

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 15, Numbers 3-4

March/April 2010

CONTENTS

Chérif Amrouche and Yves Raudin , Reflection principles and kernels in \mathbb{R}_+^n for the biharmonic and Stokes operators. Solutions in a large class of weighted Sobolev spaces	201
Igor Kukavica, Amjad Tuffaha, and Mohammed Ziane , Strong solutions for a fluid structure interaction system	231
Nam Q. Le , Convergence results for critical points of the one-dimensional Ambrosio-Tortorelli functional with fidelity term	255
Ryuichi Suzuki , Asymptotic behavior of solutions of a semilinear heat equation with localized reaction	283
Alessandro Selvitella , Semiclassical evolution of two rotating solitons for the Nonlinear Schrödinger Equation with electric potential	315
I. Primi , Nonuniqueness of the heat flow of director fields	349
Sining Zheng and Miaoqing Tian , Critical Fujita exponents for a coupled non-Newtonian filtration system	381
