

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

- Convergence of simple random walks on random discrete trees to
Brownian motion on the continuum random tree . . .***D. Croydon* 987–1019
- On the equivalence of some eternal
additive coalescents***A.-L. Basdevant* 1020–1037
- The renormalization transformation for two-type
branching models
*D. A. Dawson, A. Greven, F. den Hollander, R. Sun and J. M. Swart*** 1038–1077
- A characterization of harmonic measures on laminations by
hyperbolic Riemann surfaces***Y. Bakhtin and M. Martínez* 1078–1089
- Quasi-compactness and mean ergodicity for Markov kernels
acting on weighted supremum normed spaces***L. Hervé* 1090–1095
- Validity of the parametric bootstrap for goodness-of-fit testing
in semiparametric models***C. Genest and B. Rémillard* 1096–1127
- Invariance principles for spatial multitype
Galton–Watson trees***G. Miermont* 1128–1161
- Determinantal transition kernels for some
interacting particles on the line***A. B. Dieker and J. Warren* 1162–1172
- Random spatial growth with paralyzing obstacles
*J. van den Berg, Y. Peres, V. Sidoravicius and M. E. Vares*** 1173–1187
