

THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938
EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Convergence of quadratic forms in independent random variables DALE E. VARBERG	567
A note on quantiles in large samples.....R. R. BAHADUR	577
Bounded length confidence intervals for the p -point of a distribution function, II R. H. FARRELL	581
Bounded length confidence intervals for the p -point of a distribution function, III R. H. FARRELL	586
On some nonparametric estimates for shift in the Behrens-Fisher situation P. V. RAMACHANDRAMURTY	593
Multivariate nonparametric several-sample tests.....RYOJI TAMURA	611
Asymptotically minimax distribution-free procedures.....KJELL DOKSUM	619
Admissibility of confidence intervals.....V. M. JOSHI	629
Bounds on the distribution functions of the Behrens-Fisher statistic M. RAY MICKEY AND MORTON B. BROWN	639
Fiducial theory and invariant estimation.....R. B. HORA AND R. J. BUEHLER	643
Polychotomy sampling.....SAKTI P. GHOSH	657
Some non-orthogonal partitions of 4×4 , 5×5 , and 6×6 latin squares G. H. FREEMAN	666
On a theorem of Cramér and Leadbetter.....N. DONALD YLVISAKER	682
On two equivalence relations between measures.....DAVID A. FREEDMAN	686
On the semimartingale convergence theorem.....S. JOHANSEN AND J. KARUSH	690
A theorem on the Galton-Watson process.....BERNT P. STIGUM	695
Some renewal theorems with application to a first passage problem.....C. C. HEYDE	699
Convergence rates for the law of large numbers for linear combinations of Markov processes.....L. H. KOOPMANS	711

(Continued on back cover)

Vol. 37, No. 3— June 1966

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U. S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$15 per volume, \$4.00 per issue; issues from 1957 through 1964 are \$20.00 per volume, \$5.25 per issue; from 1965 onward, \$30 per volume, \$5.25 per issue. Complete sets (Volumes I-XXVII) are \$250. If additional volumes are ordered at the same time the set is ordered, the price is \$15 for each additional volume. An index to Volumes I-XXXI is available for \$10.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803. **Abstracts and corrected galley proofs** should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ab}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U. S. A.

Second-class postage paid at Baltimore, Maryland 21202
