

THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938
EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
The limit points of a normalized random walk.....	HARRY KESTEN 1173
On a scheduling problem in sequential analysis.....	S. EHRENFELD 1206
The construction of uniformly minimum variance unbiased estimators for exponential distributions.....	J. L. ABBEY AND H. T. DAVID 1217
A note on symmetric Bernoulli random variables.....	MORRIS L. EATON 1223
Moment inequalities for the maximum cumulative sum.....	R. J. SERFLING 1227
Convergence properties of S_N under moment restrictions.....	R. J. SERFLING 1235
Bounds and asymptotes for the performance of multivariate quantizers..	PETER ELIAS 1249
Gaussian processes with stationary increments: local times and sample function properties.....	SIMEON M. BERMAN 1260
A class of ADF tests for subhypothesis in the multiple linear regression..	HIRA L. KOUL 1273
The representation of functionals of Brownian motion by stochastic integrals	J. M. C. CLARK 1282
A layer rank test for ordered bivariate alternatives	G. K. BHATTACHARYYA AND RICHARD A. JOHNSON 1296
Inadmissibility of various "good" statistical procedures which are translation invariant.....	S. K. PERNG 1311
Stopping time of a rank-order sequential probability ratio test based on Lehmann alternatives—II.....	J. SETHURAMAN 1322
Notes	
Error estimation for a limit theorem for dependent random variables	H. W. BLOCK 1334
Note on a result of Dudley on the speed of mean Glivenko-Cantelli convergence	PETER GÄNSSLER 1339
A consistent nonparametric multivariate density estimator based on statistically equivalent blocks.....	M. P. GESSAMAN 1344
Note on the uniform convergence of density estimates....	EUGENE F. SCHUSTER 1347
Necessary and sufficient condition for convergence in probability to invariant posterior distributions.....	M. STONE 1349

Vol. 41, No. 4—August 1970

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year). Single issues are \$5.75. Back numbers for all issues up to and including 1956 (Volume 27) are \$16.50 per volume, \$4.50 per issue; issues from 1957 through 1964 are \$22.00 per volume, \$5.75 per issue; from 1965 onward, \$33.00 per volume, \$5.75 per issue. Complete sets (Volumes 1 through 27) are \$275.00. If additional volumes are ordered at the same time complete sets are ordered, the price is \$16.50 per volume for Volumes 28 through 35, and \$22.00 per volume for Volumes 36 through 40. Complete sets (Volumes 1 through 40) are \$500.00.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, Ingram Olkin, Department of Statistics, Stanford University, Stanford, California 94305. **Abstracts** and **corrected galley proofs** should be sent to the Managing Editor, K. J. C. Smith, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514.

Instructions for Authors. Each manuscript is required to contain an abstract and to have a title descriptive of its contents.

The abstract will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of an abstract will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Abstract" followed by the title of the paper. Formulas should be used as sparingly as possible. The abstract should not refer to the theorems or formulas in the body of the paper—it ought to be intelligible by itself. Occasionally the abstract will make an introduction unnecessary but more often an introductory section in the paper will still be needed.

The title should be descriptive but concise, i.e. it should indicate the topic of the paper as clearly as possible but every word in it ought to be pertinent.

In the near future the *Annals* will introduce a requirement for authors to list key words and phrases and classifying numbers, as now used in publications of the American Mathematical Society. Authors may want to anticipate this requirement by including such data now.

Manuscripts should be typewritten, entirely double-spaced including references, with wide margins at sides, top and bottom. The original should be submitted with two additional copies on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. References should follow the style: [5] Wilks, S. S. (1963). Multivariate statistical outliers. *Sankhyā Ser. A* 25 407-426.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink, twice the size they are to be printed.

(Continued on inside back cover)

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202 and at additional mailing offices.

Published bimonthly by the Institute of Mathematical Statistics in February,
April, June, August, October and December.

EDITORIAL POLICY

The main aim of the *Annals of Mathematical Statistics* is to publish original contributions to theoretical statistics and to probability theory. The emphasis is on quality, not just on formal novelty and correctness of the contents of a paper. Expository papers are also welcome, especially if they provide authoritative surveys of areas that have been in vigorous development.

CHANGE OF EDITOR. Manuscripts arriving after July 1, 1970, should be submitted to the new Editor, Ingram Olkin, Department of Statistics, Stanford University, Stanford, California 94305. Correspondence about manuscripts submitted before July 1, 1970, should be directed to Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105.

MEETINGS OF THE INSTITUTE

NOTE: This calendar lists all of the meetings which have been approved by the IMS Council to date. Meeting dates which fall rather far in the future are subject to change.

Meet- ing No.	Place	Date	Abstract Deadline*	Joint With
126	Laramie, Wyoming (Annual Meeting)	August 25-28, 1970	July 6, 1970	AMS
127	Hanover, West Ger- many (European Regional)	August 19-26, 1970	June 30, 1970	
	University Park, Penn. (Eastern Regional)	April 21-23, 1971		ASA, ENAR
	Columbia, Missouri (Central Regional)	Spring, 1971	
	Ames, Iowa (Central Regional)	Spring, 1972		ASA, ENAR

* Abstracts should be submitted in duplicate to the Managing Editor, K. J. C. Smith, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514, on abstract blanks which may be obtained from him. Abstracts of papers to be presented *in person* at the meetings must be received on or before the corresponding deadline. Only one contributed paper may be given in person at any one meeting. Abstracts contributed by title may be submitted at any time and will be printed in the next issue to go to press. Abstracts should not exceed 200 words and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank or they may be returned.
