**SELECTED TRANSLATIONS IN
MATHEMATICAL STATISTICS
AND PROBABILITY**

Volume III

This volume contains 17 papers. Published for the Institute of
Mathematical Statistics by the American Mathematical Society

25% discount to members of IMS and AMS

356 pages

\$5.10

*Orders for copies of Volume III and standing orders
for this series should be sent to the*

AMERICAN MATHEMATICAL SOCIETY

190 Hope Street, Providence 6, R.I.

*Studies in
Mathematical Psychology*

EDITED BY R. C. ATKINSON

Fifteen papers present the most recent developments in the analysis of mathematical models and their application to psychological data. Emphasis has been placed upon theoretical and theoretically oriented experimental studies. Contributors: Gordon H. Bower, C. J. Burke, Robert R. Bush, M. Cole, E. J. Crothers, W. K. Estes, M. P. Friedman, L. Keller, R. A. Kinchla, Willard D. Larkin, R. Duncan Luce, R. B. Millward, Donald A. Norman, M. Frank Norman, Frank Restle, Richard M. Rose, Henry Rouanet, Elizabeth F. Shipley, John Theios, and Thomas R. Trabasso. STANFORD MATHEMATICAL STUDIES IN THE SOCIAL SCIENCES, IX. \$13.50

STANFORD UNIVERSITY PRESS

INTERNATIONAL JOURNAL OF ABSTRACTS STATISTICAL THEORY AND METHOD

A Journal of the International Statistical Institute

The aim of this journal of abstracts is to give **complete coverage of published papers in the field of statistical theory** (including associated aspects of probability and other mathematical methods) and **new published contributions to statistical method.**

All contributions in the following five journals—being wholly devoted to this field—are abstracted: *Annals of Mathematical Statistics*; *Biometrika*; *Journal, Royal Statistical Society (Series B)*; *Bulletin of Mathematical Statistics*; *Annals, Institute of Statistical Mathematics*; and a further group of six journals are abstracted on a **virtually complete** basis as follows: *Biometrics*; *Metrika*; *Metron*; *Review, International Statistical Institute*; *Technometrics*; *Sankhya*. There are about 250 other journals partly devoted to statistical theory and method from which the appropriate papers are abstracted.

The abstracts are about 400 words long—the recommendation of UNESCO for the 'long' abstract service: they are in the English language although the original language of the paper is noted on the abstract together with the name of the abstractor. In addition the address of the author(s) is given in detail to facilitate contact in order to obtain further detail or request an off-print. The journal is published quarterly and contains approximately 750 abstracts per year.

A scheme of classification has been developed for the abstracts that is flexible and facilitates the transfer of code numbers to punched cards. A unique aspect of this journal is that the pages are colour-tinted according to the main sections of classification. This method of colour-coding the pages provides a distinctive and powerful visual aid in the identification of abstracts in whatever manner the journal is filed for reference.

Annual Subscription £5 (U.S.A. and Canada \$16.00)
Single Number 30s. (U.S.A. and Canada \$4.50)

JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

Volume 58

September 1963

Number 303

Interval Estimation of Non-Linear Parametric Functions.....	<i>Max Halperin and Nathan Mantel</i>
Probability and Criminalistics.....	<i>Elmer B. Mode</i>
On the Sufficiency and Likelihood Principles.....	<i>D. A. S. Fraser</i>
Consumer Durable Goods Expenditures, with Major Emphasis on the Role of Assets, Credit and Intentions.....	<i>Janet A. Fisher</i>
On Estimating Scale and Location Parameters.....	<i>Lionel Weiss</i>
Multivariate Analysis of Variance for a Special Covariance Case.....	<i>Seymour Geisser</i>
Some Inferences about Gamma Parameters with an Application to a Reliability Problem.....	<i>M. M. Lentner and Robert J. Buehler</i>
The Number and Width of Classes in the Chi-Square Test.....	<i>M. A. Hamdan</i>
Chi-Square Tests with One Degree of Freedom; Extensions of the Mantel-Haenszel Procedure.....	<i>Nathan Mantel</i>
Partitioning of a Patient Population with Respect to Different Mortality Risks.....	<i>Sidney J. Cutler and Lillian M. Axtell</i>
Early Decision in the Wilcoxon Two-Sample Test.....	<i>David W. Alling</i>
A Quick Test for Serial Correlation Suitable for use with Non-Stationary Time Series.....	<i>C. W. J. Granger</i>
Probability Models for the Variation in the Number of Births per Couple.....	<i>S. N. Singh</i>
Some Contributions to Average Rank Correlation Methods and to the Distribution of the Average Rank Correlation Coefficient.....	<i>Wilson L. Taylor and Ching Fong</i>
Product Diversification and the Cost of Living.....	<i>Henry Anderson</i>
Some Recent Advances in Sampling Theory.....	<i>M. N. Murthy</i>
Stepwise Multivariate Linear Regression.....	<i>D. G. Kabe</i>
A Demographic Model for Estimating Age-Order Specific Fertility Rates.....	<i>D. Peter Mazur</i>
Initial Stock and Consumer Investment in Automobiles.....	<i>David S. Huang</i>
The Development of Numerical Credit Evaluation Systems.....	<i>James H. Myers and James W. Forgy</i>

JOURNAL OF THE ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in two series. SERIES A (GENERAL), four issues a year, annual subscription £5 4s. post free, U.S. \$15: price each part 30s: SERIES B (METHODOLOGICAL), two issues a year, annual subscription £4 s2. post free, U.S. \$12: price each part 50s.

Series B (Methodological), Vol. 25, Part 1, 1963

- Sequential estimation of quantal response curves (with Discussion) G. B. WETHERILL
 Control charts and the minimization of costs (with discussion) J. A. BATHER
 Tests of goodness of fit F. J. ANSCOMBE
 A comparison of the direct and fiducial arguments in the estimation of a parameter E. J. WILLIAMS
 On direct probabilities A. P. DEMPSTER
 Some logical aspects of the fiducial argument G. A. BARNARD
 On sufficiency and the exponential family D. A. S. FRASER
 The logic of least squares G. A. BARNARD
 Fiducial limits for a variance component M. J. R. HEALY
 The epochs of emptiness of a semi-infinite discrete reservoir E. H. LLOYD
 The distribution of the time emptiness of a discrete dam under steady demand J. L. MOTT
 Models for a bacterial growth process with removals J. GANI
 A multi-stage renewal process D. J. BARTHOLOMEW
 A contribution to counter theory D. L. BENTLEY
 On Plackett's test for contingency table interactions L. A. GOODMAN
 On the normal stationary process—areas outside given levels M. R. LEADBETTER
 A note on the asymptotic efficiency of an asymptotically normal estimator sequence A. M. WALKER
 On combining estimates of a ratio of means B. M. BENNETT
 Estimation of the parameters in short Markov sequences A. W. F. EDWARDS
 Some remarks on a method of maximum likelihood estimation proposed by Richards B. K. KALE
 Power of Tukey's test for non-additivity M. N. GHOSH AND D. SHARMA
 Maximum likelihood in three-way contingency tables M. W. BIRCH

The Royal Statistical Society, 21, Bentinck Street, London, W. 1

TECHNOMETRICS

*A Journal of Statistics
for the Physical, Chemical and Engineering Sciences*

CONTENTS

TECHNOMETRICS, Vol. 5, No. 3, August 1963

- Non-Central t : Rapid Data Analysis *Max Halperin*
 Controlling the Standard Deviation by Cusums and Warning Lines *E. S. Page*
 A Quick Method for Choosing a Transformation *James L. Dolby*
 Progressively Censored Samples in Life Testing *A. Clifford Cohen, Jr.*
 Applied Multiplex Sampling *David H. Evans*
 The Sampling Distribution of an Estimate Arising in Life Testing *D. J. Bartholomew*
 Theoretical Explanation of Observed Decrease Failure Rate *Frank Proschian*
 Effects of Slow-Downs and Failure on Stochastic Service Systems *M. M. Eisen*
 NOTES
 On the Renewal Function for the Weibull Distribution *W. L. Smith and M. R. Leadbetter*
 A Note on Watson's Paper *M. S. Patel*
 A Note on Contingency Tables Involving Zero Frequencies and the 2I Test *H. H. Ku*
 One-Sided Confidence Intervals for the Quality Indices of a Complex Item *Helen Chmura Kraemer*
 Dimensional Chains Involving Rectangular and Normal Error-Distributions
 *G. P. Bhattacharjee, S. N. N. Pandit and R. Mohan*

Book Reviews
 Books Received, Errata, Notices

Technometrics is published quarterly in February, May, August, and November. To members of the American Statistical Association and the American Society for Quality Control the rate is \$6.00. The annual non-member subscription rate is \$8.00. Checks should be made payable to *Technometrics* and addressed to *Technometrics*, Post Office Box 587, Benjamin Franklin Station, Washington 6, D. C.

ECONOMETRICA

Contents of Vol. 31, No. 1-2 - January-April, 1963

A. A. WALTERS: Production and Cost Functions: An Econometric Survey	1
FRANKLIN M. FISHER: Decomposability, Near Decomposability, and Balanced Price Change under Constant Returns to Scale	67

TRABAJOS DE ESTADISTICA

Review published by the "Instituto de Investigaciones Estadísticas" of the "Consejo Superior de Investigaciones Científicas", Madrid-6, Spain.

VOL. XIII

CUADERNO III

CONTENTS

J. TALACKO.—Prof. Ronald A. Fisher: Su vida, trabajos y publicaciones.	
S. RÍOS.—Some inventory problems for many items with stochastic dependent demand.	
N. L. JOHNSON.—Some notes on the investigation of heterogeneity in interactions.	
NOTAS.	
S.R.—19. Propiedades de los estimadores.	
S.R.—20. Métodos para la formación de estimadores.	
F. AZORIN POCH.—Notas sobre taxonomía y estadística.	
S. RÍOS.—La Estadística como técnica de investigación en las ciencias experimentales y de observación.	
S. RÍOS.—Futuro de la Escuela de Estadística.	
CRÓNICA.	BIBLIOGRAFIA.

For everything in connection with works, exchanges and subscription write to Professor Sixto Ríos, Instituto de Investigaciones Estadísticas, Serrano 123, Madrid-6, Spain.

The Review is composed of three fascicles published three times a year (about 350 pp), and its annual price is 100 pesetas for Spain and 240 for all other countries.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

T. W. Anderson, Department of Mathematical Statistics, Columbia University, New York 27, New York

President-Elect:

Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle 5, Washington

Executive Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina

Program Secretary:

Dorothy Gilford, Office of Naval Research, Washington 25, D.C.

Treasurer:

Gerald Lieberman, Institute of Mathematical Statistics, Sequoia Hall, Stanford University, Stanford, California

Editor:

J. L. Hodges, Jr., Department of Statistics, University of California, Berkeley 4, California

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$15.00 per year for residents of the United States or Canada and \$7.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

On the Integrability, Continuity and Differentiability of a Family of Functions Introduced by L. Takács.....	A. M. HASOGER	1045
Minimum Variance Unbiased Estimation and Certain Problems of Additive Number Theory.....	G. P. PATIL	1050
Right Angular Designs.....	SURESH K. THARTHARE	1057
On Estimates for Fractions of a Complete Factorial Experiment as Orthogonal Linear Combinations of the Observations.....	K. S. BANERJEE AND W. T. FEDERER	1068
Asymptotic Solutions of the Sequential Compound Decision Problem..	ESTER SAMUEL	1079
Notes		
Note on a Sequential Classification Problem.....	ESTER SAMUEL	1095
Note on a Conditional Property of Student's t	R. J. BUEHLER AND A. P. FEDDERSEN	1098
On a Modification of Certain Rank Tests.....	RYOJI TAMURA	1101
Note on Extreme Values, Competing Risks and Semi-Markov Processes	SIMEON M. BERMAN	1104
Note on the Berry-Esseen Theorem.....	MELVIN L. KATZ	1107
Bounds for the Frequency of Misleading Bayes Inferences.....	D. KERRIDGE	1109
Acknowledgment of Priority.....		1111
Abstracts of Papers.....		1112
News and Notices.....		1133
Report of the Cambridge, Massachusetts Meeting.....		1143
Publications Received.....		1146

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

CENTRAL REGIONAL—Manhattan, Kansas, April, 1964.
EUROPEAN REGIONAL—Bern, Switzerland, Summer, 1964.
ANNUAL MEETING—Amherst, Mass., Aug. 30-Sept. 4, 1964.

Abstracts should be submitted in duplicate to the Editor, on abstract blanks which can be found in the back of every *Annals*, beginning with the March 1961 issue, or can be obtained from the IMS Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Those received by April 30 will appear in the September *Annals*, by July 31 in December, etc. Abstracts should be limited to 200 words or the equivalent, and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
