

# ANNALES DE L'INSTITUT HENRI POINCARÉ

## PROBABILITÉS ET STATISTIQUES

<b>Supercritical self-avoiding walks are space-filling</b> <i>H. Duminil-Copin, G. Kozma and A. Yadin</i>	315–326
<b>The spread of a catalytic branching random walk</b> . . . . . <i>Pb. Carmona and Y. Hu</i>	327–351
<b>Invariance principle for the random conductance model with dynamic bounded conductances</b> . . . . . <i>S. Andres</i>	352–374
<b>On the limiting velocity of random walks in mixing random environment</b> . . . . . <i>X. Guo</i>	375–402
<b>Euler hydrodynamics for attractive particle systems in random environment</b> . . . . . <i>C. Babadoran, H. Guiol, K. Ravishankar and E. Saada</i>	403–424
<b>Modeling flocks and prices: Jumping particles with an attractive interaction</b> . . . . . <i>M. Balázs, M. Z. Rácz and B. Tóth</i>	425–454
<b>Probabilistic cellular automata and random fields with i.i.d. directions</b> . . . . . <i>J. Mairesse and I. Marcovici</i>	455–475
<b>Survival of homogeneous fragmentation processes with killing</b> <i>R. Knobloch and A. E. Kyprianou</i>	476–491
<b>The weak convergence of regenerative processes using some excursion path decompositions</b> . . . . . <i>A. Lambert and F. Simatos</i>	492–511
<b>A uniform dimension result for two-dimensional fractional multiplicative processes</b> . . . . . <i>X. Jin</i>	512–523
<b>Minimal supersolutions of BSDEs with lower semicontinuous generators</b> . . . . . <i>G. Heyne, M. Kupper and C. Mainberger</i>	524–538
<b>On the mean speed of convergence of empirical and occupation measures in Wasserstein distance</b> . . . . . <i>E. Boissard and T. Le Gouic</i>	539–563
<b>Long time behaviour and stationary regime of memory gradient diffusions</b> . . . . . <i>S. Gadat and F. Panloup</i>	564–601
<b>Conditional limit theorems for intermediately subcritical branching processes in random environment</b> <i>V. I. Afanasyev, Ch. Böinghoff, G. Kersting and V. A. Vatutin</i>	602–627
<b>Limit distributions for multitype branching processes of <math>m</math>-ary search trees</b> . . . . . <i>B. Chauvin, Q. Liu and N. Pouyanne</i>	628–654
<b>Comparison between two types of large sample covariance matrices</b> . . . . <i>G. Pan</i>	655–677
<b>Entropy of Schur–Weyl measures</b> . . . . . <i>S. Mkrtchyan</i>	678–713
