

# SANKHYĀ

*The Indian Journal of Statistics*

*Edited by P. C. Mahalanobis*

Vol. VIII, Part 3, 1947

On some analogues of the amount of information and their use in statistical estimation.....	A. BHATTACHARYYA
The existence of collectives in abstract space.....	C. F. KOSSACK
On recursion formulae, tables and Bessel function populations associated with the distribution of Classical $D^2$ -Statistic.....	P. K. BOSE
On a resolvable series of balanced incomplete block designs.....	R. C. BOSE
Notes on testing of composite hypotheses.....	S. N. ROY
On the general law of demand for raw jute.....	T. P. CHATTERJEE
Miscellaneous Notes	

Annual subscription: 30 rupees  
Inquiries and orders may be addressed to the  
Editor, Sankhyā, Presidency College, Calcutta, India.

Published Quarterly

Subscription to Nonmembers: \$9.00 per year

The Econometric Society is an international society for the advancement of economic theory in its relation to statistics and mathematics.

Subscriptions to *Econometrica* and inquiries about the work of the Society and the procedure in applying for membership should be addressed to Alfred Cowles, Secretary and Treasurer, The Econometric Society, The University of Chicago, Chicago 37, Illinois, U.S.A.

# MATHEMATICAL REVIEWS

*A journal containing reviews of the mathematical literature of the world, with full subject and author indices*

Publication of this journal is sponsored by the American Mathematical Society, Mathematical Association of America, Institute of Mathematical Statistics, London Mathematical Society, Edinburgh Mathematical Society, Union Matematica Argentina, and others.

Subscriptions accepted to cover the calendar year only.  
Issues appear monthly except July. \$13.00 per year.

*Send subscription order or request for sample copy to*

## JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

DECEMBER, 1947

### Contents

Controlling Bias in Mail Questionnaires . . .	JOHN A. CLAUSEN AND ROBERT N. FORD
Coordinating the Measurements of Radio Listening . . . . .	HANS ZEISEL
A Stratified-Random Sample of a Small Finite Population . . . . .	F. G. CORNELL
Sampling Methods Applied to Estimating Numbers of Commercial Orchards in a Commercial Peach Area . . . . .	FRANCIS E. McVAY
General Methods of Analysis for Incomplete Block Designs . . . . .	C. RADHAKRISHNA RAO
Tumbler Mortality . . . . .	GEORGE W. BROWN AND MERRILL M. FLOOD
The Relative Power of Three Statistics for Small Sample Destructive Tests Paul H. Jacobson	PAUL H. JACOBSON
Simplified Methods of Fitting Certain Types of Growth Curves . . . . .	DUDLEY J. COWDEN
Lorenz Curve Analysis of Industrial Decentralization . . . . .	GEORGE C. SMITH, JR.
Agricultural Price Index Numbers . . . . .	ARTHUR G. PETERSON
On the Choice of Forecasting Formulas . . . . .	PAUL G. HOEL
Use of Variance Components in the Analysis of Hog Prices in Two Markets R. L. Anderson	R. L. ANDERSON
Statistical Methodology Index, No. 10 . . . . .	OSCAR KRISEN BUROS

**AMERICAN STATISTICAL ASSOCIATION**  
1603 K Street, N. W., Washington 6, D. C.

OUTSTANDING in its thorough treatment of the logic of statistical inference . . . examination of historical philosophic schools on the problem of methods in sciences . . . treatment of the relationship between progressive aims of science and the methods of science.

## The THEORY of EXPERIMENTAL INFERENCE

By C. West Churchman

Full use is made of the contributions of the mathematical statisticians in this discussion of the general problem of inference in the experimental sciences.

*To be published in May.* \$3.50 (probable)

THE MACMILLAN COMPANY

New York 11

## INDUSTRIAL EXPERIMENTATION

By K. A. BROWNLEE, M.A.

Those who must apply critical tests of statistical significance in practice, often without a full knowledge of their theoretical background, will find this volume particularly useful.

The book is a guide to both the planning and interpretation of experiments on an industrial scale and paves the way to efficient quality control.

### CONTENTS

Introduction. Fundamental Statistical Conceptions. Significance of Means. The Comparison of Variances. The  $\chi^2$  Test. The Poisson Distribution. The Analysis of Variance. The Quality Control Chart. The Relation Between Two Variables. Multiple Correlation. The General Analysis of Variance. Miscellaneous Aspects of the Analysis of Variance. Balanced Incomplete Blocks. Confounding. The Problem of Restricted Block Size in Factorial Experiments. General Conclusions.

116 Pages — \$2.85

# Wiley Books in Statistics

## NOMOGRAPHY

by ALEXANDER S. LEVENS

A nomograph can help you solve problems with a mere fraction of the figuring required in ordinary methods of calculation. This book gives you the basic information you need to construct charts involving straight line scales, curved scales and combinations of these elements. Examples show you how to use the charts to solve problems in civil, mechanical, chemical, electrical and aeronautical engineering.

1948 176 pages \$3.00

## Introduction to MATHEMATICAL STATISTICS

by PAUL G. HOEL

"In view of its general excellence, its publication is rather more than just a welcome event: it is the most important happening in the field of undergraduate statistical textbooks in several years. . . ."

—J. H. CURTISS, *National Bureau of Standards*

1947 258 pages \$3.50

## CONTROL CHARTS IN FACTORY MANAGEMENT

by WILLIAM B. RICE

"*Control Charts in Factory Management* is an able presentation of the statistics, philosophy and practical applications of the control chart tool of quality control."

—A. V. FEIGENBAUM, *General Electric Review*

1947 149 pages \$2.50

## FORECASTING FOR PROFIT

*A Technique of Business  
Management*

by WILSON WRIGHT

With the help of this book, you can forecast sales and profits for your company, . . . size up competition and prices . . . predict employment needs and sources . . . estimate the level of national output . . . predict changes in the supply, use or turnover of money . . . calculate the total national expenditure . . . and, in general, estimate business conditions for at least six months in the future.

1947 173 pages \$2.75

## SEQUENTIAL ANALYSIS

by ABRAHAM WALD

"The Sequential Analysis marks the greatest advance in statistical theory in recent years and I have no doubt that Wald's book will be a great success."

—Professor WILLIAM FELLER, *Cornell University*

"It will be a most stimulating and valuable book because of Wald's elegant and rigorous approach . . ."

—Professor IRVING W. BURR, *Purdue University*

1947 212 pages \$4.00

## GOVERNMENT STATISTICS FOR BUSINESS USE

Edited by PHILIP M. HAUSER  
and WILLIAM R. LEONARD

"I think the book should be invaluable not only to businessmen but also to educators and statisticians. It covers the field well and with great clarity."

—Professor IRVING LORGE, *Columbia University*

1946 432 pages \$5.00

JOHN WILEY & SONS, Inc., 440 Fourth Ave., New York 16

## **SAMPLING INSPECTION**

Principles, Procedures, and Tables for Single,  
Double, and Sequential Sampling in  
Acceptance Inspection and Quality Control  
Based on Percent Defective

*By the Statistical Research Group  
Columbia University*

Applied Mathematics Panel, Office of Scientific  
Research and Development  
395 pages, 6 x 9. \$5.25

The elementary concepts of acceptance sampling are carefully treated, a standard sampling-inspection plan is supplied, and detailed instructions are given so that the principles developed and plans supplied can be used for practical inspection of industrial products. Much of the material has not previously been published.

## **TECHNIQUES OF STATISTICAL ANALYSIS**

For Scientific and Industrial Research  
and Production and Management Engineering

*By the Statistical Research Group  
Columbia University*

Applied Mathematics Panel, Office of Scientific  
Research and Development  
473 pages, 6 x 9. \$6.00

This book discusses a series of problems which occur frequently in planning, analyzing, or interpreting quantitative data, and explains various techniques appropriate to these problems. It describes the statistical approach to a problem, expounds the theory that can be brought to bear upon it, points out the features of the problem that determines the relevance of the theory, gives detailed computational procedures, and illustrates the interpretation of the results.

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

BOARD OF DIRECTORS FOR 1948

*President:*

A. WALD, Columbia University, New York 27

*Vice-Presidents:*

CHURCHILL EISENHART, National Bureau of Standards, Washington 25

HENRY SCHEFFÉ, University of California, Los Angeles 24

*Secretary-Treasurer:*

PAUL S. DWYER, University of Michigan, Ann Arbor

*Past Presidents:*

WILL FELLER, Cornell University, Ithaca, N. Y.

WILLIAM G. COCHRAN, North Carolina State College, Raleigh

*Editor:*

S. S. WILKS, Princeton University, Princeton, N. J.

The purpose of the Institute of Mathematical Statistics is to stimulate research in the mathematical theory of statistics and to promote coöperation between the field of pure research and the fields of application.

Membership dues including subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$7.00 per year within the Western Hemisphere and \$5.00 per year elsewhere. Dues and inquiries regarding membership in the Institute should be sent to the Secretary-Treasurer of the Institute.

## MEETINGS OF THE INSTITUTE

SUMMER MEETING—MADISON, WISCONSIN—September  
6–10, 1948

To be held in conjunction with meetings of the American Mathematical Society, the Mathematical Association of America, and the Econometric Society.

Abstracts must be in the hands of Secretary P. S. Dwyer, Rackham Building, Ann Arbor, Michigan, not later than July 26.

ANNUAL MEETING—CLEVELAND, OHIO—December 27–  
30, 1948

To be held in conjunction with meetings of the American Statistical Association, the Biometric Society, the Econometric Society and related social science organizations.

Abstracts must be in the hands of Secretary P. S. Dwyer, Rackham Building, Ann Arbor, Michigan, not later than November 15.
