

# How Many Candles Were On Your Cake The Last Time You Thought About Buying Insurance?

Face it — it's been a long time. Styles have changed. So has your family, maybe even your job. And most likely, the insurance you bought then isn't enough to cover you today. That's why you need coverage that you can easily update as your life changes — IMS Term Life Insurance.

## **We Understand You.**

Finding insurance that's right for you can be difficult and time consuming. But we've done the work for you. Through our research, we've found a Term Life Plan designed to help members of our profession provide for the future of their families. What's more, with insurance purchased through IMS, you can be sure that the plan is constantly being evaluated to better meet the needs of our members.

## **We're Flexible.**

Updating your insurance doesn't

have to be a hassle. With our Term Life Plan, as your needs change, so can

your coverage. Insurance through your association is designed to grow with you — it even moves with you when you change jobs.

## **We're Affordable.**

What good would all these benefits be if no one could afford them? That's why we offer members the additional benefit of reasonable rates, negotiated using our group purchasing power. Find out more about Term Life through IMS; call 1 800 424-9883 or, in Washington, D.C., (202) 457-6820, between 8:30 a.m. and 5:30 p.m. Eastern Time.

## **IMS Insurance**

Designed for the way you live today.  
And tomorrow.

## The 1991 Wald Memorial Lectures

Recursive self-similarity for random trees, random triangulations and  
Brownian excursion ..... DAVID ALDOUS

### Articles

Itô excursion theory for self-similar Markov processes ..... APIALA JUHA VUOLLE  
Intersection local time for points of infinite multiplicity

KRZYSZTOF BURDZY, RICHARD F. BASS AND DAVAR KHOSHNEVISAN

Laws of the iterated logarithm for the local times of symmetric Lévy processes and  
recurrent random walks ..... MICHAEL B. MARCUS AND JAY ROSEN

A law of the iterated logarithm for stochastic processes defined by differential equations  
with a small parameter. .... A. J. HEUNIS AND M. A. KOURITZIN

Lyapunov functions for semimartingale reflecting Brownian motions

RUTH J. WILLIAMS AND PAUL DUPUIS

Rotational representations of transition matrix functions ..... S. KALPAZIDOU

Large deviations for Markov chains with random

transitions ..... TIMO O. SEPPÄLÄINEN

Disagreement percolation in the study of Markov fields

J. VAN DEN BERG AND CHR. MAES

Coexistence in threshold voter models ..... THOMAS M. LIGGETT

A note on inhomogeneous percolation ..... YU ZHANG

Current fluctuations for the asymmetric simple exclusion process

P. A. FERRARI AND L. R. G. FONTES

Asymptotic behavior of the two level measure branching process ..... YADONG WU

Localization of a two dimensional random walk with an attractive path interaction

ERWIN BOLTHAUSEN

The transportation cost from the uniform measure to the empirical measure in

dimension  $\geq 3$  ..... M. TALAGRAND

Entropy and the consistent estimation of joint distributions

PAUL C. SHIELDS AND KATALIN MARTON

Isoperimetric inequalities for distributions of exponential type ..... SERGE BOBKOV

Strong differential subordination and stochastic

integration ..... DONALD L. BURKHOLDER

On Strassen's law of the iterated logarithm in Banach space ..... XIA CHEN

Order of magnitude bounds for expectations involving quadratic forms

MICHAEL J. KLASS AND VICTOR DE LA PEÑA

A law of the logarithm for kernel quantile density estimators. .... XIAOJING XIANG

Distinguishing a sequence of random variables from a random translate of itself

HIROSHI SATO AND YOSHIAKI OKAZAKI

Convergence in distribution of conditional expectations. .... EIMEAR M. GOGGIN

### Book Review

Michel Ledoux and Michel Talagrand: *Probability in Banach Spaces:*

*Isoperimetry and Processes* ..... MARJORIE G. HAHN

*contents (continued)*

Universally consistent conditional $U$ -statistics .....	WINFRIED STUTE	460
A reverse submartingale property of the range .....	J. S. HUANG AND W. J. HUANG	474
Distribution of the maximum of concomitants of selected order statistics	H. N. NAGARAJA AND H. A. DAVID	478

**Time Series**

Identification of nonlinear time series from first order cumulative characteristics	IAN W. MCKEAGUE AND MEI-JIE ZHANG	495
Semiparametric analysis of long-memory time series .....	P. M. ROBINSON	515
Weak convergence of randomly weighted dependent residual empiricals with applications to autoregression .....	HIRA L. KOUL AND MINA OSSIANDER	540

**Acknowledgment of Priority**

Asymptotic theory of a test for the constancy of regression coefficients against the random walk alternative .....	SEIJI NABEYA AND KATSUTO TANAKA	563
