

THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

- Critical Gaussian multiplicative chaos: Convergence of the derivative martingale
BERTRAND DUPLANTIER, RÉMI RHODES, SCOTT SHEFFIELD
AND VINCENT VARGAS 1769
- Poincaré and logarithmic Sobolev inequalities by decomposition of the energy landscape
GEORG MENZ AND ANDRÉ SCHLICHTING 1809
- Densities for SDEs driven by degenerate α -stable processes XICHENG ZHANG 1885
- Gibbs point process approximation: Total variation bounds using Stein's method
DOMINIC SCHUHMACHER AND KASPAR STUCKI 1911
- The cut-and-paste process HARRY CRANE 1952
- The outliers of a deformed Wigner matrix ANTTI KNOWLES AND JUN YIN 1980
- Nonuniqueness for a parabolic SPDE with $\frac{3}{4} - \varepsilon$ -Hölder diffusion coefficients
CARL MUELLER, LEONID MYTNIK AND EDWIN PERKINS 2032
- Sobolev regularity for a class of second order elliptic PDEs in infinite dimension
GIUSEPPE DA PRATO AND ALESSANDRA LUNARDI 2113
- On regularity properties and approximations of value functions for stochastic differential
games in domains N. V. KRYLOV 2161
- A probabilistic solution to the Stroock–Williams equation GORAN PESKIR 2197
