

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is \$12.00 per annual volume of six numbers.

Invited Addresses offered for publication should be sent to MURRAY GERSTENHABER, School of Mathematics, Institute for Advanced Study, Princeton, New Jersey 08540.

Book Reviews should be sent to FELIX BROWDER, Department of Mathematics, University of Chicago, Chicago, Illinois 60637.

Research Announcements should be sent to some member of the Council of the Society, and communicated by him to M. H. PROTTER, Department of Mathematics, University of California, Berkeley, California 94720.

All other communications to the editors should be sent to the Managing Editor, FELIX BROWDER, at the above address.

The members of the Council for 1967 are: A. A. Albert, R. D. Anderson, H. A. Antosiewicz, R. F. Arens, Maurice Auslander, P. T. Bateman, R. H. Bing, Felix Browder, William Browder, David Buchsbaum, R. C. Buck, A. P. Calderon, Lamberto Cesari, P. J. Cohen, P. E. Conner, C. W. Curtis, J. B. Diaz, Eldon Dyer, Samuel Eilenberg, Herbert Federer, Walter Feit, Murray Gerstenhaber, J. W. Green, P. R. Halmos, O. G. Harrold, S. Helgason, Henry Helson, M. H. Heins, Kenneth Hoffman, Eugene Isaacson, Norman Levinson, G. W. Mackey, Saunders Mac Lane, W. T. Martin, A. P. Mattuck, H. P. McKean, Jr., C. B. Morrey, J. K. Moser, G. D. Mostow, Louis Nirenberg, Ivan Niven, R. S. Palais, Frank Peterson, R. S. Pierce, Everett Pitcher, M. H. Protter, Irving Reiner, Gian-Carlo Rota, Dana Scott, George Seligman, Stephen Smale, N. E. Steenrod, Michio Suzuki, J. D. Swift, W. R. Wasow, Bertram Yood, John Werner.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

Papers in algebra and number theory should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois; in modern or classical analysis to IRVING GLICKSBERG, Department of Mathematics, University of Washington, Seattle, Washington 98105 or to MAURICE HEINS, Mathematics Department, University of Illinois, Urbana, Illinois 61801; in geometry or topology to ELDON DYER, Graduate Studies Division, City University of New York, 33 West, 42nd Street, New York, New York 10036; in applied mathematics, differential equations, and related areas of analysis to WOLFGANG WASOW, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in probability, statistics, and related fields to JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in logic, set theory, and related areas to W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801. All other communications should be addressed to the Managing Editor, MAURICE HEINS.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Papers in analysis and applied mathematics should be sent to LOUIS NIRENBERG, Courant Institute of Mathematical Sciences, New York University, New York, New York 10012; in topology to FRANKLIN PETERSON, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139; in algebra, number theory, and logic to D. A. BUCHSBAUM, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in geometry and abstract analysis to R. S. PALAIS, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in statistics and probability to H. P. MCKEAN, Department of Mathematics, Rockefeller University, New York, New York 10021; in mathematical logic and foundations to DANA SCOTT, Department of Mathematics, Stanford University, Stanford, California 94305. All other communications to the editors should be addressed to the Managing Editor, DANA SCOTT.

Journals Published by the American Mathematical Society

Soviet Mathematics—Doklady

SOVIET MATHEMATICS—DOKLADY is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMI NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains about 500 articles, each about 4 pages long. Issued bimonthly.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes of MATHEMATICAL REVIEWS will be published in 1967, Volume 33, and Volume 34. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P.O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

Chinese Mathematics—Acta

This is a cover-to-cover translation into English of Acta Mathematica Sinica, a bimonthly published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics.

New Publications

This quarterly journal announces new books and journals in all fields of higher mathematics, including a section on both forthcoming and recently published books. The information is acquired from several sources, such as pamphlets and catalogs received from publishers and book dealers from many parts of the world.

CONTENTS—*Continued from back cover*

Werner Meyer-König and Hubert Tietz. On Tauberian conditions of type σ	926
Alexandre Joel Chorin. The numerical solution of the Navier-Stokes equations for an incompressible fluid.....	928
Peter J. Kahn. Chern numbers and oriented homotopy type..	932
Kuo-Tsai Chen. Iterated path integrals and generalized paths.....	935
Nelson L. Max. Homeomorphisms of $S^n \times S^l$	939
Lars Hörmander. Generators for some rings of analytic functions.....	943
Murray Gerstenhaber, The third cohomology group of a ring and the commutative cohomology theory.....	950
Z. A. Melzak. A combinatorial coincidence problem.....	955
Benjamin Halpern. Fixed points of nonexpanding maps....	957
Albert Nijenhuis. A Lie product for the cohomology of subalgebras with coefficients in the quotient.....	962
Charles Kam-Tai Chui. Bounded approximation by polynomials with restricted zeros.....	967
Richard E. Phillips. On direct products of generalized solvable groups.....	973
Kuo-Tsai Chen. Algebraization of iterated integration along paths.....	975
Martin Schechter. Intermediate extensions in L^p	979
M. Rajagopalan and T. Soundararajan. On self dual LCA groups.....	985
Errata, Volume 73.....	987
Statement of Ownership, Management and Circulation.....	987
By-Laws of the American Mathematical Society.....	988
Index to Volume 73.....	1002

November, 1967

Survey Article

- S. Smale. Differentiable dynamical systems..... 747

Invited Address

- Abraham Robinson. Nonstandard arithmetic..... 818

- The Summer Meeting in Toronto..... 844

Research Announcements

- Walter Littman. A connection between α -capacity and $m-p$ polarity..... 862
- Felix E. Browder. Nonlinear equations of evolution and nonlinear accretive operators in Banach spaces..... 867
- Felix E. Browder. Nonlinear mappings of nonexpansive and accretive type in Banach spaces..... 875
- J. L. Ullman. A problem of Schmidt and Spitzer..... 883
- Tosio Kato. Demicontinuity, hemicontinuity and monotonicity. II..... 886
- D. G. Aronson. Bounds for the fundamental solution of a parabolic equation..... 890
- William M. Singer. Connective fiberings over BU and U ... 897
- Robert Hermann. Differential equations of the matrix elements of the degenerate series..... 899
- Tosio Kato. Similarity for sequences of projections..... 904
- Seth Warner. Locally compact semilocal rings..... 906
- Arlo W. Schurle. Compactification of strongly countable dimensional spaces..... 909
- Charles H. Giffen. On transformations of the 3-sphere fixing a knot..... 913
- V. Mandrekar and M. Nadkarni. Quasi-invariance of analytic measures on compact groups..... 915
- R. Wilhelmsen. A nonlinear boundary value problem..... 920
- William Lopez. An example in the fixed point theory of polyhedra..... 922
- Charles A. Akemann. Projections onto separable C^* -subalgebras of a W^* -algebra..... 925
