

PRE-PUBLICATION ANNOUNCEMENT

NEW MOST COMPLETE PROBABILITY *and* STATISTICS HANDBOOK

- **13 SECTIONS INCLUDE:** A comprehensive discussion of probability and statistical theory (including a discussion of the General Linear Model) — Discussion and tables on: **Order Statistics — Non-Parametric Statistics — Normal Distribution, Binomial, Poisson, Hypergeometric and Negative Binomial Distributions — Students t-Distribution — Chi-Square Distribution — F-Distribution — Range and Studentized Range — Correlation Coefficient — Quality Control ALSO: MISCELLANEOUS STATISTICAL TABLES and MISCELLANEOUS MATHEMATICAL TABLES.**
- **UNIQUE ARRANGEMENT OF INFORMATION** includes a discussion of each table immediately preceding each table.
- Offers wide coverage of probability for statistical use and a pleasing balance of discussion and tabular data.

... by the publishers of the
world-famous U.S.A. CRC Handbook of Chemistry and Physics

- OVER 500 PAGES AND OVER 70 LARGE TABLES
- LARGE 7½" x 10½" PAGE SIZE

Catalog No. S691
PRE-PUBLICATION PRICE
\$15.00 EACH
(Outside U.S.A. Add 50¢)

A Theory of Sets

by Anthony P. Morse

A Volume of Pure and Applied Mathematics: A Series of Monographs and Textbooks

This book provides a formalization which could be used without change to build just about any given mathematical structure. It also includes a unified account of logic and set theory. The language is formal, flexible, and usable. The usual elements of set theory receive a new and elegant treatment.

(M872) 1965, 130 pp., \$7.95

VOLUME 1

Advances in Mathematics

edited by Herbert Busemann

This series provides the active research mathematician with a long-needed, effective means of communicating the recent developments in his particular area of specialization to his colleagues and to scientists in related fields.

Subjects Include: functional analysis, differential geometry, lie theory, classical analysis, differential equations

Volume I, \$18.00 (Also available in 3 paperbound fascicles.)

Geometric Invariant Theory

by David Mumford

This book deals with the construction of orbit spaces in the category of algebraic varieties and applies this theory to solve the algebraic problems of moduli of curves.

Published jointly by Academic Press and Springer-Verlag, Berlin, at identical list price.

(M930) 1965, 146 pp., \$5.50

Theory of Jets in Ideal Fluids

by M. I. Gurevich

Translated from the Russian edition by Robert L. Street and Konstantin Zagustin

This book is a comprehensive text on high-speed, incompressible hydrodynamics with a brief discussion of compressible flow.

(G884) 1965, 586 pp., \$15.00

Enumerability, Decidability, Computability:

AN INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS

by Hans Hermes

Translated from the German by G. T. Herman and O. Plassmann

CONTENTS: Introductory Reflections on Algorithms. Turing Machines. μ -Recursive Functions. The Equivalence of Turing-Computability and μ -recursiveness. Recursive Functions. Undecidable Predicates. Miscellaneous. Author Index-Subject Index.

A Springer-Verlag title published in the United States and Canada by Academic Press.

(H530) 1965, 246 pp., \$9.75

Topology

by Gustav Choquet

A Volume of Pure and Applied Mathematics: A Series of Monographs and Textbooks

This volume provides an elegant and very modern treatment of topological spaces, mappings between them, and topological vector spaces. Both real and complex-valued functions are covered.

(C278) December 1965, about 370 pp.

Journals Published by the American Mathematical Society

Soviet Mathematics—Doklady

SOVIET MATHEMATICS—DOKLADY is a translation journal containing the entire pure mathematics section of the **DOKLADY AKADEMII NAUK SSSR**, the Reports of the Academy of Sciences of the USSR. The **DOKLADY** for a year contains more than 500 articles, each about 4 pages long. Issued bimonthly in January, March, May, July, September, and November.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes of **MATHEMATICAL REVIEWS** will be published in 1965, Volume 29 and Volume 30. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P.O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Dr. Harry Polachek, Technical Director, Applied Mathematics Laboratory, David Taylor Model Basin, Washington, D. C. 20007. The author may suggest the name of an editor for review of his paper.

Chinese Mathematics—Acta

This is a cover-to-cover translation into English of *Acta Mathematica Sinica* published by Academia Sinica Peking, People's Republic of China. *Acta Mathematica Sinica* contains current research in all fields of pure mathematics.

Volume 1, 1962 of the translation (corresponding to Volume 10, 1960 of the original) contained three issues. Volume 2-4 (1963-1964) contain four issues each.

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is \$7.00 per annual volume of six numbers.

Research Problems and Invited Addresses offered for publication should be sent to WALTER RUDIN, Department of Mathematics, University of Wisconsin, Madison, Wisconsin; Book Reviews to FELIX BROWDER, Department of Mathematics, University of Chicago, Chicago, Illinois 60637. Research Announcements offered for publication should be sent to some member of the Council of the Society, and communicated by him to E. H. SPANIER, Department of Mathematics, University of California, Berkeley, California 94720. All other communications to the editors should be sent to the Managing Editor, FELIX BROWDER.

The members of the Council for 1965 are: A. A. Albert, H. A. Antosiewicz, R. F. Arens, Maurice Auslander, Lipman Bers, R. P. Boas, Felix Browder, R. C. Buck, Eugenio Calabi, A. P. Calderon, Lamberto Cesari, P. J. Cohen, P. E. Conner, C. W. Curtis, D. A. Darling, J. L. Doob, G. F. D. Duff, Eldon Dyer, J. W. Green, P. R. Halmos, O. G. Harrold, G. A. Hedlund, M. H. Heins, Edwin Hewitt, Fritz John, Mark Kac, V. L. Klee, Karel de Leeuw, M. M. Loève, G. W. Mackey, W. T. Martin, W. S. Massey, J. W. Milnor, G. D. Mostow, Louis Nirenberg, R. S. Pierce, Everett Pitcher, Alex Rosenberg, Walter Rudin, Dana Scott, Seymour Sherman, I. M. Singer, Stephen Smale, E. H. Spanier, N. E. Steenrod, Michio Suzuki, J. D. Swift, A. E. Taylor, J. V. Wehausen, John Wermer, George Whaples, Daniel Zelinsky, Leo Zippin, Antoni Zygmund.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

Papers in algebra and number theory should be sent to ALEX ROSENBERG, Department of Mathematics, Cornell University, Ithaca, New York or GEORGE WHAPLES, Department of Mathematics, Indiana University, Bloomington, Indiana; in probability and combinatorics, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison 6, Wisconsin; in abstract analysis to either R. C. BUCK or ALEX ROSENBERG; in geometry and topology to ELDON DYER, Department of Mathematics, Rice University, Houston 1, Texas; in real and complex analysis to M. H. HEINS, Department of Mathematics, University of Illinois, Urbana, Illinois; in differential equations and applied mathematics to FRITZ JOHN, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York 3, New York. All other communications to the editors should be addressed to the Managing Editor, ELDON DYER.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Papers in analysis and applied mathematics should be sent to LOUIS NIRENBERG, Courant Institute of Mathematical Sciences, New York University, New York 3, New York; in topology to W. S. MASSEY, Department of Mathematics, Yale University, Box 2155, Yale Station, New Haven, Connecticut; in algebra, number theory, and logic to DANIEL ZELINSKY, Department of Mathematics, Northwestern University, Evanston, Illinois; in geometry and abstract analysis to I. M. SINGER, Department of Mathematics, Massachusetts Institute of Technology, Cambridge 39, Massachusetts; in statistics and probability to MICHEL LOÈVE, Department of Statistics, University of California, Berkeley 4, California; in mathematical logic and foundations to DANA SCOTT, Department of Mathematics, Stanford University, Stanford, California. All other communications to the editors should be addressed to the Managing Editor, MICHEL LOÈVE.
