

ADVERTISING IN
THE ANNALS of
MATHEMATICAL STATISTICS

ADVERTISEMENTS for books, recruitment of professional personnel, etc., may now be placed in the *Annals of Mathematical Statistics*. Only full-page and half-page advertisements will be accepted. For details about costs, deadlines, sizes, and so on, please write to

Mr. Edgar M. Bisgyer
Advertising Manager
American Statistical Assn.

Washington 6, D. C.

TABLES OF THE HYPERGEOMETRIC DISTRIBUTION

Gerald J. Lieberman and Donald B. Owen. In this book the hypergeometric distribution is fully tabulated. The tables are of great use to workers in applied mathematics, engineering, and the social and physical sciences. *About \$15.00*

MARKOV LEARNING MODELS FOR MULTIPERSON INTERACTIONS

Patrick Suppes and Richard C. Atkinson. A major attempt to bridge the gap between statistical learning theory and social psychology by applying stimulus-sampling techniques to social interaction situations. *Stanford Mathematical Studies in the Social Sciences, V.* *\$8.25*

BIOMETRICS

Journal of the Biometric Society

Vol. 16, No. 4

CONTENTS

December 1960

- Sample Size for a Specified Width Confidence Interval on the Variance of a Normal Distribution Franklin A. Graybill and Robert D. Morrison
- The Detection of Host Variability in a Dilution Series with Single Observations P. Armitage and G. E. Bartsch
- A Model for the Analysis of the Distribution of Qualitative Characters in Sibships Fitting the Poisson Binomial Distribution A. M. Gittelson, Robert Shumway and John Gurland
- Critical Values for Duncan's New Multiple Range Test on the Analysis of Repeated-Measurements Experiments H. Leon Harter, M. B. Danford, Harry M. Hughes, and R. C. McNee
- Estimation of Mortality Intensities in Animal Experiments A. W. Kimball
- A Stochastic Study of the Life Table and Its Applications Chia Long Chiang
- I. Probability Distributions of the Biometric Functions D. S. Robson and G. F. Atkinson
- Individual Degrees of Freedom for Testing Homogeneity of Regression Coefficients in a One-Way Analysis of Covariance R. A. Bradley, R. E. Walpole, and C. Y. Kramer
- Intra- and Interblock Analysis for Factorials in Incomplete Block Designs E. N. Key and M. H. Hey
- The Statistical Estimation of a Rectangular Hyperbola Alvin D. Wiggins
- On a Multicompartment Migration Model with Chronic Feeding Robert J. Buehler
- An Application of Regression to Frequency Graduation
- Queries and Notes
- On an Alternative Method of Computing Tukey's Statistic for the Latin Square Model John K. Abraham
- A Direct Method for Constructing the Intrablock Subgroup S. K. Katti

Biometrics is published quarterly. Its objects are to describe and exemplify the use of mathematical and statistical methods in biological and related sciences, in a form assimilable by experimenters. The annual non-member subscription rate is \$7. Inquiries, orders for back issues and non-member subscriptions should be addressed to:

PROCEEDINGS OF SYMPOSIA IN APPLIED MATHEMATICS, VOLUME X

COMBINATORIAL ANALYSIS

EDITED BY RICHARD BELLMAN AND MARSHALL HALL, JR.

Problems involving the choice of a specified set of objects from a finite set of objects are usually called "combinatorial". Although there is seldom any theoretical difficulty concerning the existence of the desired subset, there is almost always an enormous amount of difficulty connected with the actual determination of this subset.

Questions of this type arise in all parts of mathematics, in algebra, geometry and analysis. In general, any advance in feasible procedures requires a major theoretical advance. Quite often, the physical background of the mathematical problem suggests a new mathematical approach to a longstanding problem.

This volume contains a variety of papers devoted to combinatorial problems arising in the mathematical areas cited above, and in the new fields of scheduling, transportation, communication and design of experiments. A number of papers are devoted to the use of digital computers to attack the fantastically complicated problems which arise from apparently simple physical problems.

Not only will this volume furnish a valuable survey of the current state of the art, but it will also provide a source for research in this vast and growing field.

AMERICAN MATHEMATICAL SOCIETY

190 Hope Street

Providence 6, Rhode Island

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

E. L. Lehmann, Department of Statistics, University of California, Berkeley 4, California

President-Elect:

A. H. Bowker, Department of Statistics, Stanford University, Stanford, California

Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina

Treasurer:

Gerald Lieberman, Department of Statistics, Stanford University, Stanford, California

Editor:

William Kruskal, Department of Statistics, Eckhart Hall, University of Chicago, Chicago 37, Illinois

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$10.00 per year for residents of the United States or Canada and \$5.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Secretary of the Institute.

Contents (continued)

A Generalization of Group Divisible Designs . . .	DAMARAJU RAGHAVARAO 756
Relations Among the Blocks of the Kronecker Product of Designs	MANOHAR NARHAR VARTAK 772
The Dual of a Balanced Incomplete Block Design	P. V. RAO 779
NOTES	
On the Unbiasedness of Yates' Method of Estimation Using Inter-block Information	FRANKLIN A. GRAYBILL AND V. SESHADRI 786
On the Block Structure of Certain PBIB Designs with Two Associate Classes Having Triangular and L_2 Association Schemes	DAMARAJU RAGHAVARAO 787
Optimality Criteria for Incomplete Block Designs	K. R. SHAH 791
On the Completeness of Order Statistics	C. B. BELL, DAVID BLACKWELL AND LEO BREIMAN 794
On Centering Infinitely Divisible Processes	RONALD PYKE 797
The Strong Law of Large Numbers for a Class of Markov Chains	LEO BREIMAN 801
Emptiness in the Finite Dam	A. GHOSAL 803
Correction Notes	809
Abstracts of Papers	811
Correction to Abstracts	823
News and Notices	824
Report of the New York City Meeting	831
Publications Received	833

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

EASTERN REGIONAL MEETING— Ithaca, New York, April 21-22, 1961

Abstracts should be submitted in duplicate to the Editor, preferably on abstract blanks, which can be obtained from the IMS Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Those received by April 30 will appear in the September *Annals*, by July 31 in December, etc. Abstracts should be limited to 200 words or the equivalent, and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if transmitted by members.
