Articles

- Rough large deviation estimates for simulated annealing.
Application to exponential schedules. OLIVIER CATONI
- Large deviations for exchangeable random vectors. I. H. DINWOODIE AND S. L. ZABELL
- Binomial mixtures and finite exchangeability. G. R. WOOD
- Random stationary processes. KENNETH S. ALEXANDER AND STEVEN A. KALIKOW
- String matching: The ergodic case. PAUL C. SHIELDS
- A note on the convergence of sums of independent random variables ADOLF HILDEBRAND
- One-sided refinements of the strong law of large numbers
and the Glivenko–Cantelli theorem. DAVID GILAT AND T. P. HILL
- A difference prophet inequality for bounded i.i.d. variables, with cost
for observations. ESTER SAMUEL-CAHN
- On generalized renewal measures and certain first passage times. GEROLD ALSMEYER
- Decoupling and Khintchine’s inequalities for U -statistics. VICTOR H. DE LA PEÑA
- Functional laws of the iterated logarithm for the increments
of empirical and quantile processes. PAUL DEHEUVELS AND DAVID M. MASON
- Some large-deviation theorems for branching diffusions. TZONG-YOW LEE
- Limit theorems for the frontier of a one-dimensional branching diffusion
S. LALLEY AND T. SELLKE
- Renormalization and limit theorems for self-intersections of superprocesses JAY ROSEN
- Asymptotic series and exit time probabilities. W. H. FLEMING AND M. R. JAMES
- Conditional exits for small noise diffusions with characteristic boundary. MARTIN V. DAY
- Quasi-invariance of product measures under Lie group perturbations:
Fisher information and L^2 -differentiability
MAURO S. DE F. MARQUES AND LUIZ SAN MARTIN
- When does the Ramer formula look like the Girsanov formula?
M. ZAKAI AND O. ZEITOUNI
- Sur la régularité des fonctions aléatoires d’Ornstein–Uhlenbeck à valeurs
dans l_p , $p \in [1, \infty[$ X. FERNIQUE
- Semi-min-stable processes. MATHEW D. PENROSE
- An extension of Pitman’s theorem for spectrally positive Lévy processes. JEAN BERTOIN
- On the distribution of the Hilbert transform of the local time
of a symmetric Lévy process. P. J. FITZSIMMONS AND R. K. GETOOR
- A note on planar Brownian motion. STELLA BRASCESCO
- The Stein–Chen method, point processes and compensators
A. D. BARBOUR AND TIMOTHY C. BROWN
- Clustering in the one-dimensional three-color cyclic cellular automaton. ROBERT FISCH
- Automorphism invariant measures on trees. ROBIN PEMANTLE
- The cycle structure of random permutations. RICHARD ARRATIA AND SIMON TAVARÉ
- Isoperimetric inequalities and transient random walks on graphs. CARSTEN THOMASSEN

Correction

- Path properties of index- β stable fields. JOHN B. NOLAN

**Current Issues in
Statistical Inference:
Essays in Honor of D. Basu**

edited by
M. Ghosh & P. K. Pathak

D. Basu's emphasis has always been on foundations and underlying concepts rather than on technicalities. In keeping with his philosophy, essays in this festschrift volume, dedicated to Basu on the occasion of his 65th birthday, place the major emphasis on the foundational issues of statistical inference. Most of the papers in this volume are review articles written by his friends and colleagues in those areas of statistics that have interested Basu most during his active research career—information, likelihood, ancillarity, randomization, fiducial probabilities, logical foundations of survey sampling, and many related concepts. These papers are also written in a narrative style which has typified so much of Basu's own writings in statistics.

Contents

Conditional inference from confidence sets *by G. Casella*; Intervention experiments, randomization and inference *by O. Kempthorne*; Ancillarity *by E. L. Lehmann & F. W. Scholz*; The Pitman closeness of statistical estimators: Latent years and the renaissance *by P. K. Sen*; Unbiased sequential binomial estimation *by Bimal K. Sinha & Bikas K. Sinha*; Sufficiency *by S. Yamada & H. Morimoto*; Foundations of statistical quality control *by R. E. Barlow & T. Z. Irony*; Prequential data analysis *by A. P. Dawid*; Bayesian nonparametric inference *by T. S. Ferguson, E. G. Phadia, & R. C. Tiwari*; Hierarchical and empirical Bayes multivariate estimation *by M. Ghosh*; Basu's contributions to the foundations of sample survey *by G. Meeden*; Survey sampling—As I understand it *by V. P. Godambe*; Two basic partial orderings for distributions derived from Schur functions and majorization *by K. Joag-Dev & J. Sethuraman*; Optimal integration of surveys *by P. K. Pathak & M. Fahimi*; The model based (prediction) approach to finite population sampling theory *by R. M. Royall*; Sampling theory using experimental design concepts *by J. Srivastava & Z. Ouyang*
