

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is \$12.00 per annual volume of six numbers.

Invited Addresses offered for publication should be sent to MURRAY GERSTENHABER, Department of Mathematics, University of Pennsylvania, Philadelphia, Pennsylvania 19104

Book Reviews should be sent to GIAN-CARLO ROTA, Department of Mathematics, Rockefeller University, New York, New York 10021.

Research Announcements should be sent to some member of the Council of the Society, and communicated by him to M. H. PROTTER, Department of Mathematics, University of California, Berkeley, California 94720.

All other communications to the editors should be sent to the Managing Editor, FELIX BROWDER, at the above address.

The members of the Council for 1968 are: R. D. Anderson, Louis Auslander, Paul T. Bateman, R. H. Bing, David H. Blackwell, Armand Borel, Raoul Bott, William Browder, Edgar H. Brown Jr., David Buchsbaum, R. C. Buck, C. W. Curtis, J. B. Diaz, Herbert Federer, Walter Feit, Avner Friedman, Kurt Friedrichs, Wolfgang H. Fuchs, Murray Gerstenhaber, Irving L. Glicksberg, John W. Green, P. R. Halmos, O. G. Harrold, Henry Helson, Israel N. Herstein, Eugene Isaacson, Joseph J. Kohn, Serge Lang, George Mackey, Saunders Mac Lane, H. P. McKean, Jr., W. T. Martin, A. P. Mattuck, Ernest A. Michael, C. B. Morrey, Jr., J. K. Moser, G. D. Mostow, Ivan Niven, R. S. Palais, Frank Peterson, Richard S. Pierce, Everett Pitcher, M. H. Protter, Irving Reiner, Gian-Carlo Rota, Stephen Smale, Jacob T. Schwartz, Dana S. Scott, George Seligman, Norman E. Steenrod, Michio Suzuki, P. Emery Thomas, W. R. Wasow, John Wermer, Bertram Yood, Oscar Zariski.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

Papers in algebra, number theory, and algebraic geometry should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois; in modern or classical analysis to IRVING GLICKSBERG, Department of Mathematics, University of Washington, Seattle, Washington 98105 or to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850; in set-theoretic and general topology to ERNEST A. MICHAEL, Department of Mathematics, University of Washington, Seattle, Washington 98105; in algebraic topology and all other geometry to P. EMERY THOMAS, Department of Mathematics, University of California, Berkeley, California 94720; in applied mathematics, differential equations, and related areas of analysis to WOLFGANG WASOW, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in probability, statistics, and related fields to JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in logic, set theory, and related areas to W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801. All other communications should be addressed to the Managing Editor, ARTHUR MATTUCK.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Papers in analysis and applied mathematics should be sent to J. J. KOHN, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in topology to FRANKLIN PETERSON, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139; in algebra, number theory, and logic to D. A. BUCHSBAUM, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in geometry and abstract analysis to R. S. PALAIS, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in statistics and probability to H. P. MCKEAN, Department of Mathematics, Rockefeller University, New York, New York 10021; in mathematical logic and foundations to DANA SCOTT, Department of Mathematics, Stanford University, Stanford, California 94305. All other communications to the editors should be addressed to the Managing Editor, DANA SCOTT.

Journals Published by the American Mathematical Society

Soviet Mathematics—Doklady

SOVIET MATHEMATICS—DOKLADY is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMI NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains about 500 articles, each about 4 pages long. Issued bimonthly.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes of MATHEMATICAL REVIEWS will be published in 1967, Volume 33, and Volume 34. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P.O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

Chinese Mathematics—Acta

This is a cover-to-cover translation into English of Acta Mathematica Sinica, a bimonthly published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics.

New Publications

This quarterly journal announces new books and journals in all fields of higher mathematics, including a section on both forthcoming and recently published books. The information is acquired from several sources, such as pamphlets and catalogs received from publishers and book dealers from many parts of the world.

CONTENTS—Continued from back cover

Joachim Kühn. Ein Analogon zum High Indices Theorem für Potenzreihen mit wenigen Vorzeichenwechseln	133
Deborah Tepper Haimo and Frank M. Cholewinski. The Poisson-Laguerre transform	137
Albert Edrei and Allen Weitsman. Asymptotic behavior of meromorphic functions with extremal deficiencies	140
David J. Winter. Representations of locally finite groups . . .	145
P. L. Butzer and E. Görlich. Characterizations of Favard classes for functions of several variables	149
Francis E. Sullivan. Norm characterization of real L^p spaces	153
Stephen L. Jones. The impossibility of filling E^n with arcs . . .	155
Daya-Nand Verma. Structure of certain induced representations of complex semisimple Lie algebras	160
R. G. Laha. Nonnegative eigen functions of Laplace-Beltrami operators on symmetric spaces	167
Dale Rolfsen. Strongly convex metrics in cells	171
E. H. Connell. Examples of nontrivial H -cobordisms	176
Robert E. Mosher. Some homotopy of stunted complex projective space	179
Herbert Federer. Some properties of distributions whose partial derivatives are representable by integration	183
Zdeněk Frolík. Fixed points of maps of βN	187
H. Berens, P. L. Butzer and U. Westphal. Representation of fractional powers of infinitesimal generators of semigroups .	191
David B. Wales. Finite linear groups in seven variables	197
C. T. C. Wall. Graded algebras, anti-involutions, simple groups and symmetric spaces	198
Errata, Volume 73	203
Council and Board of Trustees—1967	204

CONTENTS

January, 1968

Invited Addresses

F. V. Atkinson. Multiparameter spectral theory.	1
Alex Heller. Stable homotopy categories.	28
W. T. Tutte. On the enumeration of planar maps.	64

Book Reviews

Heinz Bauer. Review of "Probability and potentials," by Paul A. Meyer.	75
Victor L. Shapiro. Review of "Real and complex analysis," by Walter Rudin.	79
1967 Election of members of the Council and Board of Trustees. . .	84
Report of the Treasurer, by W. T. Martin.	85
The October Meeting in Cambridge.	89
The November Meeting in Knoxville.	90
The November Meeting in Urbana.	91

Research Announcements

C. L. Mallows and John Riordan. The inversion enumerator for labeled trees.	92
Stephen Grossberg. Global ratio limit theorems for some non- linear functional-differential equations. I.	95
Stephen Grossberg. Global ratio limit theorems for some nonlinear functional-differential equations. II.	100
P. L. Butzer and W. Trebels. Hilbert transforms, fractional integration and differentiation.	106
A. G. Konheim and T. J. Rivlin. The bounded linear opera- tors that commute with the Bernstein operators.	111
Nelo D. Allan. On the commensurability class of the Siegel modular group.	115
J. E. McMillan. On the geometric theory of functions mero- morphic in a disc.	119
G. Burde and H. Zieschang. A topological classification of certain 3-manifolds.	122
Philip Hartman. Disconjugate n th order differential equa- tions and principal solutions.	125
G. S. Wells. Immersions of G -manifolds, G finite.	130
