

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 25, Numbers 5-6

May/June 2020

Yanbo Hu and Jiequan Li, On a global supersonic-sonic patch characterized by 2-D steady full Euler equations	213
Huashui Zhan and Zhaosheng Feng, Stability of polytropic filtration equation with variable exponents	255
Wenjing Zhu, Yonghui Xia, and Yuzhen Bai, Bifurcations and exact traveling wave solutions of Gerdjikov-Ivanov equation with perturbation terms	279
Liangchen Li, Hengyan Li, and Weiping Yan, On the stable self-similar waves for the Camassa-Holm and Degasperis-Procesi equations	315
