

# SANKHYĀ

## The Indian Journal of Statistics

CONTENTS OF SERIES A, VOL. 29, PART 3, 1967

The estimation of prior distributions in problems of decision.....	D. A. Sprott
Sufficiency or conditional sufficiency.....	D. A. S. Fraser
On weakly stable transformations.....	S. Natarajan and K. Viswanath
Two Markov chains, arising from examples of queues with state-dependent service times.....	Marcel F. Neuts
On characterizing distributions by properties of order statistics.....	Thomas S. Ferguson
Some properties of additive Arithmetical functions.....	E. M. Pau
Asymptotic efficiency of Des Raj's strategy-I.....	P. K. Pathak
Asymptotic efficiency of the symmetrized Des Raj strategy-II.....	P. K. Pathak
Incomplete block designs with $v = 2k$ .....	D. A. Preece
Calculus of generalized inverses of matrices.....	C. Radhakrishna Rao

Orders for the Journal for distribution outside India are to be sent to:

Pergamon Press Ltd., Pergamon Press Inc.,  
Headington Hill Hall, or 122 East 55th Street,  
Oxford, England New York 22, USA

Orders for the Journal for distribution within India are to be sent to:

Statistical Publishing Society,  
204/1 Barrackpore Trunk Road,  
Calcutta-35, India

# JOURNAL OF THE ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in three series, SERIES A (GENERAL), four issues a year, annual subscription, post free, £5 4s. U. S. \$15: price each part 30s: SERIES B (METHODOLOGICAL), three issues a year, annual subscription post free, £4 2s. U. S. \$12: price each part 35s: SERIES C (APPLIED STATISTICS), three issues a year, annual subscription 30s.; U. S. \$5, price each part 15s.

Contents of SERIES B (METHODOLOGICAL), Vol. 29, PARTS 2 & 3, 1967

The analysis of association among many variates (with Discussion) E. J. WILLIAMS	
On John's cyclic incomplete block designs W. H. CLATWORTHY	
Formal expression which can be used for the determination of the operating characteristic and average sample number of a simple sequential test K. W. KEMP	
A simple procedure for determining upper and lower limits for the average sample run length of a cumulative sum scheme K. W. KEMP	
Models of the second kind in regression analysis P. R. FISK	
Inferences concerning a population correlation coefficient from one or possibly two samples subsequent to a preliminary test of significance S. R. SRIVASTAVA AND T. A. BANCROFT	
On a special subset giving an irregular fractional replicate of a 2 <sup>th</sup> factorial experiment K. S. BANERJEE AND W. T. FEDERER	
Optimization of a hot rolling mill D. C. DOWSON	
A non-parametric test for the bivariate two-sample location problem K. V. MARDIA	
Non-homogeneous branching Poisson processes P. A. W. LEWIS	
Methods of estimation involving discounting W. G. GILCHRIST	
A change-over design for testing a treatment factor at four equally spaced levels I. I. BERENBLUT	
Tests of hypotheses concerning matched samples B. M. BENNETT	
Optimum utilization of auxiliary information: $\pi$ ps sampling of two units from a stratum T. V. HANURAV	
On the choice of a strategy for a ratio method of estimation T. J. RAO	
Considering statistical and time averages in a regulation problem E. KOUNIAS	
On a class of Gaussian processes for which the mean rate of crossings is infinite J. A. MCFADDEN	
A Bayesian significance test for multinomial distributions (with Discussion) I. J. GOOD	
The theory of risk (with Discussion) K. BORCH	
Tests of hypotheses concerning matched samples B. M. BENNETT	
Considering statistical and time averages in a regulation problem E. KOUNIAS	
On a class of Gaussian processes for which the mean rate of crossings is infinite J. A. MCFADDEN	
On the economic choice of experiment sizes for decision regarding certain linear combinations W. A. ERICSON	
On the distribution of products of random variables Z. A. LOMNICKI	
Missing data in regression analysis Y. HAITOVSKY	
Estimation of the parameter of an exponential distribution G. M. EL-SAYYAD	
The likelihood and invariance principles J. A. HARTIGAN	
An analysis of departures from the exponential distribution O. A. Y. JACKSON	
Four-letter Words: The distribution of pattern frequencies in ring permutations D. E. BARTON AND F. N. DAVID	

The Royal Statistical Society 21, Bentinck Street, London, W. 1

# STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields: such as frequency distributions, estimating and testing problems, sampling and experimental designs, variance analysis, spectral theory and other methods in time-series analysis, queueing theory, reliability and acceptance inspection. Journals appearing in all parts of the world, on mathematics and statistics, or on other fields and possible contribution of interest are regularly scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

The abstracts do not exceed 400 words, with occasional "double abstracts" for papers where this size is not sufficient to represent the paper. The language is English; the language of the original paper is indicated. The headings give the name and address of the author together with the Journal in which the paper is published moreover a note is added on the number of references, tables and figures.

The classification scheme which is used in this Journal supplies a division of all abstracts in twelve main sections. The pages of the Journal are colour-tinted in accordance with these main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special index in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. Papers containing new statistical tables are listed in a separate index.

The abstracts are numbered serially, the volume number being inserted as a prefix. The Journal is published four times a year and contains approximately 1,000 abstracts. An author index, the secondary classification index and the new statistical tables index are published in issue and combined in a yearly supplement which also contains a list of all Journals represented in the volume by one or more abstracts.

<i>Annual Subscription</i>	£7. 10s. (U.S.A. \$24.00)
<i>Single Number</i>	£2. 5s. (U.S.A. \$ 7.00)
<i>Loose Leaf Binders for</i>	16s. 3d. including postage
<i>Single Abstract Sheets</i>	and packing.

## JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

Volume 62

December 1967

Number 320

The Quantification of Judgment—Some Methodological Suggestions.....	<i>Robert L. Winkler</i>
Designing Some Multi-Factor Analytical Studies.....	<i>J. Sedransk</i>
Representation of Similarity Matrices by Trees.....	<i>J. A. Hartigan</i>
On Some Invariant Criteria for Grouping Data.....	<i>H. P. Friedman and J. Rubin</i>
Some Observations on Robust Estimation.....	<i>Robert V. Hogg</i>
Rank Analysis of Covariance.....	<i>Dana Quade</i>
On Some Multisample Permutation Tests Based on A Class of $u$ Statistics.....	<i>P. K. Sen</i>
On Some Optimal Nonparametric Procedures in Two-way Layouts.....	<i>M. L. Puri and P. K. Sen</i>
Optimal Robustness: A General Method, with Applications to Linear Estimators of Location.....	<i>Eugene Laska and Allan Birnbaum</i>
Efficiency Robust Two-sample Rank Tests.....	<i>Eugene Laska and Allan Birnbaum</i>
Asymptotic Distribution for a Generalized Banach Match Box Problem.....	<i>T. Cacoullas</i>
The Maximum Likelihood Estimate of the Non-centrality Parameter of a Non-central Variate.....	<i>Paul L. Meyer</i>
Approximate Specifications and the Choice of a K-Class Estimator.....	<i>Franklin M. Fisher</i>
An Application of Variable Weight Distributed Lags.....	<i>P. A. Tinsley</i>
The Variance of Weighted Regression Estimators.....	<i>James S. Williams</i>
A Necessary and Sufficient Condition that Ordinary Least Squares Estimators be Best Linear Unbiased.....	<i>F. W. McElroy</i>
Asymptotic Variances for Dummy Variate Regression Under Normality Assumptions.....	<i>Stanley L. Warner</i>
Computer Simulation Experiments with Economic Systems: The Problem of Experimental Design.....	<i>Thomas H. Naylor, Donald S. Burdick and W. Earl Sasser</i>
A Computer Simulation Model of the Textile Industry.....	<i>Thomas H. Naylor, William H. Wallace and W. Earl Sasser</i>
Straight Line Confidence Regions for Linear Models.....	<i>Leroy Folks and Charles E. Anile</i>
Statistical Dependence Between Random Effects and the Number of Observations on the Effects for the Unbalanced One-way Random Classification.....	<i>David A. Harville</i>
Correlated Errors in the Random Model.....	<i>Bruce M. Hill</i>
Sequential Analysis of Variance under Random and Mixed Models.....	<i>B. K. Ghosh</i>
Migration of Employed Persons.....	<i>Ann R. Miller</i>
Method of Constructing of Attrition Life Tables for Single Population.....	<i>Joginder Kumar</i>
Confidence Limits for the Reliability of Series Systems.....	<i>Robert J. Buehler and A. H. El Mawaziny</i>
A Note on Multivariate Distributions with Specified Marginals.....	<i>Barry C. Arnold</i>
Computation and Structure of Optimal Reset Policies.....	<i>Ellis L. Johnson</i>
Small Sample Probability Limits for the Range Chart.....	<i>Frederick S. Hillier</i>
A Theorem on Least Squares in Multivariate Linear Regressions.....	<i>C. G. Khatri</i>

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

## OFFICERS

*President:*

Theodore E. Harris, Department of Mathematics, University of Southern California, Los Angeles, California 90007

*President-Elect:*

Herman Chernoff, Department of Statistics, Stanford University, Stanford, California 94305

*Executive Secretary:*

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27515

*Program Secretary:*

Joan Raup Rosenblatt, National Bureau of Standards, Washington, D.C. 20234

*Treasurer:*

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

*Editor:*

Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are \$20.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special student rates of \$10.00 per year are available to students residing in the U.S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

## Contents (Continued)

Asymptotically optimal tests for multivariate normal distributions	DAVID G. HERR 1829
On optimal asymptotic tests of composite statistical hypotheses	JAMES B. BARTOO AND PREM S. PURI 1845
On certain inequalities for normal distributions and their applications to simultaneous confidence bounds.....	C. G. KHATRI 1853
Inadmissibility of the usual confidence sets for the mean of a multivariate normal population.....	V. M. JOSHI 1868
Remark on the linearized maximum likelihood estimate.....	L. K. CHAN 1876
On Horovitz and Thompson's $T_1$ class of linear estimation	S. G. PRABHU AJGAONKAR 1882
Reduced group divisible paired comparison designs.....	J. A. JOHN 1887
Characterizations of normality by constant regression of linear statistics on another linear statistic.....	THEOPHILOS CACOULLOS 1894
An asymptotic expansion for posterior distributions.....	R. A. JOHNSON 1899
<b>Notes</b>	
A note on Bayes estimates.....	PETER J. BICKEL AND DAVID BLACKWELL 1907
A first passage problem for the Weiner process.....	L. A. SHEPP 1912
On a stopping rule and the central limit theorem	RICHARD GUNDY AND DAVID SIEGMUND 1915
A perfect measurable space that is not a Lusin space	R. B. DARST AND R. E. ZINK 1918
Distribution of a M. Kac statistics.....	J. L. ALLEN AND J. A. BEEKMAN 1919
A characterization of normality.....	M. V. TAMHANKAR 1924
Correction Note.....	1928
<b>Book Review</b>	
N. WIENER, A. SIEGEL, B. RANKIN AND W. T. MARTIN: <i>Differential Space, Quantum Systems, and Prediction</i> .....	H. SALEHI 1929
Abstracts of Papers.....	1932
News and Notices.....	1941
Publications Received.....	1947

## MEETINGS OF THE INSTITUTE

---

**CENTRAL REGIONAL** - East Lansing, Michigan, March 20-22, 1968  
**EASTERN REGIONAL** - Blacksburg, Virginia, April 8-10, 1968  
**ANNUAL MEETING** - Madison, Wisconsin, August 28-30, 1968

---

**Abstracts** should be submitted in duplicate to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
