

# THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF  
THE INSTITUTE OF MATHEMATICAL STATISTICS

## Articles

- Fluctuations in  $P(\phi)_1$  processes.....JAY ROSEN AND BARRY SIMON 155  
On a class of set-valued Markov processes.....T. E. HARRIS 175  
A martingale approach to infinite systems of interacting processes  
R. A. HOLLEY AND D. W. STROOCK 195  
The multiple range of two-dimensional recurrent walk  
LEOPOLD FLATTO 229  
Asymptotic expansions for sample quantiles.....R.-D. REISS 249  
Some finitely additive probability  
ROGER A. PURVES AND WILLIAM D. SUDDERTH 259  
Local Hölder conditions for the local times of certain stationary Gaus-  
sian processes.....LAURIE DAVIES 277  
Boundary crossing probabilities for sample sums and confidence se-  
quences.....TZE LEUNG LAI 299

## Short Communications

- Central terms of Markov walks.....L. E. MYERS 313  
Asymptotic results for estimators in a subcritical branching process  
with immigration.....M. P. QUINE 319  
Infinite  $F$ -divisibility of integer-valued random variables  
IAN R. JAMES 326  
On the minimum number of fixed length sequences with fixed total  
probability.....JOHN C. KIEFFER 335

## Note

- Correction to "Conditions for continuity of random processes without  
discontinuities of the second kind".....OLAV KALLENBERG 338

---

Vol. 4, No. 2—April 1976

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

*The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.*

---

## OFFICERS

**President:**

Donald L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61801

**President-Elect:**

C. R. Rao, Indian Statistical Institute, 7, S.J.S. Sansanwal Marg, New Delhi 110001 India

**Past President:**

Frederick Mosteller, Department of Statistics, Science Center, Room 603, Harvard University, One Oxford Street, Cambridge, Massachusetts 02138

**Executive Secretary:**

George J. Resnikoff, Department of Statistics, California State University, Hayward 25800 Hillary Street, Hayward, California 94542

**Treasurer:**

Robert M. Elashoff, IMS Business Office, 1367 Laurel Street, San Carlos, California 94070

**Program Secretary:**

William L. Harkness, Pennsylvania State University, University Park, Pennsylvania 16801

**Editor: *Annals of Statistics***

I. R. Savage, Department of Statistics, P.O. Box 2179, Yale Station, New Haven, Connecticut 06520

**Editor: *Annals of Probability***

Patrick Billingsley, Department of Statistics, University of Chicago, Chicago, Illinois 60637

**Managing Editor:**

Donald R. Truax, Department of Mathematics, University of Oregon, Eugene, Oregon 97403

---

**Membership.** Membership dues including a subscription to one *Annals* and *The Institute of Mathematical Statistics Bulletin* are \$24.00 per year for residents of the United States or Canada and \$16.00 per year for residents of other countries. Special rates of \$12.00 per year are available to students. Rates in each category are one-third higher for members who wish both *Annals* as well as the *Bulletin*. Inquiries regarding membership in the Institute should be sent to the Treasurer at the business office.

**Subscription Rates.** Current volumes (six issues per calendar year) of the *Annals of Probability* and the *Annals of Statistics* are each \$30.00. Members of the Institute of Mathematical Statistics pay different rates (see above). Single issues are \$6.00. Back numbers of both *Annals* and the *Annals of Mathematical Statistics* (Volumes 1 through 43) may be purchased from the Treasurer.

**The Annals of Probability**, Volume 4, Number 2, April 1976. Published bimonthly in February, April, June, August, October, and December by The Institute of Mathematical Statistics, IMS Business Office, 1367 Laurel Street, San Carlos, California 94070.

---

Mail to the *Annals of Probability* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

---

PRINTED AT THE  
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at San Carlos, California and at additional mailing offices

## EDITORIAL POLICY

The main purpose of the *Annals of Probability* and the *Annals of Statistics* is to publish contributions to the theory of probability and statistics and to their applications. The emphasis is on importance and interest, not formal novelty and correctness. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. All papers are refereed.

---

### NOTICE

Manuscripts submitted to the *Annals of Probability* should now be sent to the Editor at this address:

PATRICK BILLINGSLEY  
Department of Statistics  
University of Chicago  
Chicago, Illinois 60637

Books to be reviewed should be sent to the Associate Editor for book reviews at this address:

MEYER DWASS  
Department of Mathematics  
Northwestern University  
Evanston, Illinois 60201

# THE ANNALS OF PROBABILITY

## INSTRUCTIONS FOR AUTHORS

**Submission of Papers.** Papers to be submitted for publication should be sent to the Editor of the *Annals of Probability*. (For current address, see the latest issue of the *Annals*.) The original (or xerox copy) should be submitted with two additional copies on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

**Preparation of Manuscripts.** Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. Dittoed or mimeographed papers are acceptable only if completely legible; xerox copies are preferable. When technical reports are submitted, all extraneous sheets and covers should be removed.

**Submission of Reference Papers.** Copies (preferably two) of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

**Title and Abbreviated Title.** The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent. An abbreviated title to be used as a running head is also required, and should be given below the main title. This should normally not exceed 35 characters. For example, a title might be "A Limit Theorem for Conditioned Recurrent Random Walk Attracted to a Stable Law," with the running head "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law", depending on the emphasis to be conveyed.

**Summary.** Each manuscript is required to contain a summary which will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Summary," followed by the title of the paper. Formulas should be used as sparingly as possible. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

**Footnotes.** Footnotes should be reduced to a minimum and, where possible, should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. Footnotes in the text should be identified by superscript numbers and typed together, double-spaced on a separate page.

**Key Words.** Included as the first footnote on page 1 should be the headings:

American Mathematical Society 1970 subject classifications. Primary—; Secondary—.  
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use, as an Appendix to *Mathematical Reviews* Index to Volume 39, June 1970. (See, also, *The Notices of the American Mathematical Society*, June 1970, pp. 616–618, for more details.) The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

**List of Symbols.** A completely typewritten list of symbols, identified typographically, not mathematically, should be attached to the manuscript on a separate page. Distinguish between "oh" and "zero"; "ell" and "one"; "kappa" and "kay"; etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); other letters will be set in italics.

**Figures and Tables.** Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) Tables should be typed on separate pages with accompanying footnotes immediately below the table.

**Formulas.** Fractions in the text are preferably written with the solidus or negative exponent;

thus,  $(a + b)/(c + d)$  is preferred to  $\frac{a + b}{c + d}$ , and

$(2\pi)^{-1}$  or  $1/(2\pi)$  to  $\frac{1}{2\pi}$ . Also,  $a^{b(c)}$  and  $a_{b(c)}$  are pre-

ferred to  $a^{bc}$  and  $a_{bc}$ , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

**References.** References should be typed double-spaced and should follow the style:

[5] Doob, J. L. (1944). The elementary Gaussian processes. *Ann. Math. Statist.* 15 229–282.

In textual material, the format "... Doob (1944) ..." is normally preferred to "... Doob [5] ...". Multiple references can be distinguished as "... Doob (1944a) ...". Abbreviations for journals should be taken from *Mathematical Reviews* Index to Volume 40, 1970, pp. 1683–1702.

**Proofs.** Author will ordinarily receive galley proofs. Corrected galley proofs should be sent to the Managing Editor of the *Annals of Probability* (For current address, see the latest issue of the *Annals*.)
