

# BIOMETRIKA

*A Journal for the Statistical Study of Biological Problems*

Volume XXXV

Contents

Parts I and II, 1948

- I. Memoir of James Fowler Tocher. (1864-1945) By MAJOR GREENWOOD.  
II. On some modes of population growth leading to R. A. Fisher's logarithmic series distribution. By DAVID G. KENDALL. III. The studentized form of the extreme mean square test in the analysis of variance. By K. R. NAIR. IV. The estimation of non-linear parameters by 'internal least squares'. By H. O. HARTLEY. V. The geometrical method in the theory of sampling. By DAVID FOG. VI. Proofs of the distribution law of the second order moment statistics. By JOHN WISHART. VII. Tests of significance in multivariate analysis. By C. R. RAO. VIII. Alternative systems in the analysis of variance. By N. L. JOHNSON. IX. An examination and further development of a formula arising in the problem of comparing two mean values. By ALICE A. ASPIN. X. On the power function of the longest run as a test for randomness in a sequence of alternatives. By G. BATEMAN. XI. Sur les courbes de fréquence de K. Pearson. By M. DUMAS. XII. The distribution of the extreme deviate from the sample mean and its studentized form. By K. R. NAIR. XIII. The Fisher-Yates test of significance in  $2 \times 2$  contingency tables. By D. J. FINNEY. XIV. The power function of the test for the difference between two proportions in a  $2 \times 2$  table. By P. B. PATNAIK. XV. The analysis of contingency tables with groupings based on quantitative characters. By F. YATES. XVI. The probability integral transformation when parameters are estimated from the sample. By F. N. DAVID and N. L. JOHNSON. XVII. A table for the calculation of working probits and weights in probit analysis. By D. J. FINNEY and W. L. STEVENS. XVIII. *Miscellanea*: A note on the  $\chi^2$  smooth test. By H. L. SEAL. Rank correlation and product-moment correlation. By P. A. P. MORAN. Tests of significance in the variate difference method. By N. L. JOHNSON. XIX. *Review*: M. G. Kendall's *The Advanced Theory of Statistics*, Vol. II. By B. L. WELCH.

The subscription price, payable in advance, is 45s. inland, 54s. export (per volume including postage). Cheques should be drawn to Biometrika and sent to "The Secretary, Biometrika Office, Department of Statistics, University College, London, W.C. 1." All foreign cheques must be in sterling and drawn on a bank having a London agency.

# ECONOMETRICA

*Journal of the Econometric Society*

*Contents of Vol. 16, No. 2, April, 1948, include:*

	Page
CHARLES F. ROOS: A Future Role for the Econometric Society in International Statistics. . . . .	127
DON PATINKIN: Relative Prices, Say's Law, and the Demand for Money. . . . .	135
J. G. BAKER: The Universal Discount as a Means of Economic Stabilization. . . . .	155
J. N. BEHRMAN: The Short-Term Interest Rate and the Velocity of Circulation. . . . .	185
PAUL A. SAMUELSON: Exact Distribution of Continuous Variables in Sequential Analysis. . . . .	191
Report of the Chicago Meeting, December 27-30, 1947. . . . .	198

Published Quarterly

Subscription to Nonmembers: \$9.00 per year

The Econometric Society is an international society for the advancement of economic theory in its relation to statistics and mathematics.

Subscriptions to *Econometrica* and inquiries about the work of the Society and the procedure in applying for membership should be addressed to Alfred Cowles, Secretary and Treasurer, The Econometric Society, The University of Chicago, Chicago 37, Illinois, U.S.A.

# MATHEMATICAL REVIEWS

*A journal containing reviews of the mathematical literature of the world, with full subject and author indices*

Publication of this journal is sponsored by the American Mathematical Society, Mathematical Association of America, Institute of Mathematical Statistics, London Mathematical Society, Edinburgh Mathematical Society, Union Matematica Argentina, and others.

Subscriptions accepted to cover the calendar year only.  
Issues appear monthly except July. \$13.00 per year.

*Send subscription order or request for sample copy to*

**AMERICAN MATHEMATICAL SOCIETY  
531 West 116th Street, New York City 27**

## JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

*MARCH, 1948*

### *Contents*

Statistics and Foreign Policy.....	WILLARD L. THORP
History of the Uses of Modern Sampling Procedures.....	FREDERICK F. STEPHAN
The Use of Mark Sensing in a Large Scale Testing Program.....	WALTER L. DEEMER, JR.
A Proposed Basic Course in Statistics.....	GEORGE W. SNEDECOR
Actuarial Estimates for Public Sickness Insurance Plans.....	ABRAHAM M. NIESSEN
Earnings of Nonfarm Employees in the U. S., 1890-1946.....	STANLEY LEBERGOTT
Direct Determination of Compass Settings for Proportionate Area Pie-Charts	
	HERMAN LASKEN
Profile Graphs.....	JOHN V. SPIELMANS
A Method for Obtaining and Analyzing Sensitivity Data	
	W. J. DIXON AND A. M. MOOD
A Short-Cut Method of Fitting a Logistic Curve	
	WILLIAM A. SPURR AND DAVID R. ARNOLD
Statistical Methodology Index, No. 11.....	OSCAR KRISEN BUROS

**AMERICAN STATISTICAL ASSOCIATION  
1603 K Street, N. W., Washington 6, D. C.**

# Wiley Books in Statistics

## NOMOGRAPHY

by ALEXANDER S. LEVENS

"The writer and publishers are to be commended for a splendid contribution to the field of nomography. The illustrations and drafting examples are well done. The author has a good arrangement of the subject matter with a clear mathematical proof of the graph leaving no room for doubting its accuracy. I like the wide range of engineering applications as problems."

—Professor T. C. BROWN, *University of North Carolina*

1948                      176 pages                      \$3.00

## Introduction to MATHEMATICAL STATISTICS

by PAUL G. HOEL

"In view of its general excellence, its publication is rather more than just a welcome event: it is the most important happening in the field of undergraduate statistical textbooks in several years. . . ."

—J. H. CURTISS, *National Bureau of Standards*

1947                      258 pages                      \$3.50

## CONTROL CHARTS IN FACTORY MANAGEMENT

by WILLIAM B. RICE

"*Control Charts in Factory Management* is an able presentation of the statistics, philosophy and practical applications of the control chart tool of quality control."

—A. V. FEIGENBAUM, *General Electric Review*

1947                      149 pages                      \$2.50

## FORECASTING FOR PROFIT

### *A Technique of Business Management*

by WILSON WRIGHT

"Mr. Wright's book is devoted primarily to the application of available data and knowledge to forecasting for a business enterprise. In this field it is a completely competent and highly useful book. It is well organized, logical in content and argument and modest in its claims."

—A. G. ABRAMSON, *American Economic Review*

1947                      173 pages                      \$2.75

## SEQUENTIAL ANALYSIS

by ABRAHAM WALD

"The Sequential Analysis marks the greatest advance in statistical theory in recent years and I have no doubt that Wald's book will be a great success."

—Professor WILLIAM FELLER, *Cornell University*

"It will be a most stimulating and valuable book because of Wald's elegant and rigorous approach . . ."

—Professor IRVING W. BURR, *Purdue University*

1947                      212 pages                      \$4.00

## GOVERNMENT STATISTICS FOR BUSINESS USE

Edited by PHILIP M. HAUSER  
and WILLIAM R. LEONARD

"I think the book should be invaluable not only to businessmen but also to educators and statisticians. It covers the field well and with great clarity."

—Professor IRVING LORGE, *Columbia University*

1946                      432 pages                      \$5.00

JOHN WILEY & SONS, Inc., 440 Fourth Ave., New York 16

## **ELEMENTS OF STATISTICAL METHOD**

By ALBERT E. WAUGH, University of Connecticut. Second edition. 532 pages, \$4.50

Presents a simple, readable exposition of the basic principles and methods of statistics, with emphasis upon the understanding of the concept rather than upon mathematical manipulation.

## **Laboratory Manual and Problems for Elements of Statistical Method**

By ALBERT E. WAUGH. Second edition. 216 pages, \$2.00

This collection of laboratory material, although correlated with the author's *Elements of Statistical Method*, contains problems and cases designed for the usual course in statistics, and may be used with any standard text.

## **BUSINESS STATISTICS**

By JOHN R. RIGGLEMAN and IRA N. FRISBEE, University of California at Los Angeles. Second edition. 790 pages, \$4.50

Emphasizes the actual application of statistics to business problems. It is the aim throughout to lead the future businessman to appreciate the usefulness of statistical methods and to employ them in the practical problems of business.

## **Students' Manual for Business Statistics**

By IRA N. FRISBEE and W. N. ANDERSON. 250 pages, \$2.75

## **SAMPLING INSPECTION. Principles, Procedures, and Tables for Single, Double, and Sequential Sampling in Acceptance Inspection and Quality Control Based on Percent Defective**

By THE STATISTICAL RESEARCH GROUP, Columbia University. OSRD. 395 pages, \$5.25

A definitive and authoritative work on sampling inspection, giving a systematic account of certain of the best current inspection practices, together with tables and detailed instructions for carrying out these practices.

## **SELECTED TECHNIQUES OF STATISTICAL ANALYSIS. For Scientific and Industrial Research and Production and Management Engineering**

By THE STATISTICAL RESEARCH GROUP, Columbia University. OSRD. 440 pages, \$6.00

Discusses a series of problems which occur frequently in planning, analyzing, or interpreting quantitative data, and explains various techniques appropriate to these problems.

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

BOARD OF DIRECTORS FOR 1948

*President:*

A. WALD, Columbia University, New York 27

*Vice-Presidents:*

CHURCHILL EISENHART, National Bureau of Standards, Washington 25

HENRY SCHEFFÉ, Columbia University, New York 27

*Secretary-Treasurer:*

PAUL S. DWYER, University of Michigan, Ann Arbor

*Past Presidents:*

WILL FELLER, Cornell University, Ithaca, N. Y.

WILLIAM G. COCHRAN, North Carolina State College, Raleigh

*Editor:*

S. S. WILKS, Princeton University, Princeton, N. J.

The purpose of the Institute of Mathematical Statistics is to stimulate research in the mathematical theory of statistics and to promote coöperation between the field of pure research and the fields of application.

Membership dues including subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$7.00 per year within the Western Hemisphere and \$5.00 per year elsewhere. Dues and inquiries regarding membership in the Institute should be sent to the Secretary-Treasurer of the Institute.

## MEETINGS OF THE INSTITUTE

SUMMER MEETING—MADISON, WISCONSIN, September 6–10, 1948.

To be held in conjunction with meetings of the American Mathematical Society, the Mathematical Association of America, and the Econometric Society.

There will be a *Symposium on the Theory of Games*. Participants will include J. von Neumann, O. Morgenstern, M. A. Girshick, E. W. Paxson, G. B. Dantzig, I. Kaplansky, J. C. C. McKinsey, J. W. Tukey, and L. Shapley.

There will be a joint session with the Econometric Society on *Stochastic Difference Equations*.

ANNUAL MEETING—CLEVELAND, OHIO, December 27–30, 1948.

To be held in conjunction with meetings of the American Statistical Association, the Biometric Society, the Econometric Society, and related social science organizations.

Professor T. W. Anderson will deliver an invited address on "*The asymptotic distribution of characteristic vectors used in estimating linear relations*".

Dr. E. L. Lehmann will deliver an invited address on "*Some aspects of the theory of testing composite hypotheses*."

There will be joint sessions with the American Statistical Association reviewing recent progress in *Mathematical Statistics* and *Statistical Methodology*.

Abstracts of contributed papers must be in the hands of Secretary P. S. Dwyer, Rackham Building, Ann Arbor, Michigan, not later than November 15.
