

# THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1939-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE  
OF MATHEMATICAL STATISTICS

## Contents

	PAGE
Sufficiency and Approximate Sufficiency . . . . .	L. LECAM 1419
Sufficient Statistics in the Case of Independent Random Variables . . . . .	L. BROWN 1456
Minimax Character of the $R^2$ -Test in the Simplest Case . . . . .	N. GIRI AND J. KIEFER 1475
Asymptotic Theory of Rejective Sampling With Varying Probabilities From a Finite Population . . . . .	JAROSLAV HÁJEK 1491
On the Risk of Some Strategies for Outlying Observations . . . . .	FRIEDRICH GEBHARDT 1524
On a Measure of Test Efficiency Proposed by R. R. Bahadur . . . . .	LEON J. GLESER 1537
On Fisher's Bound for Asymptotic Variances . . . . .	R. R. BAHADUR 1545
Optimal Spacing and Weighting in Polynomial Prediction P. G. HOEL AND A. LEVINE	1553
Tolerance Limits for the Class of Distributions With Increasing Hazard Rates D. L. HANSON AND L. H. KOOPMANS	1561
An Asymptotically Optimal Fixed Sample Size Procedure for Comparing Several Experimental Categories With a Control . . . . .	CHARLES DEWITT ROBERTS 1571
Small Sample Power of the Bivariate Sign Tests of Blumen and Hodges JEROME KLOTZ	1576
Variations of the Non-Central $t$ and Beta Distributions . . . . .	JOHN H. PARK, JR. 1583
A Trustworthy Jackknife . . . . .	RUPERT G. MILLER, JR. 1594
Convergence of the Losses of Certain Decision Rules for the Sequential Compound Decision Problem . . . . .	ESTER SAMUEL 1606
The Bayesian Analysis of Contingency Tables . . . . .	D. V. LINDLEY 1622
Decision Procedures for Finite Decision Problems Under Complete Ignorance F. V. ATKINSON, J. D. CHURCH AND B. HARRIS	1644
Bayes Solution of Sequential Decision Problem for Markov Dependent Observations B. R. BEAT	1656
On the Equivalence of Polykays of the Second Degree and $\Sigma$ 's . . . . .	EUGENE DAYHOFF 1663
On Bivariate Random Variables Where the Quotient of Their Coordinates Follows Some Known Distribution . . . . .	IGNACY KOTLARSKI 1673
Orthant Probabilities for the Quadrivariate Normal Distribution . . . . .	I. G. ABRAHAMSON 1685
On the Moments of Elementary Symmetric Functions of the Roots of Two Matrices K. C. SREEDHARAN PILLAI	1704
On Random Sampling From a Stochastic Process J. R. BLUM AND JUDAH ROSENBLATT	1713
Extremal Processes . . . . .	MEYER DWASS 1718
On Extreme Order Statistics . . . . .	JOHN LAMPERTI 1726
On Asymptotic Moments of Extreme Statistics . . . . .	JAMES R. MCCORD 1738
Limit Theorems for Markov Renewal Processes. RONALD PYKE AND RONALD SCHAUFLELE	1746
On the Multivariate Analysis of Weakly Stationary Stochastic Processes L. H. KOOPMANS	1765

(Continued on back cover)

Vol. 35, No. 4 — December, 1964

# THE ANNALS OF MATHEMATICAL STATISTICS

**Subscription Rates.** Current issues are \$20 per volume (four issues of one calendar year) in the U.S. and Canada, \$15 per volume elsewhere. Single issues are \$5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$12 per volume, \$3.50 per issue; issues from 1957 on are \$20 per volume, \$5.25 per issue; for complete sets, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volumes I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

**Papers** to be submitted for publication should be sent to the Editor, D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803. **Abstracts** and **corrected galley proofs** should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

**Preparation of manuscripts.** Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the new style.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g.,  $\log \bar{x}$ ) and underlined letters (e.g.,  $\bar{x}$ ) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol **exp**. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the

solidus; thus  $(a + b)/(c + d)$  rather than  $\frac{a + b}{c + d}$ , and  $ab/cd$  rather than  $\frac{ab}{cd}$ .

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

---

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

---

COMPOSED AND PRINTED AT THE  
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
