### Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and a department of research announcements.

The subscription price is \$12.00 per annual volume of six numbers.

Invited Addresses offered for publication should be sent to MURRAY GERSTENHABER, Department of Mathematics, University of Pennsylvania, Philadelphia, Pennsylvania 19104.

Book Reviews should be sent to GIAN-CARLO ROTA, Mathematics Department, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139.

All Research Announcements should be sent to M. H. PROTTER, Department of Mathematics, University of California, Berkeley, California 94720.

All other communications to the editors should be sent to the Managing Editor, MURRAY GERSTENHABER, at the above address.

### Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

Papers in algebra, number theory, and algebraic geometry should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois; in modern or classical analysis to IRVING GLICKSBERG, Department of Mathematics, University of Washington, Seattle, Washington 98105 or to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850; in set-theoretic and general topology to ERNEST A. MICHAEL, Department of Mathematics, University of Washington, Seattle, Washington 98105; in algebraic topology and all other geometry to P. EMERY THOMAS, Department of Mathematics, University of California, Berkeley, California 94720; in applied mathematics, differential equations, and related areas of analysis to WOLFGANG WASOW, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in probability, statistics, and related fields to JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in logic, set theory, and related areas to W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801. All other communications should be addressed to the Managing Editor, ARTHUR MATTUCK.

### Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Papers in analysis and applied mathematics should be sent to J. J. KOHN, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in topology to FRANKLIN PETERSON, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139; in algebra, number theory, and logic to D. A. BUCHSBAUM, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in geometry and abstract analysis to R. S. PALAIS, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in statistics and probability to H. P. MCKEAN, Department of Mathematics, Rockefeller University, New York, New York 10021; in mathematical logic and foundations to DANA SCOTT, Department of Mathematics, Stanford University, Stanford, California 94305. All other communications to the editors should be addressed to the Managing Editor, DANA SCOTT.

### **Soviet Mathematics—Doklady**

SOVIET MATHEMATICS—DOKLADY is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMI NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains about 500 articles, each about 4 pages long. Issued bimonthly.

### **Mathematical Reviews**

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes of MATHEMATICAL REVIEWS will be published in 1967, Volume 33, and Volume 34. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

### **Notices of the American Mathematical Society**

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P.O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

### **Mathematics of Computation**

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

### **Chinese Mathematics—Acta**

This is a cover-to-cover translation into English of Acta Mathematica Sinica, a bimonthly published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics.

### **New Publications**

This quarterly journal announces new books and journals in all fields of higher mathematics, including a section on both forthcoming and recently published books. The information is acquired from several sources, such as pamphlets and catalogs received from publishers and book dealers from many parts of the world.

## CONTENTS—Continued from back cover

P. F. Duvall, Jr. Topological embeddings in codimension one. . . . .	1113
J. M. Boardman and R. M. Vogt. Homotopy-everything $H$ -spaces. . . . .	1117
Paul Hill. Extending automorphisms on primary groups	1123
T. P. Srinivasan and U. B. Tewari. A Stone-Weierstrass theorem for semigroups. . . . .	1125
Stephen Fisher. The convex hull of the finite Blaschke products. . . . .	1128
Ulrich Oberst. Exactness of inverse limits. . . . .	1129
Alfred Brauer and Ivey C. Gentry. On the characteristic roots of tournament matrices. . . . .	1133
E. D. Cashwell and C. J. Everett. A general mean value theorem. . . . .	1135
Martin Schechter. Riesz operators and Fredholm perturbations. . . . .	1139
Betty Lou. The centralizer of a regular unipotent element in a semisimple algebraic group. . . . .	1144
Jeff Cheeger and Detlef Gromoll. The structure of complete manifolds of nonnegative curvature. . . . .	1147
U. Krengel and L. Sucheston. On mixing in infinite measure spaces. . . . .	1150
Index to Volume 74. . . . .	1156
Erratum, Volume 74. . . . .	1164
Statement of Ownership, Management and Circulation . . .	1164

The members of the Council for 1968 are: R. D. Anderson, Louis Auslander, Paul T. Bateman, R. H. Bing, David H. Blackwell, Armand Borel, Raoul Bott, William Browder, Edgar H. Brown, Jr., David Buchsbaum, R. C. Buck, C. W. Curtis, J. B. Diaz, Herbert Federer, Walter Feit, Avner Friedman, Kurt Friedrichs, Wolfgang H. Fuchs, Murray Gerstenhaber, Irving L. Glicksberg, John W. Green, P. R. Halmos, O. G. Harrold, Henry Helson, Israel N. Herstein, Eugene Isaacson, Joseph J. Kohn, Serge Lang, George Mackey, Saunders Mac Lane, H. P. McKean, Jr., W. T. Martin, A. P. Mattuck, Ernest A. Michael, C. B. Morrey, Jr., J. K. Moser, G. D. Mostow, Ivan Niven, R. S. Palais, Frank Peterson, Richard S. Pierce, Everett Pitcher, M. H. Protter, Irving Reiner, Gian-Carlo Rota, Stephen Smale, Jacob T. Schwartz, Dana S. Scott, George Seligman, Norman E. Steenrod, Michio Suzuki, P. Emery Thomas, W. R. Wasow, John Wermer, Bertram Yood, Oscar Zariski.

# CONTENTS

November, 1968

## Invited Addresses

A. W. Goodman. Open problems on univalent and multi-valent functions . . . . .	1035
George B. Seligman. Algebraic Lie algebras . . . . .	1051
<b>The April Meeting in New York . . . . .</b>	<b>1066</b>
<b>The June Meeting in Portland . . . . .</b>	<b>1067</b>

## Research Announcements

Jet Wimp and Jerry Fields. On the factorization of a class of difference operators . . . . .	1068
Blair Swartz. $O(h^{2n+2-l})$ bounds on some spline interpolation errors . . . . .	1072
Martin Arkowitz. A homological method for computing certain Whitehead products . . . . .	1079
William J. Davis. Schauder decompositions in Banach spaces . . . . .	1083
Richard E. Block. Differentiably simple algebras . . . . .	1086
Zalman Rubinstein. On the approximation by $C$ -polynomials . . . . .	1091
J. H. Lindsey, II. On a projective representation of the Hall-Janko group . . . . .	1094
David G. Mowat. A Galois problem for mappings . . . . .	1095
E. B. Fabes and M. Jodeit, Jr. $L^p$ boundary value problems for parabolic equations . . . . .	1098
N. T. Peck. A note on support points . . . . .	1103
John Rhodes. The fundamental lemma of complexity for arbitrary finite semigroups . . . . .	1104
C. L. Wiginton and Susan Shrader. Spaces determined by a group of functions . . . . .	1110
