

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1939-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
On a theorem of Hoel and Levine on extrapolation J. KIEFER AND J. WOLFOWITZ	1627
The moments of the number of crossings of a level by a stationary normal process HARALD CRAMÉR AND M. R. LEADBETTER	1656
The ergodicity of series queues with general priorities BRUCE MCK. JOHNSON	1664
Markovian sequential replacement processes HOWARD M. TAYLOR, III	1677
A dynamic stochastic approximation method VÁCLAV DUPAČ	1695
Peakedness of distributions of convex combinations FRANK PROSCHAN	1703
Admissibility and Bayes estimation in sampling finite populations I V. P. GODAMBE AND V. M. JOSHI	1707
Admissibility and Bayes estimation in sampling finite populations II . . V. M. JOSHI	1723
Admissibility and Bayes estimation in sampling finite populations III . . V. M. JOSHI	1730
Rates of convergence in the compound decision problem for two completely specified distributions J. F. HANNAN AND J. R. VAN RYZIN	1743
A robust version of the probability ratio test PETER J. HUBER	1753
Alternative efficiencies for signed rank tests JEROME KLOTZ	1759
Small sample power for the one sample Wilcoxon test for non-normal shift alternatives HARVEY J. ARNOLD	1767
Properties of the median and other statistics of logistic variates MICHAEL E. TARTER AND VIRGINIA CLARK	1779
Multivariate-normal classification with covariance known BOB E. ELLISON	1787
A class of tests with monotone power functions for two problems in multivariate statistical analysis GOVIND S. MUDHOLKAR	1794
Some tests for the intraclass correlation model M. S. SRIVASTAVA	1802
On a class of partially balanced incomplete block designs S. S. SHRIKHANDE	1807
The relationship algebra and the analysis of variance of a partially balanced incom- plete block design JUNJIRO OGAWA AND GORO ISHII	1815
On Hotelling's weighing designs under autocorrelation of errors . . . K. S. BANERJEE	1829
Asymptotic distributions for the coupon collector's problem LEONARD E. BAUM AND PATRICK BILLINGSLEY	1835
Convergence rates for the law of large numbers for the linear combinations of ex- changeable and *-mixing stochastic processes D. L. HANSON AND L. H. KOOPMANS	1840
A uniform ergodic theorem GEORGE BURKE	1853
Notes	
A random set process in the plane with a Markovian property . . . PAUL SWITZER	1859
On an operator limit theorem of Rota NORTON STARR	1864
A note on the sequential t-test JEROME SACKS	1867
Hypergeometric functions in sequential analysis ADNAN F. IFRAM	1870

(Continued on back cover)

Vol. 36, No. 6—December 1965

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U. S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$15 per volume, \$4.00 per issue; issues from 1957 through 1964 are \$20.00 per volume, \$5.25 per issue; from 1965 onward, \$30 per volume, \$5.25 per issue. Complete sets (Volumes I-XXVII) are \$250. If additional volumes are ordered at the same time the set is ordered, the price is \$15 for each additional volume. An index to Volumes I-XXXI is available for \$10.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803. **Abstracts and corrected galley proofs** should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of **33** 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ([']), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ab}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
