

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Oskar Anderson, 1887-1960	HERMAN WOLD 651
On Fiducial Inference	D. A. S. FRASER 661
A Central Limit Theorem for Partly Dependent Variables H. J. GODWIN AND S. K. ZAREMBA	677
Some Multivariate Chebyshev Inequalities with Extensions to Continuous Parameter Processes	Z. W. BIRNBAUM AND ALBERT W. MARSHALL 687
Maximal Independent Stochastic Processes	C. B. BELL 704
On Markov Chain Potentials	JOHN G. KEMENY AND J. LAURIE SNELL 709
Markov Chains with Absorbing States: A Genetic Example G. A. WATERSON	716
Estimation of the Spectrum	V. K. MURTHY 730
On a Coincidence Problem Concerning Particle Counters	LAJOS TAKÁCS 739
On the Ruin Problem of Collective Risk Theory	N. U. PRABHU 757
The Random Walk between a Reflecting and an Absorbing Barrier B. WEESAKUL	765
On the Queueing Process $M/G/1$	C. R. HEATHCOTE 770
The Sequential Design of Experiments for Infinitely Many States of Nature ARTHUR E. ALBERT	774
Analysis of a Class of PBIB Designs with more than Two Associate Classes P. V. RAO	800
On a Locally Most Powerful Boundary Randomized Similar Test for the Independence of Two Poisson Variables MOHAMAD SALAHUDDIN AHMED	809
Confidence Intervals from Censored Samples	MAX HALPERIN 828
Tests of Fit Based on the Number of Observations Falling in the Shortest Sample Spacings Determined by Earlier Observations	LIONEL WEISS 838
Some Nonparametric Median Procedures	V. P. BHAPKAR 846
On Certain Characteristics of the Distribution of the Latent Roots of a Symmetric Random Matrix under General Conditions H. R. VAN DER VAART	864
The Distribution of Noncentral Means with Known Covariance ALAN T. JAMES	874

(Continued on back cover)

Vol. 32, No. 3 — September, 1961

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$15 per volume (four issues of one calendar year) in the U. S. and Canada, \$12 per volume elsewhere. Single issues are \$4. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$12 per volume, \$3.50 per issue; issues from 1957 on are \$15 per volume, \$4 per issue; for complete sets, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volumes I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Gerald Lieberman, Treasurer, Institute of Mathematical Statistics, Department of Statistics, Stanford University, Stanford, Calif.

Editorial Office, Department of Statistics, University of California, Berkeley 4, California. J. L. Hodges, Jr. Editor. (See note on next page about change of Editor.)

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or a bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow current *Annals* style, and should be numbered alphabetically according to authors' names.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor or the Treasurer, as described above. It should **not** be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
