Analytic Geometry and Calculus

By FREDERICK S. WOODS and FREDERICK H. BAILEY, Professors of Mathematics, Massachusetts Institute of Technology.

A Revision and Abridgment of the Authors'

Course in Mathematics for Students of Engineering and Applied Science

HERE in one volume is work which may be completely covered by an average college class in two years. After the early lessons, it does not teach calculus and analytic geometry as separate subjects, but calls for the processes of either as needed. The range of practical applications has not been diminished, and methods of approximation, including the determination of empirical equations, the use of Taylor's series in calculation, and approximate integration have been added. The problems number two thousand..... **$3.00**
