

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 14, Numbers 11-12

November/December 2009

CONTENTS

Hironobu Sasaki , On the life span of the Schrödinger equation with sub-critical power nonlinearity	1021
Pierre Magal and Shigui Ruan , On semilinear Cauchy problems with non-dense domain	1041
Christian Stinner , Very slow convergence to zero for a supercritical semilinear parabolic equation	1085
Françoise Demengel , Nonuniqueness of solutions for Dirichlet problems related to fully nonlinear singular or degenerate operators	1107
Françoise Demengel , Generalized eigenvalues for fully nonlinear singular or degenerate operators in the radial case	1127
Takasi Senba , Grow-up rate of a radial solution for a parabolic-elliptic system in \mathbf{R}^2	1155
Vyacheslav Maksimov , On reconstruction of boundary controls in a parabolic equation	1193
AUTHOR INDEX FOR VOLUME 14	1213
CONTENTS OF VOLUME 14	1214
