

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

PAGE

Pólya Type Distributions IV. Some Principles of Selecting a Single Procedure From a Complete Class.....	SAMUEL KARLIN	1
The Use of Group Divisible Designs for Confounded Asymmetrical Factorial Arrangements.....	MARVIN ZELEN	22
Accelerated Stochastic Approximation.....	HARRY KESTEN	41
Testing the Hypothesis That Two Populations Differ Only in Location	BALKRISHNA V. SUKHATME	60
Estimation of Location and Scale Parameters By Order Statistics From Singly and Doubly Censored Samples.....	A. E. SARHAN AND B. G. GREENBERG	79
Generalizations of a Gaussian Theorem.....	PAUL S. DWYER	106
A Central Limit Theorem For Sums of Interchangeable Random Variables	H. CHERNOFF AND H. TEICHER	118
Linear Estimation From Censored Data.....	R. L. PLACKETT	131
Semimartingales of Markov Chains.....	JOHN G. KEMENY AND J. LAURIE SNELL	143
Note on Sufficient Statistics and Two-Stage Procedures.....	S. G. GHURYE	155
Sampling Variances of Estimates of Components of Variance.....	S. R. SEARLE	167
On Some Distributions Related to the Statistic D_n^*	Z. W. BIRNBAUM AND RONALD PYKE	179
On Several Statistics Related to Empirical Distribution Functions.	MEYER DWASS	188
On the Efficiency of Estimates of Trend in the Ornstein Uhlenbeck Process	CHARLOTTE T. STRIEBEL	192
Unbiased Estimation of Certain Correlation Coefficients	INGRAM OLKIN AND JOHN W. PRATT	201
Transient Atomic Markov Chains With a Denumerable Number of States	LEO BREIMAN	212
A Construction for Room's Squares and an Application in Experimental Design	J. W. ARCHBOLD AND N. L. JOHNSON	219
A Multivariate Tchebycheff Inequality.....	INGRAM OLKIN AND JOHN W. PRATT	226
On Selecting a Subset Which Contains All Populations Better Than a Standard	SHANTI S. GUPTA AND MILTON SOBEL	235
Some Problems of Simultaneous Minimax Estimation.....	STANISLAW TRYBULA	245
A Theorem On Factorial Moments and Its Applications.....	P. V. KRISHNA IYER	254
The Uniqueness of the Triangular Association Scheme.....	W. S. CONNOR	262
The Limiting Distribution of Brownian Motion in a Bounded Region With Instantaneous Return.....	B. SHERMAN	267

(Continued on outside back cover)

Vol. 29, No. 1 — March, 1958

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$12 per volume (four issues of one calendar year) in the U. S. and Canada, \$10 per volume elsewhere. Single issues are \$3.50. Back numbers are \$12 per volume, \$3.50 per issue, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volume I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning subscriptions, back numbers, payment of dues, etc., should be addressed to A. H. Bowker, Treasurer, Department of Statistics, Stanford University, Stanford, Calif.

Communications concerning membership, changes of address, etc., should be addressed to George E. Nicholson, Jr., Secretary, Department of Statistics, University of North Carolina, Chapel Hill, N. C. Changes of address which are to become effective for a given issue of the *Annals* should be reported to the Secretary on or before the 10th of the month preceding the month of issue.

Editorial Office. The RAND Corporation, 1700 Main St., Santa Monica, Calif., T. E. Harris, Editor.

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or a bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow current *Annals* style, and should be numbered alphabetically according to authors' names.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\log x$) and underlined letters (e.g., x) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Entered as second-class matter at the Post Office at Baltimore, Maryland, under the act of March 3, 1879

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.
