## Memorial Articles

### A. N. Kolmogorov 1903–1987

The unfathomable influence of Kolmogorov . . . . . NIKOLAI N. CHENTSOV
On density estimation in the view of Kolmogorov's ideas in approximation theory . . . . . RAFAEL HASMINSKII AND ILDAR IBRAGIMOV
Kolomogorov's contributions to mathematical statistics . . . . . ANDREW L. RUKHIN
A. N. Kolmogorov and statistics: A citation bibliography R. M. DUDLEY, STEPHANIE L. COOK, JIMENA LLOPIS AND N. P. PENG

## Articles

Remarks on functional canonical variates, alternating least squares methods and ACE . . . . . ANDREAS BUJA
A decomposition for the likelihood ratio statistic and the Bartlett correction—A Bayesian argument . . . . . PETER J. BICKEL AND J. K. GHOSH
Renewal theory properties of ion channels ANDRÉ ROBERT DABROWSKI, DAVID MCDONALD AND UWE RÖSLER
Bounds on the efficiency of linear predictions using an incorrect covariance function . . . . . MICHAEL L. STEIN
A comparison of generalized cross validation and modified maximum likelihood for estimating the parameters of a stochastic process . . . . . MICHAEL L. STEIN
A sufficient condition for asymptotic sufficiency of incomplete observations of a diffusion process . . . . . CATHERINE F. LAREDO
Inference for a nonlinear counting process regression model IAN W. MCKEAGUE AND KLAUS J. UTIKAL
A Bahadur-type representation for empirical quantiles of a large class of stationary, possibly infinite-variance, linear processes . . . . . C. H. HESSE
Asymptotic properties of a general class of nonparametric tests for survival analysis . . . . . MICHAEL P. JONES AND JOHN CROWLEY
Goodness of fit tests in models for life history data based on cumulative hazard rates . . . . . NILS LID HJORT
Nonparametric Bayes estimators based on beta processes in models for life history data . . . . . NILS LID HJORT
Lower bounds on Bayes factors for multinomial distributions, with application to chi-squared testing . . . . . MOHAN DELAMPADY AND JAMES O. BERGER
On the uniform consistency of Bayes estimates for multinomial probabilities P. DIACONIS AND D. A. FREEDMAN
Bayes' theorem for Choquet capacities . . . . LARRY A. WASSERMAN AND JOSEPH B. KADANE
An omnibus test for departures from constant mean . . DANIEL BARRY AND J. A. HARTIGAN
Sequential allocation for an estimation problem with ethical costs MICHAEL WOODROOFE AND JANIS HARDWICK
Time-sequential point estimation through estimating equations I-SHOU CHANG AND CHAO A. HSIUNG
Sequential confidence regions in inverse regression problems JIUNN T. HWANG AND HUNG-KUNG LIU
Kernel and nearest-neighbor estimation of a conditional quantile P. K. BHATTACHARYA AND ASHIS K. GANGOPADHYAY
Minimax risk over hyperrectangles, and implications DAVID L. DONOHO, RICHARD C. LIU AND BRENDA MACGIBBON
On the asymptotic properties of the jackknife histogram . . . . . C. F. J. WU
Asymptotic chi-square tests for a large class of factor analysis models YASUO AMEMIYA AND T. W. ANDERSON

## Short Communications

Decision theoretic optimality of the CUSUM procedure . . . . . Y. RITOV
Testing linear hypotheses in autoregressions . . . . . JENS-PETER KREISS
Berry–Esseen-type bounds for signed linear rank statistics with a broad range of scores . . . . . MUNSUP SEOH
On probabilities of excessive deviations for Kolmogorov–Smirnov, Cramér–von Mises and chi-square statistics . . TADEUSZ INGLOT AND TERESA LEDWINA
No empirical probability measure can converge in the total variation sense for all distributions . . . . . LUC DEVROYE AND LÁSZLÓ GYÖRFI

## Correction

On $M$-processes and $M$-estimation . . . . . A. H. WELSH

# CALL FOR PAPERS

*THE ANNALS OF APPLIED PROBABILITY*
Volume 1, Number 1, February 1991

The Institute of Mathematical Statistics will publish the first issue of its new journal, *The Annals of Applied Probability,* in February 1991.

In addition to welcoming papers in all the traditional areas of applied probability, the new *Annals* particularly hopes to attract work that develops and deepens the interplay of probability and other fields, including computer science, finance, network modeling, and biology.

Submissions are now being considered for publication and should be directed to:

J. Michael Steele, *Editor*
School of Engineering and Applied Science
E-220 Engineering Quadrangle
Princeton University
Princeton, NJ 08544 (USA)

Four copies should be submitted and authors are requested to follow the instructions which appear at the front of each issue of *The Annals of Probability* or *The Annals of Statistics.*
