“If it weren’t for IMS Members’ Life Insurance, I’d be underinsured . . . by thousands of dollars!”

“...With the future I have planned—marriage, a home, a family—my company policy just wouldn’t be enough. So I bought low-cost term life insurance through my membership.”

Starting a personal insurance program when you’re young and healthy is smart, because it’s easier to qualify. For a low cash outlay, your program is off to a good start. And even though rates go up as you get older, they are still affordable because of our group’s buying power.

Further, should you change jobs—as long

as you remain a member—your group term life insurance goes with you...everywhere.

Are you underinsured? Think about your future. Then, to build up your insurance program, call or write the Administrator.

**UP TO \$240,000 IN
TERM LIFE INSURANCE PROTECTION IS
AVAILABLE TO IMS MEMBERS.**

The IMS Life Plan is underwritten by New York Life Insurance Company, New York, New York 10010 on form number GT-2-PA-9400.

**Contact Administrator,

Differential Geometry in Statistical Inference

*by S.-I. Amari, O. E. Barndorff-Nielsen, R. E. Kass, S. L. Lauritzen,
and C. R. Rao*

The papers collected here present, in a concise yet comprehensive form, several major developments of recent research on differential geometry in statistics.

Contents

Introduction by R. E. Kass

Differential Geometrical Theory of Statistics—Towards New Developments
by S.-I. Amari

Introduction; Geometrical Structure of Statistical Models; Higher-Order Asymptotic Theory of Statistical Inference in Curved Exponential Family; Information, Sufficiency and Ancillarity Higher Order Theory; Fibre-Bundle Theory of Statistical Models; Estimation of Structural Parameter in the Presence of Infinitely Many Nuisance Parameters; Parametric Models of Stationary Gaussian Time Series; References

Differential and Integral Geometry in Statistical Inference by O. E. Barndorff-Nielsen

Introduction; Review and Preliminaries; Transformation Models; Transformation Submodels; Maximum Estimation and Transformation Models; Observed Geometries; Expansion of $c|j|^{1/2}$; Exponential Transformation Models; Appendices and References

Statistical Manifolds by S. L. Lauritzen

Introduction; Some Differential Geometric Background; The Differential Geometry of Statistical Models; Statistical Manifolds; The Univariate Gaussian Manifold; The Inverse Gaussian Manifold; The Gamma Manifold; Two Special Manifolds; Discussion and Unsolved Problems; References

Differential Metrics in Probability Spaces by C. R. Rao

Introduction; Jensen Difference and Entropy Differential Metric; The Quadratic Entropy; Metrics Based on Divergence Measures; Other Divergence Measures; Geodesic Distances; References
