

THE ANNALS of STATISTICS

ISSN (0090-5364)

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Memorial Article

Harald Cramér 1893–1985 GUNNAR BLOM 1335

Articles

- The nonexistence of $100(1 - \alpha)\%$ confidence sets of finite expected diameter
in errors-in-variables and related models . . . LEON JAY GLESER AND JIUNN T. HWANG 1351
- Conditionally acceptable recentered set estimators GEORGE CASELLA 1363
- Conditional properties of interval estimators of the normal variance
JON M. MAATTA AND GEORGE CASELLA 1372
- Estimating the mean of a normal distribution with loss equal to squared error
plus complexity cost PETER J. KEMPTHORNE 1389
- On local and nonlocal measures of efficiency
WILBERT C. M. KALLENBERG AND TERESA LEDWINA 1401
- Some classes of global Cramér–Rao bounds
B. Z. BOBROVSKY, E. MAYER-WOLF AND M. ZAKAI 1421
- Belief function representations of statistical evidence PETER WALLEY 1439
- Distributions on partitions . . ROBERT KEENER, EDWARD ROTHMAN AND NORMAN STARR 1466
- Comparisons of optimal stopping values and prophet inequalities for negatively
dependent random variables YOSEF RINOTT AND ESTER SAMUEL-CAHN 1482
- On Kullback–Leibler loss and density estimation PETER HALL 1491
- Asymptotically optimal bandwidth selection for kernel density estimators from
randomly right-censored samples J. S. MARRON AND W. J. PADGETT 1520
- Strong consistency of a nonparametric estimator of the survival function with
doubly censored data MYRON N. CHANG AND GRACE L. YANG 1536
- Consistent estimation of the influence function of locally asymptotically linear
estimators CHRIS A. J. KLAASSEN 1548
- Heteroscedasticity-robustness of jackknife variance estimators in linear models
JUN SHAO AND C. F. J. WU 1563
- On preliminary test and shrinkage M -estimation in linear models
PRANAB KUMAR SEN AND A. K. M. EHSANES SALEH 1580
- An application of the Kiefer–Wolfowitz equivalence theorem to a problem
in Hadamard transform optics CHING-SHUI CHENG 1593
- On the optimality of finite Williams II(a) designs J. KUNERT AND R. J. MARTIN 1604
- A-optimal block designs for comparing test treatments with a control JOHN STUFKEN 1629
- Best equivariant estimators of a Cholesky decomposition
MORRIS L. EATON AND INGRAM OLKIN 1639
- Estimation of parameter matrices and eigenvalues in MANOVA and canonical
correlation analysis PUI LAM LEUNG AND ROBB J. MUIRHEAD 1651
- Adaptive prediction by least squares predictors in stochastic regression models
with applications to time series C. Z. WEI 1667
- Testing that a stationary time series is Gaussian T. W. EPPS 1683
- Strong convergence of distributions of estimators P. JEGANATHAN 1699

Short Communications

- A note on the variance of a stopping time ROBERT KEENER 1709
- On a partial correction by the bootstrap REGINA Y. LIU AND KESAR SINGH 1713

Vol. 15, No. 4—December 1987

OFFICERS AND EDITORS

President:

Bradley Efron, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305

President-Elect:

Ram Gnanadesikan, Morris Research and Engineering Center, Bell Communications Research, 435 South Street, Morristown, New Jersey 07960-1961

Past President:

Ronald Pyke, Department of Mathematics GN-50, University of Washington, Seattle, Washington 98195

Executive Secretary:

Peter Purdue, Department of Operations Research, Code 55, Naval Postgraduate School, Monterey, California 93943

Treasurer:

Nicholas P. Jewell, Group in Biostatistics, University of California, Berkeley. *Please send correspondence to:* IMS Business Office, 3401 Investment Boulevard #7, Hayward, California 94545

Program Secretary:

Lynne Billard, Department of Statistics, University of Georgia, Athens, Georgia 30602

Editor: *The Annals of Statistics*

Willem R. van Zwet, Department of Mathematics, University of Leiden, P.O. Box 9512, 2300 RA Leiden, The Netherlands

Editor: *The Annals of Probability*

Thomas M. Liggett, Department of Mathematics, University of California, Los Angeles, California 90024

Executive Editor: *Statistical Science*

Morris H. DeGroot, Department of Statistics, Carnegie Mellon University, Pittsburgh, Pennsylvania 15213

Editor: *The IMS Bulletin*

George P. H. Styan, Department of Mathematics and Statistics, Burnside Hall, McGill University, 805 Sherbrooke Street West, Montreal PQ, Canada H3A 2K6

Editor: *The IMS Lecture Notes—Monograph Series*

Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907

Managing Editor:

Paul Shaman, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104

Journals. The scientific journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

Individual, Institutional, and Corporate Memberships. All *individual members* receive *Statistical Science* and *The IMS Bulletin* for a basic annual dues rate of \$30. Individual members may elect to receive one *Annals* for an additional \$10 or both *Annals* for an additional \$20. Dues allocations to each journal are set by Council resolution. Of the total dues paid, \$8 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journals received. Memberships are available at a reduced rate (40% of regular rates) for full-time students, permanent residents of developing countries, and retired members. Retired members may also elect to receive the *Bulletin* only for \$10. *Institutional memberships* are available to nonprofit organizations at \$230 per year and *corporate memberships* are available to other organizations at \$500 per year. Institutional and corporate memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis. For 1987, all subscriptions to one or both *Annals* automatically include one subscription to *Statistical Science*. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1987 are available to both *Annals* and *Statistical Science* (\$79), one *Annals* and *Statistical Science* (\$52), *Statistical Science* only (\$25), and *The IMS Bulletin* (\$15). *General subscriptions* are for libraries, institutions, and any multiple-readership use. General subscriptions for 1987 are available to both *Annals* and *Statistical Science* (\$160), one *Annals* and *Statistical Science* (\$85), *Statistical Science* only (\$40), and *The IMS Bulletin* (\$20). Air mail rates for overseas delivery of general subscriptions are \$40 per title.

Correspondence. Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content), or the Managing Editor (production).

***The Annals of Statistics* (ISSN 0090-5364)**, Volume 15, Number 4, December 1987. Published in March, June, September, and December by the Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster:** Send address changes to *The Annals of Statistics*, Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545.

EDITORIAL POLICY

The main purpose of *The Annals of Statistics* and *The Annals of Probability* is to publish significant contributions to the theory of statistics and probability and their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient for publication. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. Because statistics is an evolving discipline, the Editors of *The Annals of Statistics* take a broad view of its domain and welcome papers in interface areas. Contributors to *The Annals of Statistics* should review the editorial in the January 1980 issue. All papers are refereed.

NOTICE

Manuscripts submitted for *The Annals of Statistics* should be sent to the Editor at the following address:

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of *The Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) Four copies should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned. All manuscripts should be accompanied by a cover letter.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Submission of Reference Papers. Four copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also **required**. This should normally not exceed 35 characters. For example, an article with the title "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," could have the running head, "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

Affiliation. Indicate your present institutional affiliation as you would like it to appear.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be

found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter article; generally they should be taken from the title of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "summation" and "capital sigma," etc. Be careful also when special type is required (Greek letters, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn to the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typewritten on separate pages with accompanying footnotes placed immediately below the table.

Formulas. Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$ is preferred to $\frac{a + b}{c + d}$, and $(2$

or $1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are pre-

ferred to a^{b_c} and a_{b_c} , respectively. Complicated exponents should be represented with the symbol \exp . A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Kiefer, J. C. (1976). Admissibility of conditional confidence procedures. *Ann. Statist.* 4 836–865.

In textual material, the format "... Kiefer (1976)..." should be used. Multiple references are distinguished as "... Kiefer (1976a)..." . Abbreviations for journals should be taken from a current index of *Mathematical Reviews*.

Addresses. The permanent address of each author should be typed following the references.

Galley Proofs. The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to AOS Redactory, Science Typographers, Inc., Industrial Boulevard, Medford, NY 11763.

Correspondence. All correspondence with the Editor must refer to the manuscript number of the paper. The number will be on the card sent to the author acknowledging receipt of the article.
