

# ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 25, Numbers 11-12

November/December 2020

---

<b>Matania Ben-Artzi, Michael Ruzhansky, and Mitsuru Sugimoto,</b> Spectral identities and smoothing estimates for evolution operators .....	627
<b>Martin Saal</b> Primitive Equations with half horizontal viscosity .....	651
<b>Sitong Chen and Xianhua Tang,</b> On the planar Schrödinger-Poisson system with zero mass and critical exponential growth .....	687
<b>Gary M. Lieberman,</b> Gradient estimates for elliptic oblique derivative problems via the maximum principle .....	709
AUTHOR INDEX FOR VOLUME 25 .....	755
CONTENTS OF VOLUME 25 .....	756
