THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE OF MATHEMATICAL STATISTICS

Contents

	PAGE
Optimum Properties and Admissibility of Sequential Tests. D. L. BURKHOLDER AND R. A. WIJSMAN	1
On the Optimality of Sequential Probability Ratio Tests. THEODORE K. MATTHES	18
On the Efficiency of Optimal Nonparametric Procedures in the Two Sample Case. PIOTR WITOLD MIKULSKI	22
The Sample Mean Among the Extreme Normal Order Statistics. HERBERT T. DAVID	33
Tests Auxiliary to χ^2 Tests in a Markov Chain. RUTH Z. GOLD	56
Selection of the Best Treatment in a Paired-Comparison Experiment. B. J. TRAWINSKI AND H. A. DAVID	75
A Remark on a Paper of Trawinski and David Entitled: "Selection of the Best Treatment in a Paired-Comparison Experiment". PETER J. HUBER	92
Distribution of the Two Sample Cramér-von Mises Criterion for Small Equal Samples. E. J. BURR	95
Simplified Estimates for the Exponential Distribution. A. E. SARHAN, B. G. GREENBERG AND JUNJIRO OGAWA	102
Optimum Estimators of the Parameters of Negative Exponential Distributions from One or Two Order Statistics. M. M. SIDDIQUI	117
Asymptotic Theory for Principal Component Analysis. T. W. ANDERSON	122
On Testing a Set of Correlation Coefficients for Equality. D. N. LAWLEY	149
Statistical Analysis Based on a Certain Multivariate Complex Gaussian Distribution (an Introduction). N. R. GOODMAN	152
The Distribution of the Determinant of a Complex Wishart Distributed Matrix. N. R. GOODMAN	178
Some Results on the Distribution of Two Random Matrices Used in Classification Procedures. D. G. KABE	181
Distribution of Definite and of Indefinite Quadratic Forms From a Non-Central Normal Distribution. B. K. SHAH	186
Approximations to Multivariate Normal Orthant Probabilities. RALPH HOYT BACON	191
A Definition of Subjective Probability. F. J. ANSCOMBE AND R. J. AUMANN	199
On a Class of Stochastic Processes. JOHN LAMPERTI	206
Stochastic Processes on a Sphere. RICHARD H. JONES	213
On Convergence to $+\infty$ in the Law of Large Numbers. LEONARD E. BAUM	219
Non-Existence of Everywhere Proper Conditional Distributions. D. BLACKWELL AND C. RYLL-NARDZEWSKI	223
Entropy and Conjugacy. THOMAS A. BROWN	226
Collapsed Markov Chains and the Chapman-Kolmogorov Equation. JACK HACHIGIAN	233
The Estimation of a Fundamental Interaction Parameter in an Emigration-Immigration Process. HAROLD RUBEN	238
Convergence Theorems for Multiple Channel Loss Probabilities. A. JOFFE AND P. E. NEY	260
Dynamic Stochastic Processes. BERNT P. STIGUM	274

(Continued on back cover)

Vol. 34, No. 1 — March, 1963

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Mathematical Statistics.* www.jstor.org

THE ANNALS
OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are $20 per volume (four issues of one calendar year) in the U. S. and Canada, $15 per volume elsewhere. Single issues are $5.25 Back numbers for all issues up to and including 1956 (Vol. XXVII) are $12 per volume, $3.50 per issue; issues from 1957 on are $20 per volume, $5.25 per issue; for complete sets, $200 for the first 25 volumes, $10 per additional volume purchased at the same time as Volumes I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address,** etc., should be addressed to Gerald Lieberman, Treasurer, Institute of Mathematical Statistics, Department of Statistics, Stanford University, Stanford, Calif.

Editorial Office, Department of Statistics, University of California, Berkeley 4, California. J. L. Hodges, Jr. Editor.

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided References should follow the new style.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime (′), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., $\underline{x}$) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a+b}{c+d}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE

WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
