
STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields; for example, reliability, quality control, experiments, surveys, queueing, congestion and forecasting. Approximately 500 journals are scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

Approximately 400 words long, these literary informative abstracts are written in English; the language of the original paper is indicated. The heading not only gives the name and address of the author together with the journal in which the paper was published, but a note is given of references, tables, etc.

The revised classification scheme consists of three parts. The pages of the journal are colour-tinted in groups to provide visual indication of twelve main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special table in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. When papers are concerned with new statistical tables the relevant classification for the Greenwood/Hartley Guide (1962) is indicated in a special section.

The abstracts are numbered serially, the volume number being inserted as a prefix. The journal is published four times a year and contains approximately 1,250 abstracts. Relevant indexes are published in each issue and combined in a yearly supplement.

<i>Annual Subscription</i>	£7.10s. (U. S. A. \$24.00)
<i>Single Number</i>	£2.5s. (U. S. A. \$4.00)
<i>Loose Leaf Binders for Single Abstract Sheets</i>	16s.3d including postage and packing.

JOURNAL OF THE ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in three series, SERIES A (GENERAL), four issues a year, annual subscription, post free, £5 4s. U. S. \$15: price each part 30s: SERIES B (METHODOLOGICAL), three issues a year, annual subscription post free, £4 2s. U. S. \$12; price each part 35s: SERIES C (APPLIED STATISTICS), three issues a year, annual subscription 30s.; U. S. \$5, price each part 15s.

Reviews; Current Notes; Library Accessions

Contents of SERIES B (METHODOLOGICAL), Vol. 27, PARTS 2 & 3, 1965

Bayesian interpretation of standard inference statements (with Discussion) JOHN W. PRATT
 Evolutionary spectral and non-stationary processes (with Discussion) M. B. PRIESTLEY
 On simple rules for the compound decision problem ESTER SAMUEL
 Likelihood-ratio and confidence-region tests J. AITCHISON
 Analysis of factorial experiments by estimating monotone transformations of the data J. B. KRUSKAL
 Analytical surveys with cluster sampling J. SEDRANSK
 Bayesian estimation of parameters of a multivariate normal distribution I. G. EVANS
 Finite stopping time and finite expected stopping time I. R. SAVAGE AND L. J. SAVAGE
 Derivation of a class of frequency distribution via Bayes's theorem CARL-ERIC SÄRNDAL
 Plane truncation in normal populations G. M. TALLIS
 Moments of a serial correlation coefficient L. R. SHENTON AND W. L. JOHNSON
 Application of stochastic approximation to process control J. P. COMER, JR.
 On the estimation of the intensity function of a stationary point process D. R. COX
 The distribution of incubation periods in a birth-death process T. WILLIAMS
 On the busy period of a facility which serves customers of several types P. D. WELCH
 Some general results in sequential design (with Discussion) P. WHITTLE
 Spacings (with Discussion) R. PYKE
 Mixture designs for three factors N. R. DRAPER AND W. LAWRENCE
 The numerical solution of some non-linear equations, useful in the design of experiments E. L. ALBASINY
 Mixture designs for four factors N. R. DRAPER AND W. LAWRENCE
 Transformations and sufficiency D. A. SPROTT
 Additional results concerning estimable functions and generalized inverse matrices S. R. SEARLE
 On the waiting-time distribution for queues in series R. M. LOYNES
 A two-dimensional Poisson growth process R. W. MORGAN AND D. J. A. WELCH
 Certain properties of Gaussian processes and their first passage times C. B. MEHR AND J. A. MCFADDEN
 Recursive relations for predictors of non-stationary processes P. WHITTLE

The Royal Statistical Society, 21, Bentinck Street, London, W. 1

SANKHYĀ

The Indian Journal of Statistics

CONTENTS OF SERIES B, VOL. 27, PARTS 1 & 2, 1965

Population Perspective of Thailand Ajit Das Gupta, Samruay Chotechanapibal, Thip Chalothorn and Wiwit Siripak

On the effect of differentials in consumer price index on measures of inequality N. S. Iyengar and N. Bhattacharya

A consistency model of India's Fourth Plan Alan S. Manne and Ashok Rudra

The consist routine: A computer programme for solving simultaneous equations V. C. Sabherwal

On the use of motor vehicles in crop-cutting survey and a sampling of the road-side plots only J. M. Sengupta

Comparative study of serum proteins—total albumin and globulin by Colorimetric Biuret and Agar Gel Electrophoretic methods S. Chaudhuri and A. Chakravarty

Statistics for economic development P. C. Mahalanobis

Total length of life and its relation with the parameters of stable population S. Mitra

Model fertility tables S. Mitra

Self-weighting design at tabulation stage M. N. Murthy and V. K. Sethi

The subscription price per volume for each of the series separately is: Outside India: \$20.00; £7. In India: Rs. 30.00. The subscription price per volume for both the series taken together is: Outside India: \$30.00; £10. In India: Rs. 50.00.

Orders for the Journal for distribution outside India are to be sent to:

Pergamon Press Ltd.,
Headington Hill Hall,
Oxford, England

or
Pergamon Press Inc.,
122 East 55th Street,
New York 22, USA

Orders for the Journal for distribution within India are to be sent to:

Statistical Publishing Society,
204/1 Barrackpore Trunk Road,
Calcutta-35, India

TECHNOMETRICS

A Journal of Statistics for the Physical, Chemical and Engineering Sciences

CONTENTS

TECHNOMETRICS, Vol. 8, No. 1, FEBRUARY 1966

Editorial Fred C. Leone, Editor

Linear Estimates of Parameters in the Extreme Value Distribution Frank Downton

A Simple System of Evolutionary Operation Subject to Empirical Feedback George E. P. Box

Selection of Variables for Fitting Equations to Data J. W. Gorman and R. J. Toman

Reliability Growth During a Development Testing Program Richard E. Barlow and Ernest M. Scheuer

An Investigation of the Burn-In Problem M. J. Lawrence

The Present Status of Automatic Production and Control Devices and Expected Future Developments Theodore J. Williams

Sampling Rates and Appearance of Stationary Gaussian Processes Leo Joseph Tick and Paul Shaman

Development of Randomized Load Sequences with Transition Probabilities Based on a Markov Process R. A. Heller and Masanobu Shinozuka

An Approximation to Two-Sided Tolerance Limits for Normal Populations Donald A. Gardiner and Norma C. Hull

Pricing Policies Contingent on Observed Product Quality Eugene P. Durbin

An Exact Asymptotically Efficient Confidence Bound for Reliability in the Case of the Weibull Distribution M. V. Johns, Jr. and G. J. Lieberman

NOTES:

The Inverse Yates Algorithm J. S. Hunter

A Note on Augmented Designs George E. P. Box

Combining Intra and Inter Block Analysis of Group Divisible Designs C. H. Kapadia

QUERIES:

Small Trimmed Samples Answered by I. M. Chakravarti

BOOK REVIEWS

ERRATA

The purpose of TECHNOMETRICS is to contribute to the development and use of statistical methods in the physical, chemical and engineering sciences. This objective places a high premium on succinct communication among the physical scientist, engineer, statistician and mathematician. The journal will accept for publication papers describing new statistical techniques expected to be useful in these sciences, papers illustrating the application of known statistical methods to new or novel environments, expository or tutorial papers on particular statistical methods, and papers dealing with the philosophy and problems of applying statistical methods to research, development, design and performance. Brief descriptions of problems requiring solution and short technical notes will also be accepted for publication.

For further information please contact TECHNOMETRICS Post Office Box 587 Benjamin Franklin Station Washington 4, D. C.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

Herbert E. Robbins, Department of Mathematical Statistics, Columbia University, New York, N.Y. 10027 (February 1, 1966—June 10, 1966: Department of Statistics, Purdue University, Lafayette, Indiana 47907)

President-Elect:

Theodore E. Harris, Department of Mathematics, University of Southern California, Los Angeles, California 90007

Executive Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27515

Program Secretary:

Joan Raup Rosenblatt, National Bureau of Standards, Washington, D.C. 20234

Treasurer:

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

Editor:

D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are \$20.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special student rates are available at \$10.00 per year. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

Equivalence and singularity for Friedman urns	DAVID A. FREEDMAN	268
On absolutely continuous components and renewal theory	CHARLES STONE	271
Notes		
A note on memoryless rules for controlling sequential control processes	CYRUS DERMAN AND RALPH E. STRAUCH	276
A note on minimum discrimination information	S. KULLBACK AND M. A. KHAIRAT	279
On mixtures of distributions	W. MOLENAAR AND W. R. VAN ZWET	281
Recursive generation of the distribution of the Mann-Whitney U-statistics under Lehmann alternatives	ROGER A. SHORACK	284
A note on "a k -sample model in order statistics" by W. J. Conover	H. A. DAVID	287
Another characteristic property of the Cauchy distribution	M. V. MENON	289
On idempotent matrices	R. M. LOYNES	295
Correction Note		297
Book Reviews		
RICHARD BELLMAN (editor): <i>Stochastic Processes in Mathematical Physics and Engineering</i>	H. ROSENBLATT	298
KENNETH S. MILLER: <i>Multidimensional Gaussian Distributions</i> ..	HAROLD RUBEN	301
FREDERICK MOSTELLER AND DAVID L. WALLACE: <i>Inference and Disputed Author- ship: The Federalist</i>	G. S. WATSON	308
Abstracts of Papers		313
News and Notices		316
Publications Received		318

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

- CENTRAL REGIONAL - Lafayette, Indiana - March 23-25, 1966.
EASTERN REGIONAL - Upton, Long Island, N.Y. - April 27-29, 1966.
WESTERN REGIONAL - Los Angeles, California - August 15-17, 1966.
ANNUAL MEETING - New Brunswick, New Jersey - August 30-September 2, 1966.
EUROPEAN REGIONAL - London, England - September 5-10, 1966.

Abstracts should be submitted in duplicate to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
