

# THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938  
EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE  
OF MATHEMATICAL STATISTICS

## Contents

	PAGE
Towards a theory of generalized Bayes tests.....	R. H. FARRELL 1
On a necessary and sufficient condition for admissibility of estimators when strictly convex loss is used.....	R. H. FARRELL 23
Inadmissibility of the usual estimators of scale parameters in problems with unknown location and scale parameters.....	L. BROWN 29
Designs for regression problems with correlated errors; many parameters	
JEROME SACKS AND DONALD YLVISAKER	49
When are Gauss-Markov and least squares estimators identical? A coordinate-free approach.....	WILLIAM KRUSKAL 70
Estimation of the location of the cusp of a continuous density	
B. L. S. PRAKASA RAO	76
A sequential procedure for selecting the largest of $k$ means	
H. ROBBINS, M. SOBEL AND N. STARR	88
The general moment problem, a geometric approach.....	J. H. B. KEMPERMAN 93
Convergence of sums of squares of martingale differences.....	Y. S. CHOW 123
A decomposition for $L^1$ -bounded martingales.....	RICHARD F. GUNDY 134
On infinitely divisible laws and a renewal theorem for non-negative random variables	
WALTER L. SMITH	139
Variations on a renewal theorem of Smith.....	C. C. HEYDE 155
The big match.....	DAVID BLACKWELL AND T. S. FERGUSON 159
Some properties of an algebraic representation of stochastic processes	
PAUL W. HOLLAND	164
Locally and asymptotically minimax tests of a multivariate problem.....	N. GIRI 171
An example of large discrepancy between measures of asymptotic efficiency of tests	
R. K. TSUTAKAWA	179
Estimation of the parameter in the stochastic model for phage attachment to bacteria	
R. C. SRIVASTAVA	183
Invariant interval estimation of a location parameter.....	R. S. VALAND 193
Paired comparisons for paired characteristics.....	P. K. SEN AND H. A. DAVID 200
On the identifiability of finite mixtures	
SIDNEY J. YAKOWITZ AND JOHN D. SPRAGINS	209
On the non-central distributions of two test criteria in multivariate analysis of variance	
C. G. KHATRI AND K. C. S. PILLAI	215
On the distribution of a multiple correlation matrix; non-central multivariate beta distributions.....	M. S. SRIVASTAVA 227

*Continued on back cover*

Vol. 39, No. 1—February 1968

# THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U.S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.75. Back numbers for all issues up to and including 1956 (Volume 27) are \$16.50 per volume, \$4.50 per issue; issues from 1957 through 1964 are \$22.00 per volume, \$5.75 per issue; from 1965 onward, \$33.00 per volume, \$5.75 per issue. Complete sets (Volumes 1 to 27) are \$275.00. If additional volumes are ordered at the same time complete sets are ordered, the price is \$16.50 per volume for Volume 28 to Volume 35, and \$22.00 per volume for Volume 36 onward.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning subscriptions, back numbers, payment of dues, membership, changes of address, etc., should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105. Abstracts and corrected galley proofs should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with two additional copies on paper that will take corrections. Dittosed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g.,  $\log \bar{x}$ ) and underlined letters (e.g.,  $\underline{x}$ ) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus  $(a + b)/(c + d)$  rather than  $\frac{a + b}{c + d}$ , and  $ab/cd$  rather than  $\frac{ab}{cd}$ .

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

---

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should not be addressed to Waverly Press.

---

COMPOSED AND PRINTED AT THE  
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202
