

THE ANNALS *of* APPLIED PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

On the stability of some controlled Markov chains and its applications to stochastic approximation with Markovian dynamic CHRISTOPHE ANDRIEU, VLADISLAV B. TADIĆ AND MATTI VIHOLA	1
A zero-sum game between a singular stochastic controller and a discretionary stopper DANIEL HERNANDEZ-HERNANDEZ, ROBERT S. SIMON AND MIHAIL ZERVOS	46
Supercritical percolation on large scale-free random trees JEAN BERTOIN AND GERÓNIMO URIBE BRAVO	81
Spatial Moran models I. Stochastic tunneling in the neutral case RICHARD DURRETT AND STEPHEN MOSELEY	104
Regularity conditions in the realisability problem with applications to point processes and random closed sets	RAPHAEL LACHIEZE-REY AND ILYA MOLCHANOV 116
On an integral equation for the free-boundary of stochastic, irreversible investment problems	GIORGIO FERRARI 150
Surface order scaling in stochastic geometry	J. E. YUKICH 177
Central limit theorem for the multilevel Monte Carlo Euler method MOHAMED BEN ALAYA AND AHMED KEBAIER	211
A family of density expansions for Lévy-type processes MATTHEW LORIG, STEFANO PAGLIARANI AND ANDREA PASCUCCI	235
Interacting growth processes and invariant percolation	SEBASTIAN MÜLLER 268
Bootstrap percolation on the Hamming torus	JANKO GRAVNER, CHRISTOPHER HOFFMAN, JAMES PFEIFFER AND DAVID SIVAKOFF 287
Resource dependent branching processes and the envelope of societies F. THOMAS BRUSS AND MITIA DUERINCKX	324
Limiting geodesics for first-passage percolation on subsets of \mathbb{Z}^2 ANTONIO AUFFINGER, MICHAEL DAMRON AND JACK HANSON	373
Necessary condition for null controllability in many-server heavy traffic GENNADY SHAIKHET	406
