

THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

- Infinite horizon backward stochastic differential equations and elliptic equations
in Hilbert spaces MARCO FUHRMAN AND GIANMARIO TESSITORE 607
- Occupation time large deviations of two-dimensional
symmetric simple exclusion process
CHIH-CHUNG CHANG, CLAUDIO LANDIM AND TZONG-YOW LEE 661
- Spatio-temporal large deviations principle for coupled circle maps
JEAN-BAPTISTE BARDET AND GÉRARD BEN AROUS 692
- Limit theorems for coupled continuous time random walks
PETER BECKER-KERN, MARK M. MEERSCHAERT
AND HANS-PETER SCHEFFLER 730
- Moment-entropy inequalities ERWIN LUTWAK, DEANE YANG AND GAOYONG ZHANG 757
- The heat equation and reflected Brownian motion in time-dependent domains
KRZYSZTOF BURDZY, ZHEN-QING CHEN AND JOHN SYLVESTER 775
- Blockage hydrodynamics of one-dimensional
driven conservative systems CHRISTOPHE BAHADORAN 805
- Fluctuations in the occupation time of a site in the
asymmetric simple exclusion process. CÉDRIC BERNARDIN 855
- A law of large numbers for random walks
in random mixing environments. FRANCIS COMETS AND OFER ZEITOUNI 880
- The Poisson–Dirichlet law is the unique invariant distribution
for uniform split–merge transformations PERSI DIACONIS, EDDY MAYER-WOLF,
OFER ZEITOUNI AND MARTIN P. W. ZERNER 915
- Conformal invariance of planar loop-erased random walks and uniform spanning trees
GREGORY F. LAWLER, ODED SCHRAMM AND WENDELIN WERNER 939
- Large deviations for random walk in random environment with holding times
AMIR DEMBO, NINA GANTERT AND OFER ZEITOUNI 996
- A stochastic representation theorem with applications
to optimization and obstacle problems PETER BANK AND NICOLE EL KAROUÏ 1030
- Second-order linear hyperbolic SPDEs driven by isotropic Gaussian noise on a sphere
ROBERT C. DALANG AND OLIVIER LÉVÊQUE 1068
- Large deviations for stochastic reaction–diffusion systems with
multiplicative noise and non-Lipschitz reaction term
SANDRA CERRAI AND MICHAEL RÖCKNER 1100
- The limit shape of the zero cell in a stationary Poisson hyperplane tessellation
DANIEL HUG, MATTHIAS REITZNER AND ROLF SCHNEIDER 1140
- Poisson approximations for epidemics with
two levels of mixing FRANK BALL AND PETER NEAL 1168
