

# ANNALES DE L'INSTITUT HENRI POINCARÉ

## PROBABILITÉS ET STATISTIQUES

<b>Free probability for pairs of faces II: 2-variables bi-free partial <math>R</math>-transform and systems with rank <math>\leq 1</math> commutation</b> . . . . . <i>D.-V. Voiculescu</i>	1–15
<b>Determinantal point processes in the plane from products of random matrices</b> . . . . . <i>K. Adhikari, N. K. Reddy, T. R. Reddy and K. Saba</i>	16–46
<b>Zero–one law for directional transience of one dimensional excited random walks</b> . . . . . <i>G. Amir, N. Berger and T. Orenshtein</i>	47–57
<b>Fluctuations for internal DLA on the comb</b> . . . . . <i>A. Asselah and H. Rabmani</i>	58–83
<b>Transience of the vacant set for near-critical random interlacements in high dimensions</b> . . . . . <i>A. Drewitz and D. Erhard</i>	84–101
<b>Connectedness of Poisson cylinders in Euclidean space</b> <i>E. I. Broman and J. Tykesson</i>	102–126
<b>On the absence of percolation in a line-segment based lilypond model</b> . . . . <i>C. Hirsch</i>	127–145
<b>Planar Ising magnetization field II. Properties of the critical and near-critical scaling limits</b> . . . . . <i>F. Camia, C. Garban and C. M. Newman</i>	146–161
<b>The Brownian web is a two-dimensional black noise</b> . . . . . <i>T. Ellis and O. N. Feldheim</i>	162–172
<b>Talagrand's inequality for interacting particle systems satisfying a log-Sobolev inequality</b> . . . . . <i>F. Völlering</i>	173–195
<b>Optimal transport between random measures</b> . . . . . <i>M. Huesmann</i>	196–232
<b>How big is the minimum of a branching random walk?</b> . . . . . <i>Y. Hu</i>	233–260
<b>Weak convergence approach for parabolic equations with large, highly oscillatory, random potential</b> . . . . . <i>Y. Gu and G. Bal</i>	261–285
<b>On the convergence of densities of finite voter models to the Wright–Fisher diffusion</b> . . . . . <i>Y.-T. Chen, J. Choi and J. T. Cox</i>	286–322
<b>Systems of Brownian particles with asymmetric collisions</b> <i>I. Karatzas, S. Pal and M. Shkolnikov</i>	323–354
<b>On the sizes of burnt and fireproof components for fires on a large Cayley tree</b> . . . . . <i>C. Marzouk</i>	355–375
<b>Asymptotic behavior of a relativistic diffusion in Robertson–Walker space–times</b> . . . . . <i>J. Angst</i>	376–411
<b>Smoothing effect of rough differential equations driven by fractional Brownian motions</b> . . . . . <i>F. Baudoin, C. Ouyang and X. Zhang</i>	412–428
<b>On an inversion theorem for Stratonovich's signatures of multidimensional diffusion paths</b> . . . . . <i>X. Geng and Z. Qian</i>	429–447
<b>Weak extinction versus global exponential growth of total mass for superdiffusions</b> . . . . . <i>J. Engländer, Y.-X. Ren and R. Song</i>	448–482
<b>Ergodicity for a stochastic Hodgkin–Huxley model driven by Ornstein–Uhlenbeck type input</b> . . . . . <i>R. Höpfner, E. Löcherbach and M. Thieullen</i>	483–501
