**No. 3**

**Special Invited Paper**

Loss networks ..... F. P. KELLY

**Articles**

Diffusion approximation in past dependent models and applications to option pricing ..... PAOLO KIND, ROBERT SH. LIPTSER AND WOLFGANG J. RUNGGLADIER

On the distribution of leaves in rooted subtrees of recursive trees  
..... HOSAM M. MAHMOUD AND R. T. SMYTHE

Inventory models with continuous, stochastic demands  
..... SIDNEY BROWNE AND PAUL ZIPKIN

A limit result respecting graph structure for a fully connected loss network with alternative routing ..... J.-P. CRAMETZ AND P. J. HUNT

Pseudolikelihood for exponential family models of spatial point processes  
..... JENS LEDET JENSEN AND JESPER MØLLER

A new class of random number generations ..... GEORGE MARSAGLIA AND ARIF ZAMAN

## Articles

- Maximum likelihood type estimation for nearly nonstationary autoregressive time series . . . . . DENNIS D. COX AND ISABEL LLATAS
- Gaussian likelihood estimation for nearly nonstationary AR(1) processes . . DENNIS D. COX
- Estimation of the parameters of linear time series models subject to nonlinear restrictions . . . . . NEERCHAL K. NAGARAJ AND WAYNE A. FULLER
- Convergence of moments of least squares estimators for the coefficients of an autoregressive process of unknown order . . R. J. BHANSALI AND F. PAPANGELOU
- The variational form of certain Bayes estimators . . . . . L. R. HAFF
- Bayes empirical Bayes estimation for natural exponential families with quadratic variance functions . . . . . G. G. WALTERS AND G. G. HAMEDANI
- Diameter and volume minimizing confidence sets in Bayes and classical problems . . . . . ANIRBAN DASGUPTA
- Robust Bayesian experimental designs in normal linear models . . . . . A. DASGUPTA AND W. J. STUDDEN
- On the optimal rates of convergence for nonparametric deconvolution problems . . . . . JIANQING FAN
- On the estimation of quadratic functionals . . . . . JIANQING FAN
- Edgeworth expansion of a function of sample means . . . . . Z. D. BAI AND C. RADHAKRISHNA RAO
- Efficient estimation of linear functionals of a probability measure  $P$  with known marginal distributions . . . . . PETER J. BICKEL, YA'ACOV RITOV AND JON A. WELLNER
- Approximation of density functions by sequences of exponential families . . . . . ANDREW R. BARRON AND CHYONG-HWA SHEU
- Large sample theory of a modified Buckley-James estimator for regression analysis with censored data . . . . . TZE LEUNG LAI AND ZHILIANG YING
- Weak convergence of time-sequential censored rank statistics with applications to sequential testing in clinical trials . . . . . MING GAO GU AND TZE LEUNG LAI
- Conditional rank tests for randomly censored data . . . . . ARNOLD JANSSEN
- Almost sure asymptotic representation for a class of functionals of the Kaplan-Meier estimator . . . . . IRÈNE GJJBELS AND NOËL VEREVERBEKE
- The asymptotic behavior of some nonparametric change-point estimators . . . . . LUTZ DÜMBGEN
- Some bootstrap tests of symmetry for univariate continuous distributions . . . . . MIGUEL A. ARCONES AND EVARIST GINÉ
- Spline functions and stochastic filtering . . . . . CHRISTINE THOMAS-AGNAN
- Some stabilized bandwidth selections for nonparametric regression . . SHEAN-TSONG CHIU
- On tail index estimation using dependent data . . . . . TAILEN HSING
- A geometric approach to detecting influential cases . . . . . PAUL W. VOS
- Trend-free block designs for varietal and factorial experiments . . . . . MEILY LIN AND A. M. DEAN
- On the balanced incomplete block design for rankings . . . . . M. ALVO AND P. CABILLO
- Optimal weights for experimental designs on linearly independent support points . . . . . FRIEDRICH PUKELSHEIM AND BEN TORSNEY
- Inference for the crossing point of two continuous cdf's . . . . . D. L. HAWKINS AND SUBHASH C. KOCHAR
- Generalizations of James-Stein estimators under spherical symmetry . . . . . ANN COHEN BRANDWEIN AND WILLIAM E. STRAWDERMAN
- An  $E$ -ancillarity projection property of Cox's partial score function . . . . . I-SHOU CHANG AND CHAO A. HSIUNG

## Short Communications

- The singularities of fitting planes to data . . . . . STEVEN P. ELLIS
- Optimality of some two-associate-class partially balanced incomplete-block designs . . . . . C.-S. CHENG AND R. A. BAILEY
- Monotone gain, first-order autocorrelation and zero-crossing rate . . . . . BENJAMIN KEDEM AND TA-HSIN LI
- On the monotonicity of a certain expectation . . . . . RASUL A. KHAN

## 14 INVARIANT MEASURES ON GROUPS AND THEIR USE IN STATISTICS by Robert A. Wijsman

A discussion of distributions in statistical models with groups of invariance transformations.

This monograph deals with problems concerning distributions in statistical models in which there is a group of invariance transformations. The methods presented make use of mathematical tools that involve the interplay between groups and integration. The author demonstrates by examples the statistical usefulness of these methods and presents a systematic account of their mathematical background.

## 15 ANALYTIC STATISTICAL MODELS by Ib M. Skovgaard

An introduction to analytic statistical models.

This monograph introduces a class of statistical models (the analytic models) which is sufficiently well behaved to satisfy regularity conditions of the type typically met in theorems of asymptotic statistical inference, and at the same time sufficiently rich to contain many of the commonly used statistical models, including the (sufficiently smooth) curved exponential families. The author defines the class of analytic models, derives its basic mathematical and probabilistic properties, shows that it contains a wide range of common statistical models, and demonstrates its applicability in asymptotics.

## 16 TOPICS IN STATISTICAL DEPENDENCE edited by H. W. Block, A. R. Sampson, & T. H. Savits

Proceedings of the Symposium on Dependence in Probability and Statistics, Somerset, Pennsylvania, August 1987.

This was the first symposium dedicated solely to research in the area of positive and negative dependence for the modeling and analysis of multivariate data. Many researchers in this broad and diverse field contribute 41 papers to this volume.
