

THE ANNALS *of* APPLIED STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

- Horseshoes in multidimensional scaling and local kernel methods
PERSI DIACONIS, SHARAD GOEL AND SUSAN HOLMES 777
- For objective causal inference, design trumps analysis DONALD RUBIN 808
- Random survival forests HEMANT ISHWARAN, UDAYA B. KOGALUR,
EUGENE H. BLACKSTONE AND MICHAEL S. LAUER 841
- Residual-based localization and quantification of peaks in X-ray diffractograms
P. L. DAVIES, U. GATHER, M. MEISE, D. MERGEL AND T. MILDENBERGER 861
- Open statistical issues in Particle Physics LOUIS LYONS 887
- Predictive learning via
rule ensembles JEROME H. FRIEDMAN AND BOGDAN E. POPESCU 916
- Sequential category aggregation and partitioning approaches for multi-way contingency
tables based on survey and census data
L. FRASER JACKSON, ALISTAIR G. GRAY AND STEPHEN E. FIENBERG 955
- A sharper discrepancy measure for post-election audits PHILIP B. STARK 982
- Testing significance of features by lassoed principal components
DANIELA M. WITTEN AND ROBERT TIBSHIRANI 986
- Inference using shape-restricted regression splines MARY C. MEYER 1013
- An application of principal stratification to control for institutionalization at follow-up in
studies of substance abuse treatment programs
BETH ANN GRIFFIN, DANIEL F. MCCAFFREY AND ANDREW R. MORRAL 1034
- Distance-based clustering of sparsely observed stochastic processes,
with applications to online auctions JIE PENG AND HANS-GEORG MÜLLER 1056
- Analysis of comparative data with hierarchical autocorrelation CÉCILE ANÉ 1078
- A general formulation for standardization of rates as a method to control confounding
by measured and unmeasured disease risk factors STEVEN D. MARK 1103
- Estimating a difference of Kullback–Leibler risks using a normalized difference of AIC
D. COMMENGES, A. SAYYAREH, L. LETENNEUR, J. GUEDJ AND A. BAR-HEN 1123
