

MATHEMATICAL REVIEWS

A journal containing reviews of the mathematical literature of the world, with full subject and author indices

Publication of this journal is sponsored by the American Mathematical Society, Mathematical Association of America, Institute of Mathematical Statistics, London Mathematical Society, Edinburgh Mathematical Society, Union Matematica Argentina, and others.

Subscriptions accepted to cover the calendar year only.
Issues appear monthly except July. \$13.00 per year.

Send subscription order or request for sample copy to

**AMERICAN MATHEMATICAL SOCIETY
531 West 116th Street, New York City 27**

ACCEPTANCE SAMPLING

Papers delivered at the Annual Meeting of the American Statistical Association in Cleveland in 1946 are to be published and sold for \$1.00. Prompt orders will be appreciated.

ACCEPTANCE SAMPLING BY ATTRIBUTES

Developments Prior to 1941.....Paul Peach
Wartime Developments.....E. G. Olds
Discussion

ACCEPTANCE SAMPLING BY VARIABLES

Quality Measured by Average or Variability.....J. H. Curtiss
Lot Quality Measured by Proportion Defective.....Allen Wallis
Discussion
Chairman's Closure.....J. W. Tukey

Orders or requests for further information should be addressed to the

**AMERICAN STATISTICAL ASSOCIATION
1603 K Street, N.W., Washington 6, D.C.**

BIOMETRIKA

A Journal for the Statistical Study of Biological Problems

Vol. XXIV, Parts I, and II, January, 1947

CONTENTS

- I. The variance of the overlap of geometrical figures with reference to a bombing problem. By F. GARWOOD. II. A study of a first dynasty series of Egyptian skulls from Sakkara and of an eleventh dynasty series from Thebes. By A. BATRAWI and G. M. MORANT. III. The generalization of 'Student's' problem when several different population variances are involved. By B. L. WELCH. IV. The distribution of Kendall's γ coefficient of rank correlation in rankings containing ties. By G. P. SILLITTO. V. The use of range in place of standard deviation in the t -test. By E. LORD. VI. The frequency distribution of \sqrt{p} for samples of all sizes drawn at random from a normal population. By R. C. GEARY. VII. On the computation of universal moments of tests of statistical normality derived from samples drawn at random from a normal universe. Application to the calculation of the seventh moment of b_2 . By R. G. GEARY and J. P. G. WORLEDGE. VIII. The asymptotical distribution of range in samples from a normal population. By G. ELFVING. IX. Limits of the ratio of mean range to standard deviation. By R. L. PLACKETT. X. Significance tests for 2×2 tables. By G. A. BARNARD. XI. The choice of statistical tests illustrated on the interpretation of data classed in a 2×2 table. By E. S. PEARSON. XII. 2×2 tables. A note on E. S. Pearson's paper. By G. A. BARNARD. XIII. The cumulants of the z and of the logarithmic z^2 and t distributions. By J. WISHART. XIV. The meaning of a significance level. By G. A. BARNARD.

The subscription price, payable in advance, is 45s. inland, 54s. export (per volume including postage). Cheques should be drawn to Biometrika and sent to "The Secretary, Biometrika Office, Department of Statistics, University College, London, W.C. 1." All foreign cheques must be in sterling and drawn on a bank having a London agency.

ECONOMETRICA

Journal of the Econometric Society

Contents of Vol. 15, No. 1, January, 1947

	Page
MAURICE FRECHET: Anciens et nouveaux indices de corrélation. Leur application au calcul des retards économiques.	1
HERBERT A. SIMON: Effects of Increased Productivity upon the Ratio of Urban to Rural Population.	31
NANCY BRUNER: Note on the Doolittle Solution.	43
DICKSON H. LEAVENS: Accuracy in the Doolittle Solution.	45
KENNETH MAY: Technological Change and Aggregation.	51
<i>Announcements, Notes, and Memoranda</i>	
Report of the Council for 1946.	64
Treasurer's Report.	65
Election of Fellow, 1946.	67
Fellows of the Econometric Society, January, 1947.	68
Washington Meeting, September, 1947: Further Notice.	69

Published Quarterly

Subscription: \$7.00 per year

The Econometric Society is an international society for the advancement of economic theory in its relation to statistics and mathematics.

Subscriptions to *Econometrica* and inquiries about the work of the Society and the procedure in applying for membership should be addressed to Alfred Cowles, Secretary and Treasurer, The Econometric Society, The University of Chicago, Chicago 37, Illinois.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS FOR 1947

President:

WILL FELLER, Cornell University, Ithaca

Vice-Presidents:

J. H. CURTISS, National Bureau of Standards

M. H. HANSEN, Bureau of the Census

Secretary-Treasurer:

PAUL S. DWYER, University of Michigan, Ann Arbor

The purpose of the Institute of Mathematical Statistics is to stimulate research in the mathematical theory of statistics and to promote coöperation between the field of pure research and the fields of application.

Membership dues including subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$5.00 per year. The dues and inquiries regarding membership in the Institute should be sent to the Secretary-Treasurer of the Institute.

ANNOUNCEMENTS OF FUTURE MEETINGS

The 1947 Summer Meeting of the Institute will be held at Yale University, New Haven, Connecticut, on September 2-5, 1947, in conjunction with meetings of the American Mathematical Society and the Mathematical Association of America.

Professor A. Wald will deliver the first Henry Lewis Rietz Lecture at the Summer Meeting. The title of his lecture will be *Sequential Estimation and Multi-Decisions*. Other sessions of invited papers and contributed papers will be organized and announced later.
