

THE ANNALS *of* STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Consistency of maximum likelihood estimation for some dynamical systems KEVIN MCGOFF, SAYAN MUKHERJEE, ANDREW NOBEL AND NATESH PILLAI	1
Saturated locally optimal designs under differentiable optimality criteria LINWEI HU, MIN YANG AND JOHN STUFKEN	30
Fast community detection by SCORE	JIASHUN JIN 57
A new permutation test statistic for complete block designs INGA SAMONENKO AND JOHN ROBINSON	90
ROP: Matrix recovery via rank-one projections	T. TONY CAI AND ANRU ZHANG 102
Graph-based change-point detection	HAO CHEN AND NANCY ZHANG 139
Matrix estimation by Universal Singular Value Thresholding	SOURAV CHATTERJEE 177
Consistency of spectral clustering in stochastic block models JING LEI AND ALESSANDRO RINALDO	215
On the efficiency of pseudo-marginal random walk Metropolis algorithms CHRIS SHERLOCK, ALEXANDRE H. THIERY, GARETH O. ROBERTS AND JEFFREY S. ROSENTHAL	238
On the block maxima method in extreme value theory: PWM estimators ANA FERREIRA AND LAURENS DE HAAN	276
Sparsistency and agnostic inference in sparse PCA	JING LEI AND VINCENT Q. VU 299
Intermittent process analysis with scattering moments	JOAN BRUNA, STÉPHANE MALLAT, EMMANUEL BACRY AND JEAN-FRANÇOIS MUZY 323
Hypothesis testing for high-dimensional sparse binary regression RAJARSHI MUKHERJEE, NATESH S. PILLAI AND XIHONG LIN	352
Universality for the largest eigenvalue of sample covariance matrices with general population	ZHIGANG BAO, GUANGMING PAN AND WANG ZHOU 382
Fixed points of the EM algorithm and nonnegative rank boundaries KAIE KUBJAS, ELINA ROBEVA AND BERND STURMFELS	422
Correction to the proof of consistency of community detection	PETER J. BICKEL, AIYOU CHEN, YUNPENG ZHAO, ELIZAVETA LEVINA AND JI ZHU 462
