Ann. Funct. Anal.
Volume 3, Number 1, 2012

1 **A note on the expression of modulus of convexity** **1-9 pp.**
X.L. Zeng

2 **Singular value and arithmetic-geometric mean inequalities for operators** **10-18 pp.**
H. Albadawi

3 **p-power quasiconcavity of a rearrangement invariant function space** **19-31 pp.**
C. Lee; K. Cho

4 **Domain of triple band matrix B(r,s,t) on some Maddox's spaces** **32-48 pp.**
F. Basar; A.F. Cakmak

5 **Advances in almost convergence** **49-66 pp.**
C. You

6 **Extension of the refined Jensen's operator inequality with condition on spectra** **67-85 pp.**
J. Micic; J. Pecaric; J. Peric

7 **On quasi *-paranormal operators** **86- 91pp.**
S. Mecheri

8 **Approximation of analytic functions by special functions** **92-99 pp.**
S.-M. Jung

9 **The k-rank numerical radii** **100-108 pp.**
A. Aretaki; J. Maroulas

10 **A characterisation of the Fourier transform on the Heisenberg group** **109-120 pp.**
R. Lakshmi Lavanya; S. Thangavelu

11 **On compactness in complex interpolation** **121- 127pp.**
J. Voigt

12 **The wavelet characterization of Herz-type Hardy spaces with variable exponent** **128-141 pp.**
H. Wang; Z. Liu

13 **A new half-discrete Mulholland-type inequality with parameters** **142-150 pp.**
B. Yang

14 **Applications of fixed point theorems to the Hyers-Ulam stability of functional equations-a survey** **151-164 pp.**
K. Cieplinski
