THE ANNALS of
MATHEMATICAL
STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1939
EDITED BY S. S. WILKS, 1939-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE OF MATHEMATICAL STATISTICS

Contents

Articles

Asymptotic theory for successive sampling with varying probabilities without replace-

ment, I ............................................................... Bengt Rosen 373

On the optimality of some multiple comparison procedures ........ Emil Sjöstedt 398

Functions of order statistics .................................................. Galen R. Shorack 412

Distribution free tests for symmetry based on the number of positive sums

D. L. Burdick 428

Limit laws for extreme order statistics from strong-mixing processes ........ Roy E. Welsch 439

Fixed alternatives and Wald's formulation of the noncentral asymptotic behavior of the
likelihood ratio statistic .................................................. T. W. F. Stroud 447

Estimation and testing for differences in magnitude or displacement in the mean vectors
of two multivariate normal populations
Charles H. Kraft, Ingram Olkin and Constance van Eeden 455

Bahadur efficiencies of some tests for uniformity on the circle ........ J. S. Rao 468

Randomization model for incomplete block designs ..................... J. Robinson 480

Statistical structure of the problem of sampling from finite populations
Haruki Morimoto 490

On the Dubins and Savage characterization of optimal strategies
William D. Sudderth 498

A note on asymptotic joint normality ..................... C. L. Mallows 508

On the distribution of the maximum of random variables ............... Janos Galambos 516

Upper bounds for the asymptotic maxima of continuous Gaussian processes
M. B. Marcus 522

On the number of solutions of systems of random equations ........... David R. Brillinger 534

The maximization of entropy of discrete denumerably-valued random variables with
known mean ........................................................... Roman A. Mureika 541

Transformation groups and sufficient statistics ...................... J. Pfanzagl 553

Strong ratio limit theorems for Markov processes ....................... Michael Lin 569

Asymptotic properties of Gaussian processes ...................... Clifford Qualls and Hiba Watanabe 580

Some remarks on asymmetric processes .................................. P. W. Millar 597

An invariance principle for martingales ................................... Richard Drogin 602

Vol. 43, No. 2—April 1972
THE INSTITUTE OF MATHEMATICAL STATISTICS
(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the
development, dissemination, and application of mathematical statistics.

OFFICERS

President:
R. C. Bose, Department of Mathematics and Statistics, Colorado State University,
Fort Collins, Colorado 80521

President-Elect:
Lucien LeCam, Department of Statistics, University of California, Berkeley, California 94720

Executive Secretary:
Leo Katz, Statistical Laboratory, Michigan State University, East Lansing, Michigan 48823

Program Secretary:
R. V. Hogg, Department of Statistics, University of Iowa, Iowa City, Iowa 52240

Treasurer:
George J. Reznikoff, Department of Statistics, California State College, Hayward,
California 94542

Editor: Annals of Mathematical Statistics
Ingram Olkin, Editor, Annals of Statistics, Educational Testing Service, Princeton,
New Jersey 08540. Address after June 15, 1972: Ingram Olkin, Department of Statistics,
Stanford University, Stanford, California 94305

Ronald Pyke, Department of Mathematics, University of Washington, Seattle,
Washington 98105

Managing Editor:
K. J. C. Smith, Department of Statistics, University of North Carolina, Chapel Hill,
North Carolina 27514

Membership. Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are $20.00 per year for residents of the United States or Canada and $12.00 per year for residents of other countries. Special rates of $10.00 per year are available to students. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Subscription Rates. Current issues of the Annals of Mathematical Statistics are $30.00 per volume (six issues of one calendar year). Members of the Institute of Mathematical Statistics pay different rates (see above). Single issues are $5.75. Back numbers for all issues up to and including 1956 (Volume 27) are $16.50 per volume, $4.50 per issue; issues from 1957 through 1964 are $22.00 per volume, $5.75 per issue; from 1965 onward, $33.00 per volume, $5.75 per issue. Complete sets (Volumes 1 through 27) are $275.00. If additional volumes are ordered at the same time complete sets are ordered, the price is $16.50 per volume for Volumes 28 through 35, and $22.00 per volume for Volumes 36 through 40. Complete sets (Volumes 1 through 40) are $500.00.

Communications concerning subscriptions, back numbers, payment of dues, membership, changes of address, etc., should be addressed to the Treasurer. Advertising correspondence should be directed to the Managing Editor.

Mail to the Annals of Mathematical Statistics should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should not be addressed to Waverly Press.

PRINTED AT THE
WAVERTLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.
Second-class postage paid at Baltimore, Maryland 21202 and at additional mailing offices.

MANAGING EDITOR

K. J. C. SMITH

PAST EDITORS OF THE ANNALS

Published bimonthly by the Institute of Mathematical Statistics in February, April, June, August, October and December.

EDITORIAL POLICY

The main aim of the Annals of Mathematical Statistics is to publish original contributions to theoretical statistics and to probability theory. The emphasis is on quality, not just on formal novelty and correctness of the contents of a paper. Expository papers are also welcome, especially if they provide authoritative surveys of areas that have been in vigorous development.

NOTICE

Manuscripts submitted for publication in the Annals of Mathematical Statistics should be sent to the Editor at the following address: Ingram Olkin, Editor, Annals of Mathematical Statistics, Educational Testing Service, Princeton, New Jersey 08540. After June 1972, to Ingram Olkin, Department of Statistics, Stanford University, Stanford, California 94305. Manuscripts submitted for publication in the Annals of Probability should be sent to the Editor at the following address: Ronald Pyke, Editor, Annals of Probability, Department of Mathematics, University of Washington, Seattle, Washington 98105.
NOTICE

The Council of the Institute of Mathematical Statistics at the annual meeting of the Institute recommended to the membership that as of January 1973,

THE ANNALS OF MATHEMATICAL STATISTICS

be superseded by the two journals:

THE ANNALS OF STATISTICS

and

THE ANNALS OF PROBABILITY

under the Editorship of Ingram Olkin and Ronald Pyke, respectively. Both journals will become, subject to the vote of the membership, official journals of the Institute of Mathematical Statistics and will appear in alternate months. Further details about this change will be forthcoming from the office of the Executive Secretary.

From January, 1972, papers submitted for publication in each journal should be sent to the appropriate Editor. In cases of doubt, a paper may be sent to either Editor; because some papers might naturally be in either journal, some members of the Editorial Board will be common to both journals.

Editorial addresses are:

Annals of Statistics
Ingram Olkin, Editor
(after June 15, 1972) Department of Statistics, Stanford University, Stanford, Calif. 94305
