

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 19, Numbers 3-4

March/April 2014

Kazuo Yamazaki , On the global well-posedness of N-dimensional generalized MHD system in anisotropic spaces	201
Mónica Clapp and Anna Maria Micheletti , Asymptotic profile of 2-nodal solutions to a semilinear elliptic problem on a Riemannian manifold	225
Matt Holzer and Tasso J. Kaper , An analysis of the renormalization group method for asymptotic expansions with logarithmic switchback terms ...	245
Ryuji Kajikiya and Yong-Hoon Lee , Multiple bifurcations of sign-changing solutions for one-dimensional p -Laplace equation with a critical weight ..	283
Nao Hamamuki , Asymptotically self-similar solutions to curvature flow equations with prescribed contact angle and their applications to groove profiles due to evaporation-condensation	317
Hartmut Pecher , Low regularity local well-posedness for the Maxwell-Klein-Gordon equations in Lorenz gauge	359
Yachun Li, Qin Wang, and Zhigang Wang , Renormalized entropy solutions of homogeneous Dirichlet problems for quasilinear anisotropic degenerate parabolic-hyperbolic equations	387
