

# THE ANNALS *of* STATISTICS

AN OFFICIAL JOURNAL OF THE  
INSTITUTE OF MATHEMATICAL STATISTICS

## Articles

Random fields of multivariate test statistics, with applications to shape analysis . . . . .	J. E. TAYLOR AND K. J. WORSLEY	1
Rodeo: Sparse, greedy nonparametric regression . . . . .	JOHN LAFFERTY AND LARRY WASSERMAN	28
Approximation and learning by greedy algorithms . . . . .	ANDREW R. BARRON, ALBERT COHEN, WOLFGANG DAHMEN AND RONALD A. DEVORE	64
Stability of the Gibbs sampler for Bayesian hierarchical models . . . . .	OMIROS PAPASPILIOPOULOS AND GARETH ROBERTS	95
High breakdown point robust regression with censored data . . . . .	MATÍAS SALIBIAN-BARRERA AND VÍCTOR J. YOHAI	118
Weighted empirical likelihood in some two-sample semiparametric models with various types of censored data . . . . .	JIAN-JIAN REN	147
A test for model specification of diffusion processes . . . . .	SONG XI CHEN, JITI GAO AND CHENG YONG TANG	167
Regularized estimation of large covariance matrices . . . . .	PETER J. BICKEL AND ELIZAVETA LEVINA	199
Smooth backfitting in generalized additive models KYUSANG YU, BYEONG U. PARK AND ENNO MAMMEN		228
Variable selection in semiparametric regression modeling . . .	RUNZE LI AND HUA LIANG	261
Mixed-rates asymptotics . . . . .	PETER RADCHENKO	287
Nonlinear estimation for linear inverse problems with error in the operator . . . . .	MARC HOFFMANN AND MARKUS REISS	310
Generalizing Simes' test and Hochberg's stepup procedure . . . . .	SANAT K. SARKAR	337
On false discovery control under dependence . . . . .	WEI BIAO WU	364
Properties of higher criticism under strong dependence	PETER HALL AND JIASHUN JIN	381
Endogenous post-stratification in surveys: Classifying with a sample-fitted model . . . . .	F. JAY BREIDT AND JEAN D. OPSOMER	403
Locally D-optimal designs based on a class of composed models resulted from blending Emax and one-compartment models . . .	X. FANG AND A. S. HEDAYAT	428
A complementary design theory for doubling . . . . .	HONGQUAN XU AND CHING-SHUI CHENG	445
Asymptotic inference in some heteroscedastic regression models with long memory design and errors . . . . .	HONGWEN GUO AND HIRA L. KOUL	458
