

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

A stochastic min-driven coalescence process and its hydrodynamical limit <i>A.-L. Basdevant, P. Laurençot, J. R. Norris and C. Rau</i>	329–357
Uniqueness and approximate computation of optimal incomplete transportation plans <i>P. C. Álvarez-Esteban, E. del Barrio, J. A. Cuesta-Albertos and C. Matrán</i>	358–375
Intermittency and ageing for the symbiotic branching model <i>F. Aurzada and L. Döring</i>	376–394
Stochastic representations of derivatives of solutions of one-dimensional parabolic variational inequalities with Neumann boundary conditions . . . <i>M. Bossy, M. Cissé and D. Talay</i>	395–424
Polynomial bounds in the Ergodic theorem for one-dimensional diffusions and integrability of hitting times <i>E. Löcherbach, D. Loukianova and O. Loukianov</i>	425–449
Lipschitzian norm estimate of one-dimensional Poisson equations and applications <i>H. Djellout and L. Wu</i>	450–465
Limiting curlicue measures for theta sums <i>F. Cellarosi</i>	466–497
Hiding a constant drift . . <i>V. Prokaj, M. Rásonyi and W. Schachermayer</i>	498–514
Brownian motion with respect to time-changing Riemannian metrics, applications to Ricci flow <i>K. A. Coulibaly-Pasquier</i>	515–538
An integral test for the transience of a Brownian path with limited local time <i>I. Benjamini and N. Berestycki</i>	539–558
On the uniqueness of solutions to quadratic BSDEs with convex generators and unbounded terminal conditions <i>F. Delbaen, Y. Hu and A. Richou</i>	559–574
Limit laws of transient excited random walks on integers <i>E. Kosygina and T. Mountford</i>	575–600
Ergodicity of hypoelliptic SDEs driven by fractional Brownian motion <i>M. Hairer and N. S. Pillai</i>	601–628
