Articles

The Erdős-Rényi law in distribution, for coin tossing and sequence matching	R. ARRATIA, L. GORDON AND M. S. WATERMAN	539
Statistical composition of high-scoring segments from molecular sequences	SAMUEL KARLIN, AMIR DEMBO AND TSUTOMU KAWABATA	571
Random truncation models and Markov processes	NIELS KEIDING AND RICHARD D. GILL	582
Bayes estimation from a Markov renewal process	MICHAEL J. PHELAN	603
Subjective hierarchical Bayes estimation of a multivariate normal mean: On the frequentist interface	JAMES O. BERGER AND CHRISTIAN ROBERT	617
Hotelling's theorem on the volume of tubes: Some illustrations in simultaneous inference and data analysis	SØREN JOHANSEN AND IAIN M. JOHNSTONE	652
Volumes of tubular neighborhoods of spherical polyhedra and statistical inference	DANIEL Q. NAIMAN	685
Large-sample inference for log-spline models	CHARLES J. STONE	717
Consistency for ACE-type methods	ROBERT KOYAK	742
A risk bound in Sobolev class regression	GRIGORI K. GOLUBEV AND MICHAEL NUSSBAUM	758
On the density of minimum contrast estimators	IB M. SKOVGAARD	779
Marginalization and collapsibility in graphical interaction models	MORTEN FRYDENBERG	790
Fourier methods for estimating mixing densities and distributions	CUN-HUI ZHANG	806
Nonparametric estimation of a probability density on a Riemannian manifold using Fourier expansions	HARRIE HENDRIKS	832
Uniform asymptotic optimality of linear predictions of a random field using an incorrect second-order structure	MICHAEL STEIN	850
Data-driven bandwidth choice for density estimation based on dependent data	JEFFREY D. HART AND PHILIPPE VIEU	873
Asymptotic distribution of robust estimators for nonparametric models from mixing processes	GRACIELA BOENTE AND RICARDO FRAIMAN	891
Estimating a regression function	SARA VAN DE GEER	907
Achieving information bounds in non and semiparametric models	Y. RITOV AND P. J. BICKEL	925
Weakly adaptive estimators in explosive autoregression	HIRA L. KOUL AND GEORG CH. PFLUG	939
Canonical partial autocorrelation function of a multivariate time series	SERGE DÉGERINE	961
Improved confidence intervals for a normal variance	GLENN SHORROCK	972

Short Communication

Edgeworth series for lattice distributions	JOHN E. KOLASSA AND PETER MCCULLAGH	981
--	-------------------------------------	-----

Correction

Adaptive L -estimation for linear models	STEPHEN PORTNOY AND ROGER KOENKER	986
--	-----------------------------------	-----

Vol. 18, No. 2—June 1990

INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute is to foster the development and dissemination of the theory and applications of statistics and probability.

OFFICERS AND EDITORS

- President:** Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907
President-Elect: David O. Siegmund, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305
Past President: Ram Gnanadesikan, Morris Research and Engineering Center, Bell Communications Research, 435 South Street, Morristown, New Jersey 07960-1961
Executive Secretary: Peter Purdue, Department of Operations Research, Code 55, Naval Postgraduate School, Monterey, California 93943
Treasurer: Jessica Utts, Division of Statistics, University of California, Davis. *Please send correspondence to:* IMS Business Office, 3401 Investment Boulevard #7, Hayward, California 94545
Program Secretary: Lynne Billard, Department of Statistics, University of Georgia, Athens, Georgia 30602
Editor, *The Annals of Statistics*: Arthur Cohen, Department of Statistics, Busch Campus, Rutgers University, New Brunswick, New Jersey 08903
Editor, *The Annals of Probability*: Peter Ney, Department of Mathematics, Van Vleck Hall, University of Wisconsin, 480 Lincoln Drive, Madison, Wisconsin 53706
Editor, *The Annals of Applied Probability*: J. Michael Steele, School of Engineering and Applied Science, E-220 Engineering Quadrangle, Princeton University, Princeton, New Jersey 08544
Executive Editor, *Statistical Science*: Carl N. Morris, Statistical Sciences Center, RLM 8.100, University of Texas, Austin, Texas 78712
Editor, *The IMS Bulletin*: George P. H. Styan, Department of Mathematics and Statistics, Burnside Hall, McGill University, 805 Sherbrooke Street West, Montreal PQ, Canada H3A 2K6
Editor, *The IMS Lecture Notes—Monograph Series*: Robert J. Serfling, Department of Mathematical Sciences, Johns Hopkins University, Baltimore, Maryland 21218
Managing Editor: Roger L. Berger, Department of Statistics, Box 8203, North Carolina State University, Raleigh, North Carolina 27695
Managing Editor: Paul Shaman, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302

Journals. The scientific journals of the Institute are *The Annals of Statistics*, *The Annals of Probability* and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

Individual and Organizational Memberships. All *individual members* receive *The IMS Bulletin* for basic membership dues of \$30. Each regular member must elect to receive at least one scientific journal for an additional amount, as follows: *Statistical Science* (\$5), one *Annals* (\$15) or two *Annals* (\$25). Dues allocations to each journal are set by Council resolution. Of the total dues paid, \$12 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journal(s) received. Reduced membership dues are available to full-time students, permanent residents of countries designated by the IMS Council and retired members. Retired members may elect to receive the *Bulletin* only for \$12. *Organizational memberships* are available to nonprofit organizations at \$270 per year and to for-profit organizations at \$585 per year. Organizational memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by and mailed to an individual. Individual subscriptions for 1990 are available to both *Annals* and *Statistical Science* (\$96), one *Annals* and *Statistical Science* (\$60), both *Annals* (\$72), one *Annals* (\$45), *Statistical Science* (\$30) and *The IMS Bulletin* (\$20). *General subscriptions* are for libraries, institutions and any multiple-readership use. General subscriptions for 1990 are available to both *Annals* and *Statistical Science* (\$180), one *Annals* and *Statistical Science* (\$105), both *Annals* (\$145), one *Annals* (\$90), *Statistical Science* (\$45) and *The IMS Bulletin* (\$30). Air mail rates for overseas delivery are \$50 per title.

Permissions policy. Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided that the base fee of \$5.00 per copy, plus \$0.00 per page is paid directly to the Copyright Clearance Center, 27 Congress Street, Salem, Massachusetts 01970. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is: 0090-5364/90 \$5.00 + .00.

Correspondence. Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content) or the Managing Editor (production).

***The Annals of Statistics* (ISSN 0090-5364)**, Volume 18, Number 2, June, 1990. Published in March, June, September and December by the Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545. Second-class postage paid at Hayward, California and at additional mailing offices. **POSTMASTER:** Send address changes to *The Annals of Statistics*, Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545.

EDITORIAL POLICY

The main purpose of *The Annals of Statistics* and *The Annals of Probability* is to publish significant contributions to the theory of statistics and probability and their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient for publication. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. Because statistics is an evolving discipline, the Editors of *The Annals of Statistics* take a broad view of its domain and welcome papers in interface areas. Contributors to *The Annals of Statistics* should review the editorial in the January 1980 issue. All papers are refereed.

ADDITIONAL GUIDELINES FOR PREPARING PAPERS FOR THE ANNALS OF STATISTICS

1. The introduction and/or abstract should contain a statement pertaining to the statistical importance of the paper. Sometimes this is clear when reference is made to previous work. Statistical importance, not mathematical complexity for its own sake, is the prime criterion for publication.
2. The introduction should be thorough and contain clear yet nontechnical descriptions of the important results. Furthermore, the introduction should give a clear indication of where in the paper the main results and conclusions are to be found.
3. In papers where the formulation is general and mathematically abstract, when appropriate, the author should provide a short development of a special case, an example, or an illustration of the results. If possible, the special case or example should be in the introduction or shortly thereafter.
4. The manuscript should be proofread thoroughly before being submitted. Manuscripts with many typographical errors will cause unnecessary delays and may require resubmission.

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of *The Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) Four copies should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned. All manuscripts should be accompanied by a cover letter.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Submission of Reference Papers. Four copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also **required**. This should normally not exceed 35 characters. For example, an article with the title "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," could have the running head, "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

Affiliation. Indicate your present institutional affiliation as you would like it to appear.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; secondary—.

Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be

found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$ is preferred to $\frac{a + b}{c + d}$, and $(2\pi)^{-1}$

or $1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred

to a^{b^c} and a_{b^c} , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Kiefer, J. C. (1976). Admissibility of conditional confidence procedures. *Ann. Statist.* 4 836–865.

In textual material, the format "... Keifer (1976)..." should be used. Multiple references can be distinguished as "... Kiefer (1976a)..." Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Addresses. The permanent address of each author should be typed following the references.

Galley Proofs. The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to AOS Redactory, Science Typographers, Inc., 15 Industrial Boulevard, Medford, NY 11763.

Correspondence. All correspondence with the Editor must refer to the manuscript number of the paper. This number will be on the card sent to the author acknowledging receipt of the article.
