

THE ANNALS of STATISTICS

ISSN (0090-5364)

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Special Invited Paper

- Estimating the stable index α in order to measure tail thickness
WILLIAM H. DUMOUCHEL 1019

Articles

- Elements of multi-Bayesian decision theory S. WEERAHANDI AND J. V. ZIDEK 1032
Ellsberg revisited: a new look at comparative probability PETER C. FISHBURN 1047
General differential and Lagrangian theory for optimal experimental design F. PUKELSHEIM AND D. M. TITTERINGTON 1060
Balance in designed experiments with orthogonal block structure
A. M. HOUTMAN AND T. P. SPEED 1069
Admissibility of invariant tests in the general multivariate analysis of variance problem JOHN I. MARDEN 1086
The effect of dependence on chi-squared and empiric distribution tests of fit LEON J. GLESER AND DAVID S. MOORE 1100
On inconsistent Bayes estimates in the discrete case
DAVID FREEDMAN AND PERSI DIACONIS 1109
Nonparametric inference for rates with censored survival data BRIAN S. YANDELL 1119
On the consistency of cross-validation in kernel nonparametric regression
WING HUNG WONG 1136
Optimal rates of convergence to Bayes risk in nonparametric discrimination JAMES STEPHEN MARRON 1142
Large sample optimality of least squares cross-validation in density estimation PETER HALL 1156
Two sample rank estimators of optimal nonparametric score-functions and corresponding adaptive rank statistics
KONRAD BEHNEN, GEORG NEUHAUS AND FRITS RUYMGAART 1175
On the minimax property for R -estimators of location JOHN R. COLLINS 1190
Uniqueness and Fréchet differentiability of functional solutions to maximum likelihood type equations BRENTON R. CLARKE 1196
Limiting behavior of functionals of the sample spectral distribution
DANIEL MACRAE KEENAN 1206
Estimating events MICHAEL EVANS 1218
Sobolev tests for symmetry of directional data P. E. JUPP AND B. D. SPURR 1225
The asymptotic distribution of principal components roots under local alternatives to multiple roots DAVID E. TYLER 1232
A class of asymptotic tests for principal component vectors DAVID E. TYLER 1243

Short Communications

- The robustness of Stein's two-stage procedure RAMKARAN 1251
Further results on the consistent directions of least squares estimators
SONG-GUI WANG AND C. F. JEFF WU 1257
On the asymptotic distribution of Watson's statistic DONALD A. DARLING 1263

Corrections

- Correction to "Testing whether new is better than used with randomly censored data"
YUAN YAN CHEN, MYLES HOLLANDER AND NAFTALI A. LANGBERG 1267
Correction to "Robustness of Ferguson's Bayes estimator of a distribution function"
ROBERT HANNUM AND MYLES HOLLANDER 1267

Vol. 11, No. 4—December 1983

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS

President:

Ingram Olkin, Department of Statistics, Stanford University, Stanford, California 94305

President-Elect:

Oscar Kempthorne, Department of Statistics, Iowa State University Ames, Iowa 50011

Past President:

Patrick Billingsley, Department of Statistics, University of Chicago, Chicago, Illinois 60637

Executive Secretary:

Kjell Doksum, Department of Statistics, University of California, Berkeley, California 94720

Treasurer:

Bruce E. Trumbo, Department of Statistics, California State University, Hayward, California 94542

Send correspondence to: IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545

Program Secretary:

Richard Johnson, Department of Statistics, University of Wisconsin, 1210 West Dayton St., Madison, Wisconsin 53706

Editor: *Annals of Statistics*

Michael D. Perlman, Department of Statistics, University of Washington, Seattle, Washington 98195

Editor: *Annals of Probability*

Harry Kesten, Department of Mathematics, Cornell University, Ithaca, N.Y. 14853

Editor: *IMS Bulletin*

William C. Guenther, University of Wyoming, Box 3332, University Station, Laramie, Wyoming 82071.

Send correspondence to: Box 332 University Station, Laramie, Wyoming.

Editor: *IMS Lecture Notes-Monograph Series*

Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907

Managing Editor:

Prem K. Goel, Department of Statistics, The Ohio State University, Columbus, Ohio 43210

Membership. Membership dues including a subscription to one *Annals* and *The Institute of Mathematical Statistics Bulletin* are \$37.00 per year for all members. Special rates of \$17.00 per year are available to students. The dues are approximately twenty five percent higher for members who wish both *Annals* as well as the *Bulletin*. Inquiries regarding membership in the Institute should be sent to the Treasurer at the Business Office.

Subscription Rates. Current volumes (four issues per calendar year) of the *Annals of Probability* are \$48.00. Single issues are \$13.00 each. Current volumes (four issues per calendar year) of the *Annals of Statistics* are \$55.00. Single issues are \$15.00 each. Members of the Institute of Mathematical Statistics pay different rates (see above). Back numbers of both *Annals* and the *Annals of Mathematical Statistics* (Volume 1 through 43) may be purchased from the Treasurer at the business office.

The Annals of Statistics. Volume 11, Number 4, December 1983. Published in March, June, September, and December by The Institute of Mathematical Statistics, IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545.

Mail to the *Annals of Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should not be addressed to Waverly Press.

PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Hayward, California and at additional mailing offices

EDITORIAL POLICY

The main purpose of the *Annals of Statistics* and the *Annals of Probability* is to publish significant contributions to the theory of statistics and probability and their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient for publication. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. Because statistics is an evolving discipline, the Editors of the *Annals of Statistics* take a broad view of its domain and welcome papers in interface areas. Contributors to the *Annals of Statistics* should review the editorial in the January 1980 issue. All papers are refereed.

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) The original (or xerox copy) should be submitted with three additional copies on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. Dittoed or mimeographed papers are acceptable only if completely legible; xerox copies are preferable. When technical reports are submitted, all extraneous sheets and covers should be removed.

Submission of Reference Papers. Four copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title and Abbreviated Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent. An abbreviated title to be used as a running head is also required, and should be given below the main title. This should normally not exceed 35 characters. For example, a title might be "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," with the running head "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

Summary. Each manuscript is required to contain a summary, which will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Summary," followed by the title of the paper. Formulas should be used as sparingly as possible. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should be reduced to a minimum and, where possible, should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. Footnotes in the text should be identified by superscript numbers and typed together, double-spaced, on a separate page.

Key Words. Included as the first footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; Secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero", "ell" and "one"; "epsilon" and "element of"; "kappa" and "kay," etc. Indicate also when special type is required (Greek, German, script, bold-face, etc.); other letters will be set in italics. Acronyms should be introduced sparingly.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions in the text are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$ is preferred to $\frac{a + b}{c + d}$, and $(2\pi)^{-1}$ or $1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred to a_{b_c}

and a_{b_c} , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Wilks, S.S. (1938). The large-sample distribution of the likelihood ratio for testing composite hypotheses. *Ann. Statist.* **1** 60–62.

In textual material, the format "... Wilks (1938) ..." should be used. Multiple references can be distinguished as "... Wilks (1938a) ..." Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Proofs. Author will ordinarily receive galley proofs. Corrected galley proofs should be sent to the Managing Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.)
