

LINEAR CORRELATION AND STANDARD DEVIATION

$$\sigma_x = \sqrt{\frac{\sum(x^2)}{n} - \left(\frac{\sum x}{n}\right)^2}$$

$$\sigma_y = \sqrt{\frac{\sum(y^2)}{n} - \left(\frac{\sum y}{n}\right)^2}$$

$$r = \frac{n\sum xy - \sum x \sum y}{\sqrt{[n\sum(x)^2 - (\sum x)^2][n\sum(y)^2 - (\sum y)^2]}}$$

Get all three answers only
43 seconds after raw data entry
with a WYLE Scientific.

The Wyle Scientific is ideally suited to the quick, easy solution of a wide variety of statistical problems. It will produce answers 10 to 100 times faster than any calculator, and, in many cases can decrease the need for computer time.

Major features of the Wyle Scientific are: six 24 digit registers, and the capability of automatic programming. No computer training, "language" knowledge or special equipment is needed. The Wyle Scientific is easily programmed by pre-scored IBM cards specially printed to duplicate the keyboard. You can program it yourself with a ballpoint pen. Pre-programmed Wyle cards are also available.

Typical, easily programmed computations include Statistical Summation, Variance, Probable Error, Linear Least Squares Fit, and Chi Square. Analytical programs which are not convenient computer applications can now be run with ease on the Wyle Scientific.

The Wyle Scientific, complete with automatic input reader, costs less than \$5,000. This cost amortizes over a three-year period at less than \$1 per working hour.

STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields; for example, reliability, quality control, experiments, surveys, queueing, congestion and forecasting. Approximately 500 journals are scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

Approximately 400 words long, these literary informative abstracts are written in English; the language of the original paper is indicated. The heading not only gives the name and address of the author together with the journal in which the paper was published, but a note is given of references, tables, etc.

The revised classification scheme consists of three parts. The pages of the journal are colour-tinted in groups to provide visual indication of twelve main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special table in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. When papers are concerned with new statistical tables the relevant classification for the Greenwood/Hartley Guide (1962) is indicated in a special section.

The abstracts are numbered serially, the volume number being inserted as a prefix. The journal is published four times a year and contains approximately 1,250 abstracts. Relevant indexes are published in each issue and combined in a yearly supplement.

<i>Annual Subscription</i>	£7.10s. (U. S. A. \$24.00)
<i>Single Number</i>	£2.5s. (U. S. A. \$4.00)
<i>Loose Leaf Binders for Single Abstract Sheets</i>	16s.3d including postage and packing.

SANKHYĀ

The Indian Journal of Statistics

CONTENTS OF SERIES A, VOL. 27, PART 1, 1965

Comparing Mahalanobis distances I: Comparing distances between k known normal populations and another unknown	Theophilos Cacoullos
Comparing Mahalanobis distances II: Bayes procedures when the mean vectors are unknown	Theophilos Cacoullos
The place of the design of experiments in the logic of scientific inference	Ronald Aylmer Fisher
Measure, quality and optimum scale	Nicholas Georgescu-Roegen
Multiple comparison tests in multi-response experiments	P. R. Krishnaiah
Some asymptotic expansions for the distribution of the maximum likelihood estimate	Yu. V. Linnik and N. M. Mitrofanova
The mixed Poisson process	J. A. McFadden
The distributions of some statistics depending on the deviations between empirical and theoretical distribution functions	Lajos Takács

Notes

Note on the use of prior information in forecasting with a linear regression model	N. C. Kakwani
Note on the use of prior information in statistical estimation of economic relations	A. L. Nagar and N. C. Kakwani

The subscription price per volume for each of the series separately is: Outside India: \$20.00; £7. In India: Rs. 30.00. The subscription price per volume for both the series taken together is: Outside India: \$30.00; £10. In India: Rs. 50.00.

Orders for the Journal for distribution outside India are to be sent to:

Pergamon Press Ltd.,
Headington Hill Hall,
Oxford, England

or

Pergamon Press Inc.,
122 East 55th Street,
New York 22, USA

Orders for the Journal for distribution within India are to be sent to:

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

Herbert E. Robbins, Department of Mathematical Statistics, Columbia University, New York, N. Y. 10027 (September 20, 1965–January 20, 1966: Department of Statistics, University of Minnesota, Minneapolis, Minnesota 55455)

President-Elect:

Theodore E. Harris, Mathematics Department, The RAND Corporation, Santa Monica, California 90406

Executive Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27515

Program Secretary:

Joan Raup Rosenblatt, National Bureau of Standards, Washington, D.C. 20234

Treasurer:

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

Editor:

D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$20.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special student rates are available at \$10.00 per year. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

On the convergence of ordinary integrals to stochastic integrals	EUGENE WONG AND MOSHE ZAKAI	1560
Asymptotic properties of an age dependent branching process	H. J. WEINER	1565
An integral equation in age dependent branching processes	H. J. WEINER	1569
A note on queuing systems with Erlangian service time distributions	D. N. SHANBHAG	1574
An optimal property of principal components	J. N. DARROCH	1579
Correction Notes		1583
Book Review		
EMANUEL PARZEN: <i>Stochastic Processes</i>	WALTER L. SMITH	1585
Abstracts of Papers		1592
News and Notices		1616
Report of the Berkeley, California Meeting		1622
Publications Received		1624

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

- CENTRAL REGIONAL - Lafayette, Indiana - March 23-25, 1966.
EASTERN REGIONAL - Upton, Long Island, N.Y. - April 27-29, 1966.
WESTERN REGIONAL - Los Angeles, California - mid-August, 1966.
ANNUAL MEETING - New Brunswick, New Jersey - late August, 1966.

Abstracts should be submitted in duplicate to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
