Ph.D. MATHEMATICIANS

Our Systems Analysis Department has openings for Ph.D. Mathematicians who have a lasting interest in some fields of Mathematics such as Algebra, Geometry, Measure Theory, Topology, Differential Equations, Numerical Analysis, Statistics, or Probability Theory. Association will be with others with similar educational background engaged in the study of challenging problems vital to the nation's welfare.

The work is of an independent research nature with supervision at a minimum and by people of similar interests who are aware of the needs of research personnel.

Sandia Corporation, engaged in research and development of nuclear weapons, is located in Albuquerque, N.M.—a metropolitan city of 208,000 famous for its splendid climate and its outstanding recreational and cultural attractions. Excellent working conditions and liberal employee benefits, including generous vacations and holidays; retirement, hospital, and insurance plans.

**HAVE YOU REGISTERED WITH THE
MATHEMATICAL SCIENCES SECTION**
of the
**NATIONAL REGISTER OF SCIENTIFIC
AND TECHNICAL PERSONNEL?**

At the request of the National Science Foundation, the American Mathematical Society is assembling and maintaining a register of mathematicians and mathematical scientists. The mathematics register is a section of the National Register of Scientific and Technical Personnel, which is an official responsibility of the Foundation. The purpose of the Register is to provide up-to-date information on the scientific manpower resources of the United States.

As a result of the splendid cooperation accorded to the project by most of the mathematicians and mathematical scientists who have received questionnaires to fill in, the mathematical section of the Register is now remarkably complete. However there are still a few gaps to be filled in.

If you have received a National Register questionnaire from the Society, won't you please fill it in now and send it to the Headquarters Offices of the Society at 190 Hope Street, Providence 6, Rhode Island?

If you have never received a questionnaire and feel that you are qualified for inclusion in the Register, please drop us a note to that effect at the above address.

BETTER YOUR FUTURE AT BETTIS!

mathematician

To: Personnel Director

From: Project Manager

Position: Senior Mathematician—Ph.D. or equivalent with demonstrated research potential or ability in applied mathematics.

Date Required: As soon as possible.

Salary: Open.

Also: Junior Mathematicians—B.S. with honors; courses through differential equations.

U. S. Citizenship required.

INTRODUCTION to MULTIVARIATE STATISTICAL ANALYSIS *

By *T. W. Anderson, Columbia University*. In circumstances where several measurements are made on an object or individual, and where these measurements are to be analyzed simultaneously, the proper use of analytical procedures are necessary for the achievement of correct solutions. This book discusses many of the procedures used in multivariate analysis. Incorporating much information previously available only in widely scattered notes and journal articles, it helps the reader to determine his approach to statistical problems. It deals with such topics as correlation theory, distribution theorems, and the testing of hypotheses. It also covers the use of the method of maximum likelihood. Descriptive examples appear throughout the book, and the appendix includes a briefing on matrix algebra. Some of the more advanced developments in the field are touched upon in the final chapter. 1958. 374 pages. \$12.50.

An INTRODUCTION to PROBABILITY THEORY and its APPLICATIONS *

Volume I—Second Edition

By *William Feller, Princeton University*. Thoroughly revised, this text provides a lucid introduction to probability theory in terms of mathematical concepts. As in the earlier edition, it serves the dual purpose of (1) developing probability theory rigorously as a mathematical discipline, and (2) illustrating the great variety of practical applications of basic theory.

Many chapters, in particular those on combinatorial analysis and recurrent events, are updated and expanded. In addition, the volume now includes two new chapters. The first of these covers by elementary methods the phenomena of random walks and fluctuation theory. The second provides an extended treatment of compound distributions and branching processes. 1957. 461 pages. \$10.75.

GAMES and DECISIONS: Introduction and Critical Survey

By *R. Duncan Luce and Howard Raiffa, both of Harvard University*. Although this book is written by two mathematicians, it is geared to the behavioral sciences, and emphasizes and criticizes aspects of the theories that appear to be of central concern to them. It describes the mathematical attempts to deal with such problems as value (or utility), subjective probability, conflict of interest (game theory), decision making under uncertainty, and social resolutions of value conflicts.

The authors clarify the current trends of research in game theory and decision making, and attempt to stimulate new research along lines which would make the theory more relevant to empirical scientists. The language and notation have been kept familiar and simple. 1957. 509 pages. \$8.75.

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is \$7.00 per annual volume of six numbers.

Research Problems and Invited Addresses offered for publication should be sent to B. J. PETTIS, Department of Mathematics, University of North Carolina, Chapel Hill, N. C.; Book reviews to J. C. OXTOBY, Bryn Mawr College, Bryn Mawr, Pa. Research Announcements offered for publication should be sent to some member of the Council of the Society, and communicated by him to E. E. MOISE, Department of Mathematics, University of Michigan, Ann Arbor, Mich. All other communications to the editors should be sent to the Managing Editor, J. C. OXTOBY.

The members of the Council for 1958 are: E. F. Beckenbach, E. G. Begle, R. E. Bellman, Lipman Bers, R. H. Bing, Garrett Birkhoff, R. P. Boas, Jr., Salomon Bochner, Richard Brauer, S. S. Chern, J. A. Dieudonné, J. L. Doob, Samuel Eilenberg, A. M. Gleason, J. W. Green, P. R. Halmos, Einar Hille, G. P. Hochschild, G. B. Huff, Mark Kac, Irving Kaplansky, J. L. Kelley, V. L. Klee, Jr., D. H. Lehmer, L. H. Loomis, W. S. Massey, E. J. McShane, A. E. Meder, Jr., E. E. Moise, Deane Montgomery, J. C. Oxtoby, B. J. Pettis, P. C. Rosenbloom, Walter Rudin, Hans Samelson, R. D. Schafer, I. J. Schoenberg, I. E. Segal, N. E. Steenrod, A. H. Taub, A. W. Tucker, S. M. Ulam, A. D. Wallace, J. W. T. Youngs.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length.

The subscription price is \$11.00 per annual volume of six numbers.

Papers in algebra and number theory should be sent to IRVING KAPLANSKY, Eckhart Hall, University of Chicago, Chicago 37, Ill.; in probability, real variables, logic and foundations to P. R. HALMOS, Institute for Advanced Study, Princeton, New Jersey (until June 1, 1958; thereafter to Eckhart Hall, University of Chicago, Chicago 37, Ill.); in abstract analysis to either P. R. HALMOS or IRVING KAPLANSKY; in geometry and topology to HANS SAMELSON, Department of Mathematics, University of Michigan, Ann Arbor, Mich.; in other branches of analysis, applied mathematics, and all other fields to R. P. BOAS, Lunt Building, Northwestern University, Evanston, Ill. All other communications to the editors should be addressed to the Managing Editor, IRVING KAPLANSKY.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Three volumes of two numbers each will be published in 1958. The subscription price is \$8.00 per volume.

Papers in geometry, differential equations and functions of complex variables should be sent to S. S. CHERN, Eckhart Hall, University of Chicago, Chicago 37, Ill.; in algebra and number theory to G. P. HOCHSCHILD, Department of Mathematics, University of Illinois, Urbana, Ill.; in analysis (except for differential equations and functions of a complex variable), applied mathematics and probability to MARK KAC, White Hall, Cornell University, Ithaca, N. Y.; in topology, logic and foundations to SAMUEL EILENBERG, Hamilton Hall, Columbia University, New York 27, N. Y. All other communications to the editors should be addressed to the Managing Editor, SAMUEL EILENBERG.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

MATHEMATICAL REVIEWS is published monthly, excepting July. The subscription price is \$35.00 per annual volume of eleven numbers.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

The subscription price is \$7.00 per annual volume of 7 numbers. A single copy is \$2.00.

All communications should be addressed to the Editor, J. H. CURTISS, 190 Hope Street, Providence 6, Rhode Island. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the inside front cover page.

Some Recent Publications of the Society

E. Hille and R. S. Phillips . <i>Functional analysis and semi-groups</i> . An enlarged and completely revised edition of Colloquium Volume 31, of the same title, by Hille.	\$13.80
J. L. Walsh . <i>Interpolation and approximation</i> . An enlarged and extensively revised edition of Colloquium Volume 20.	\$ 7.00
W. H. Gottschalk and G. A. Hedlund . <i>Structure of rings</i> . Colloquium Volume 37.	\$ 5.10
N. Jacobson . <i>Structure of rings</i> . Colloquium Volume 37.	\$ 7.70
C. Chevalley . <i>Introduction to the theory of algebraic functions of one variable</i> . Mathematical Surveys volume 6.	\$ 4.00
S. Bergman . <i>The kernel function and conformal mapping</i> . Mathematical Surveys volume 5.	\$ 4.00
O. F. G. Schilling . <i>The theory of valuations</i> . Mathematical Surveys volume 4.	\$ 6.00
M. Marden . <i>The geometry of the zeros of a polynomial in a complex domain</i> . Mathematical Surveys volume 3.	\$ 5.00
J. A. Shohat and J. D. Tamarkin . <i>The problem of moments</i> . Mathematical Surveys volume 1.	\$ 3.35
Russian Translations. Volume 5. <i>Eight papers on functional analysis and partial differential equations</i> .	\$ 4.30
Russian Translations. Volume 6. <i>Five papers on algebra and group theory</i> .	\$ 5.20
Russian Translations. Volume 7. <i>Two papers on homotopy theory of continuous mappings</i> .	\$ 5.50
Ernst Snapper . <i>Cohomology groups and genera of higher-dimensional fields</i> . Memoir 28.	\$ 1.90
Emery Thomas . <i>The generalized Pontrjagin cohomology operations and rings with divided powers</i> . Memoir 27.	\$ 1.70
Walter Strodt . <i>Principal solutions of ordinary differential equations in the complex domain</i> . Memoir 26.	\$ 2.00
A. Erdélyi and C. A. Swanson . <i>Asymptotic forms of Whittaker's confluent geometric functions</i> . Memoir 25.	\$ 1.40
Isaac Namioka . <i>Partially ordered linear topological spaces</i> . Memoir 24.	\$ 1.60

The price to members of the American Mathematical Society is 25% less than list.

A complete catalog of publications will be sent upon request.
