

Xiangqing Liu, Yisheng Huang, and Jiaquan Liu , Sign-changing solutions for an asymptotically linear Schrödinger equation with deepening potential well	1
Martin Meyries , Local well posedness and instability of travelling waves in a chemotaxis model	31
Jérôme Vétois , Existence and regularity for critical anisotropic equations with critical directions	61
Y. Sugiyama and J.J.L. Velázquez , Self-similar blow up with a continuous range of values of the aggregated mass for a degenerate Keller-Segel system	85
Mauro Garavello and Benedetto Piccoli , Entropy-type conditions for Riemann solvers at nodes	113
Massimo Grossi, Hiroshi Ohtsuka, and Takashi Suzuki , Asymptotic non-degeneracy of the multiple blow-up solutions to the Gel'fand problem in two space dimensions	145
Colette De Coster and Serge Nicaise , Singular behavior of the solution of the Helmholtz equation in weighted L^p -Sobolev spaces	165
Marcello D'Abicco, Sandra Lucente, and Giovanni Taglialatela , Errata to " L^p - L^q estimates for regularly linear hyperbolic systems"	199
