

THE ANNALS of APPLIED STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Leo Breiman Memorial Section

Remembering Leo Breiman	ADELE CUTLER	1621
Leo Breiman: An important intellectual and personal force in statistics, my life and that of many others	PETER J. BICKEL	1634
Remembrance of Leo Breiman	PETER BÜHLMANN	1638
Leo Breiman	MICHAEL I. JORDAN	1642
Remembering Leo Breiman	RICHARD A. OLSHEN	1644
Remembering Leo	JEROME H. FRIEDMAN	1649
Selected recollections of my relationship with Leo Breiman	CHARLES J. STONE	1652
Leo and me	JACOB FELDMAN	1656
Remembering Leo	BIN YU	1657

Articles

Subsampling methods for genomic inference	PETER J. BICKEL, NATHAN BOLEY, JAMES B. BROWN, HAIYAN HUANG AND NANCY R. ZHANG	1660
Multicategory vertex discriminant analysis for high-dimensional data TONG TONG WU AND KENNETH LANGE		1698
Reuse, recycle, reweigh: Combating influenza through efficient sequential Bayesian computation for massive data	JENNIFER A. TOM, JANET S. SINSHEIMER AND MARC A. SUCHARD	1722
Reconstructing DNA copy number by penalized estimation and imputation ZHONGYANG ZHANG, KENNETH LANGE, ROEL OPHOFF AND CHIARA SABATTI		1749
Exit polling and racial bloc voting: Combining individual-level and $R \times C$ ecological data D. JAMES GREINER AND KEVIN M. QUINN		1774
Liquid chromatography mass spectrometry-based proteomics: Biological and technological aspects	YULIYA V. KARPIEVITCH, ASHOKA D. POLPITIYA, GORDON A. ANDERSON, RICHARD D. SMITH AND ALAN R. DABNEY	1797
Zero-inflated truncated generalized Pareto distribution for the analysis of radio audience data	DOMINIQUE-LAURENT COUTURIER AND MARIA-PIA VICTORIA-FESER	1824
Modeling the dynamics of biomarkers during primary HIV infection taking into account the uncertainty of infection date	J. DRYLEWICZ, J. GUEDJ, D. COMMENGES AND R. THIÉBAUT	1847
Improving PSF calibration in confocal microscopic imaging—estimating and exploiting bilateral symmetry NICOLAI BISSANTZ, HAJO HOLZMANN AND MIROSLAW PAWLAK		1871
A nonlinear mixed effects directional model for the estimation of the rotation axes of the human ankle	MOHAMMED HADDOU, LOUIS-PAUL RIVEST AND MICHAEL PIERRYNOWSKI	1892
Nonparametric inference of doubly stochastic Poisson process data via the kernel method TINGTING ZHANG AND S. C. KOU		1913

Continued on back cover

THE ANNALS of APPLIED STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles—Continued from front cover

- A bivariate space–time downscaler under space and time misalignment
VERONICA J. BERROCAL, ALAN E. GELFAND AND DAVID M. HOLLAND 1942
- An imputation-based approach for parameter estimation in the presence of ambiguous
censoring with application in industrial supply chain SAMIRAN GHOSH 1976
- Generalized extreme value regression for binary response data: An application to B2B
electronic payments system adoption XIA WANG AND DIPAK K. DEY 2000
- A Bayesian graphical modeling approach to microRNA regulatory network inference
FRANCESCO C. STINGO, YIAN A. CHEN, MARINA VANNUCCI,
MARIANNE BARRIER AND PHILIP E. MIRKES 2024
- Node harvest NICOLAI MEINSHAUSEN 2049
- Testing affiliation in private-values models of first-price auctions using grid distributions
LUCIANO I. DE CASTRO AND HARRY J. PAARSCH 2073
- Model-robust regression and a Bayesian “sandwich” estimator
ADAM A. SZPIRO, KENNETH M. RICE AND THOMAS LUMLEY 2099
- Detection of treatment effects by covariate-adjusted expected shortfall
XUMING HE, YA-HUI HSU AND MINGXIU HU 2114
- Bayesian semiparametric inference for multivariate doubly-interval-censored data
ALEJANDRO JARA, EMMANUEL LESAFFRE, MARIA DE IORIO AND
FERNANDO QUINTANA 2126
- Sparse modeling of categorical explanatory variables
JAN GERTHEISS AND GERHARD TUTZ 2150
- Modeling heterogeneity in ranked responses by nonparametric maximum likelihood:
How do Europeans get their scientific knowledge?
BRIAN FRANCIS, REGINA DITTRICH AND REINHOLD HATZINGER 2181

Correction notes

- Poisson point process models solve the “pseudo-absence problem” for presence-only data
in ecology DAVID I. WARTON AND LEAH C. SHEPHERD 2203
- Approaches for multi-step density forecasts with application to aggregated wind power
ADA LAU AND PATRICK McSHARRY 2205
